NERVE TONIC
A NATURAL REMEDY FOR
Epileptic Fits, Falling Sickness, Hysterics, St. Vitus Dance, Nervousness, Hypochondria, Melancholia, Inebriety, Sleeplessness, Dizziness, Brain and Spinal Weakness.

This medicine has direct action upon the nerve centers, allaying all irritabilities, and increasing the flow and power of nervous fluid. It is perfectly harmless and leaves no unpleasant effects.

FREE—A Valuable Book on Nervous Diseases sent free to any address and poor patients can also obtain this medicine free of charge.

KOENIG MED. CO., Chicago, Ill.
Sold by Druggists at \$1 per Bottle. 6 for \$5. Large Size, \$1.75, 6 Bottles for \$10.

NO MORE BACK ACHES
OREGON KIDNEY TEA
CURES ALL KIDNEY TROUBLES
Recently the following notice appeared in the San Francisco Chronicle.
"Judge S. had been sick only about two weeks, and it was not until the last three or four days that the malady took a serious turn. At the beginning of his illness he suffered from diabetes and stomach disorder. Later the kidneys refused to perform their functions and he passed quietly away. Thus ended the life of one of the most prominent men in California." Like thousands of others his untimely death was the result of neglecting early symptoms of kidney disease.
IF YOU
are troubled with diabetes, gravel, or any derangement of the kidneys or urinary organs, don't delay proper treatment until you are forced to give up your daily duties; don't waste your money on worthless liniments and worse plasters, but strike at the seat of the disease at once by using the greatest of all known remedies, the celebrated Oregon Kidney Tea. It has saved the lives of thousands. Why should it not cure you? Try it. Purely vegetable and pleasant to take. \$1.00 a package, 6 for \$5.00.

MIDDLE AGE
ORGANIC WEAKNESS AND PREMATURE DEBILITY CAN BE CURED.
Restored vigor and life prolonged even in advanced years by a miracle of modern science. Call or write enclosing \$1.00 for a regular specialist of many years' experience, A. H. DIEFFENBACH DISPENSARY, 235 W. 8th St., MILWAUKEE, WIS.

PILES
"HARRIS" Pile Ointment is the most reliable and best cure for Piles. Price \$1.00. By Druggists or mail. Send for Free Trial. Address: "HARRIS" Pile Ointment, Box 244, New York City.

TO AGENTS.

Homeseekers' excursions, 1892, on August 30 and September 17th, a rate of one lowest first class fair will be made from eastern points to points on our line for two homeseekers' excursions. These tickets will be sold at all the principal railway points as far east as Buffalo and Pittsburg. Tickets will be good within twenty days from the date of sale and stop overs will be allowed after passing the Missouri river. It is expected that there will be quite a large immigration of intending settlers to Nebraska, northwestern Kansas and eastern Colorado, during this summer and fall. This immigration can be very largely increased by judicious advertising and work by the various communities tributary to our line. It is therefore suggested that sections proposing to prepare such advertising matter for distribution in the east in regard to the inducements they have to offer the farmer, the business man and investor, should begin to get their advertising in shape at as early a date as possible. In case their plans contemplate sending a good advertising man to distribute their matter and attend to their advertising generally, this department may be able to give valuable pointers as to the best method of doing the work.

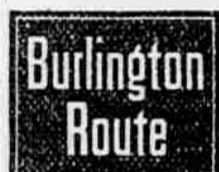

I think it is desirable that editors of the papers along our line should begin agitating the matter in order that the people may be prompted to do more or less individual work with their friends in the east in the way of sending by mail such matter as the different counties or districts may prepare in pamphlet form or in the shape of extra editions of their home newspapers giving

full information as to the resources and advantages, and directing attention to the very low rates that will be made to enable them to come and see for themselves that the representations are not really up to the reality.

The company has recently issued a pamphlet in regard to the agricultural resources of Nebraska, which will be furnished free to those who may desire to mail it to their friends in the east. This pamphlet treats of Nebraska, northwestern Kansas and eastern Colorado. I wish you would present this matter to editors at your place and also to other parties who may be interested in settling up vacant farm lands of this state. J. FRANCIS, G. P. and T. A., Omaha, Nebraska.

Children Cry for Pitcher's Castoria.

Burlington Excursions.

Eastern cities and pleasure resorts are best reached by the BURLINGTON ROUTE. The improved train service in effect, brings Omaha within forty hours and Denver within fifty-three hours of New York, Boston or Philadelphia. The numerous conventions to be held in New York, Saratoga, Detroit and other eastern cities during the coming summer, to which reduced rates will apply, offer splendid opportunities of visiting the east at an almost nominal cost. The local agent of the B. & M. R. R. will be glad to give you further information.

Colic and Cholera Morbus.

Colic, cholera morbus, cramp and many other affections of the stomach and bowels prevalent at this time of the year are due to two causes. First the depressing effect of the hot weather upon the nervous system, and second, the use of green fruit, cucumbers, melons, etc. No one is safe from painful and even dangerous attacks of these affections unless unusual precautions are taken this time of the year. A tablespoonful of Pe-ru-na taken before each meal is a complete protection against these maladies. Pe-ru-na is not only a preventive of colic, cholera morbus, cramps, stomach ache, summer diarrhea and cholera, but is also a prompt cure for these diseases. Where the attack is very severe and painful a wine glassful of Pe-ru-na should be taken at once, followed by two tablespoonful doses until complete relief is obtained. This never fails in a single case. In cases of less severity a tablespoonful every hour is sufficient. No one should neglect the precaution of taking a dose of Pe-ru-na before each meal, until the hot weather is over.

Complete treatise on diseases of hot weather sent free to any address by The Pe-ru-na Drug Manufacturing Company, Columbus, Ohio.

WILL LAY OVER LAST YEAR.

"Nebraska on Wheels" will roll eastward from Omaha, September 15th, over the Burlington, for an exhibition trip through the states of Ohio, New York, Massachusetts, Rhode Island and Connecticut, lasting about four weeks.

The matter was definitely settled last evening at a meeting at the Aecer of the advisory board of directors and officers of the Nebraska State Business Men's association. Those present were: L. D. Davidson, Omaha, general president; O. J. King, Lincoln, first vice president; S. S. English, Eagle, third vice president; R. F. Hodgkin, Omaha, general secretary; F. H. Moore, Kearney, first assistant secretary; S. H. Colvin, McCook, second assistant secretary; C. F. Iddings, North Platte, third assistant secretary. H. J. Lee, Fremont, second vice president, was the only absent member of the board.

It was stated that the meeting was to be devoted to making arrangements for sending out a state advertising train that would eclipse in every particular that of last year, to be sent through to the Atlantic seaboard.

DETAILS OF THE PLAN.

The train will consist of three exhibit cars, (one more than was sent out last year), a baggage car and Pullman sleeper. The train will be run as a special and will make the entire trip as a solid train, to be known as the Nebraska advertising train or "Nebraska on Wheels No. 2."

Secretary Hodgkin stated that the railroads had agreed to bring in all material for the exhibit free of expense, and furnish transportation for one man from each county to come and look after the goods and see to their proper arrangement in the cars. It was decided to allow thirty counties to be represented, and they will be accepted in the order of their application, accompanied by the cash. Each county represented will be assessed \$200 for the privilege, with the exception of Lancaster, which will be taxed \$350 and Douglas \$500. Each county will be allowed one representative on the train throughout the trip free, and \$150 for each additional man.

Ten feet of space will be allotted to each county exhibit, to be made up as the various counties may desire, but it is expected that each will make as varied and complete a showing as the amount of space at their disposal will admit.

The general plan of last year will be followed in an enlarged and extended form, changed in such ways as the experience of last year dictates. Each county represented will be expected to furnish a two thousand-word descriptive write up of its resources to be incorporated in the pamphlet to be prepared for distribution enroute by the board, setting forth the advantages of the state, and each will be allowed to take along fifteen thousand pieces of advertising matter exclusive of cards and other small matter.

Final notification of the intention to participate in the scheme must be received not later than August 25th and the exhibit must be on hand within two days after the close of the state fair at Lincoln.

HOW THEY WILL TRAVEL.

The train will go east over the Burlington, Lake Shore, New York Central and Boston & Albany roads and return over the New York & New England, Erie and Northwestern roads.

The association will send out two advance agents to bill towns where stops will be made and will also take along a press representative who will see to it that the exhibit is not overlooked by the newspapers of the sections through which the train will pass.

It is particularly desired that attention be paid to the wheat exhibit, as it was stated that this feature would possess great attraction for New York and Massachusetts farmers. It is not intended, however, that any branch of industry or any phase of agriculture shall be neglected.

The train will be elaborately decorated, both inside and out. Work on the decorative panels for the interior will be commenced, as considerable time will be consumed in collecting the grasses that are so important a feature in that connection.—Tuesday's Bee.

Make Noble your family grocer and many other blessings will fall to your lot, besides having the best groceries on your table that the market affords.

ANOTHER great reformer has risen to say that he has discovered that the present puny appearance of the well-to-do people of the human race, arises from the pernicious habit of wearing shoes. The shoes cut off the electric communication between the human being and the earth. Hence the children of the poor who go barefoot and our semi-savage ancestors who went barefoot were and are enormously stronger and healthier than we are. This is all very nice, but the theory doesn't hold water for the reason that the modern civilized man who wears shoes and cultivates his body in a reasonable way, is stronger and healthier and longer lived than his barefooted and sandaled ancestors and the children of the country who wear shoes are at least as healthy and strong as the barefooted ones. The facts are against the theory.—Journal.

An article in the Engineering Monthly by G. E. Curtis, of the Smithsonian institute, entitled "Facts About Rainmaking" is a very thorough exposition of the theory of General Dryenfurth and others who claim to make rain to order. The writer says: "Examined in detail, with all the circumstances both of the operator and the weather recorded, it is evident that the experiments have utterly failed to demonstrate that explosions can develop a storm or produce a measurable rain." But another appropriation has been made for the government experiments under Dryenfurth's supervision and the work will be continued. The real business, however, is being done by the private rainmakers, the "professors" who are making contracts with western farmers at so many thousand dollars a shower. These men are wise in their generation. They know that in the nature of things it is bound to rain sooner or later in any locality. Leaving cause and effect out of consideration entirely, they are sure to win in the game of chance which they are playing. When the fail they lose nothing; when they succeed—that is, when they happen to be operating where the rain falls—they win the amount stipulated. It is a great business.

MEIKLEJOH in the Third and Andrews in the Fifth, republican nominees for congress, are men to whom every republican in their respective districts can point with pride. Self-made, honest and able, loyal to Nebraska and her interests, they will conduct a campaign of fairness and reason, candidly, freely and courageously defending the principles of the republican party, pointing out the fallacies of free trade, free coinage, fiat money and the many other visionary schemes for growing rich without the practice of industry and economy. On such a canvass they cannot fail to win.—Journal.

It turns out that Private Iams, of the Pennsylvania national guards, who was half shaved, hung up by the thumbs until he fainted, and then drummed out of the regiment, was not court martialed at all for his offense of hurrahing for the would be assassin of Manager Frick, but the punishment was inflicted by the colonel of his regiment, Streator, on his own responsibility. The public sentiment was very strong against the thumb hanging and the colonel will doubtless be court martialed himself for his savagery. Putting people to the torture is a relic of barbarism that will not stand for the proper military discipline these days. There was enough of this brutality during the civil war to last for the entire century.—

In general, the crop prospects are excellent all over Nebraska. The western part of the state has been visited by a bountiful rain, the entire Elkhorn valley has been drenched thoroughly during the week, and local rains in the central and southern counties have worked powerfully in counteracting the recent excessive heat. The indications are now that the backbone of the torrid season is broken, and that ample opportunity will be given for all kinds of crops to mature and to be harvested in splendid order. The heat has had a wonderful effect in stimulating the growth of backward cornfields, and in spite of the late spring the period of ripening will be delayed but little beyond the regular season.—Journal.
