THERE is no wealth but life—life including all its power of love, joy and admiration. That country is the richest which nourishes the greatest number of noble and happy human beings; that man is richest who, having performed the functions of his own life to the utmost, has also the widest helpful influence.

THE value of irrigation, even at great cost, has been fully demonstrated in the arid regions of the southwest. A contract has just been let for the construction of an irrigation canal in Arizona that will be seventy miles long, with an average flow of six feet of water, and will cover 160,000 acres of land. The expenses of building this great ditch will be \$2,000,000, but it is believed that it will be highly profitable. It will render fruitful an immense territory that is now unproductive.

WHEN the famous steamship City of New York sails from Liverpool on the 25th inst. she will bear the American flag and will belong to the American line. She will be given a warm reception when she reached New York. The City of Paris, also now belonging to the American line, will presently fly the stars and stripes, and several new ships equal to these ocean grayhounds will be added to this fleet as soon as they can be built. There will be nothing afloat superior to the American vessels from this time forth.

A MOVEMENT is on foot in New York that, if it proves a success, will be a good example for other states. In discussing the ways and means for securing good roads it has occurred to a legislator that prison labor on the roads would be just the thing and he has introduced a bill providing that two-thirds of the convicts in the state penitentiaries be set to working on the roads for their systematic improvement.

Two birds are aimed at with this stone. One is the solution of the problem which is pressing, and the other is to find profitable employment for convict labor that will not compete with the skilled labor of folks outside the penitentiary. The Journal hopes that it will be a go.

The idea is of course not original. In Europe the employment of convict labor on the roads is as old as the hills and has proven very successful.—Journal.

FARMERS.

WHAT THEY WRITE ABOUT THE COUNTRY, AND WHAT CROPS THEY RAISE IN

Southwestern Nebraska.

READ WHAT HAS BEEN DONE.

SOUTHWESTERN NEBRASKA
By an Iowa Farmer.

Editor Democrat, Fort Madison, Iowa.

DEAR SIR:—Believing that a short letter would interest some of my friends and acquaintances, with your permission I would like to give through your columns, a short sketch of my adventures to the far west, and what I find here. I arrived here November 18th, last, with my family of eleven. I see but little change since I was here in February, 1892, except that there has been a great amount of prairie land put under cultivation this year, and a vast amount of grain raised, which is being marketed as fast as possible at good prices. It is surprising to see so many Iowa, Illinois, and eastern Nebraska farmers settling here, and as a result the price of farm lands is advancing.

I never saw such beautiful fall weather in my life; have had no winter at all yet, but about four or five inches of snow. Weather nice and roads fine. Upon looking over the crop I find a great difference in the yield per acre, some corn yielding 70 bushels per acre and some only 20 bushels. I also find that it is invariably due to the various ways of farming; good farming raises good crops and poor farming poor crops. There are many fields of sod corn here yielding 35 bushels per acre, and this yield at 25 cents per bushel makes a good income from \$10 to \$15 per acre. Broom corn is a favorite and profitable sod crop here; it costs \$5 per acre to get it ready for market, and a 20-acre sod field on my road to town made \$12.50 per acre after all expenses.

There is a large amount of prairie land from which you can get two years crops for breaking. This looks to me like better terms than the farmers can get in the east. I have found no disadvantages yet since my arrival here, and doubt of ever finding such as are expected by eastern people. The society is refined and social, which is very agreeable to new settlers.

Now as I have already used up too much space I will close by saying that I am well pleased with Southwestern Nebraska, and believe that there are many farmers throughout the east who are losing a grand opportunity of getting themselves a good home.

Should any one wish to gain any further information as to Southwestern Nebraska, I will be pleased to answer any questions, or would refer them to Mr. S. H. Colvin, of McCook, Nebraska, who was the cause of my settling here. He has a neat map and descriptive circular of Southwestern Nebraska, and a price list of farm lands, which he will be glad to send you upon receipt of a stamp.

Thanking you for this space, and hoping to meet some of your readers here soon, I am, very respectfully yours,
HENRY F. KIPP.

DEAR FRIEND:—I arrived here with my three car loads of stock and goods in fine shape. Was greatly surprised to find the ground bare and roads so fine, and such nice weather, there having been a heavy snow on the ground when I left Lake City, Iowa. I find there has been only from 4 to 6 inches of snow here this winter, and there is but little frost in the ground now. I am more favorably impressed with the country now than when here before. There can be no finer farm land found than here, and the vast amount of corn piled all over the prairie will vouch for its productiveness. When I first read the description of Southwestern Nebraska, with prices of land written by S. H. Colvin, of McCook, Red Willow county, Nebraska, I believed it too greatly exaggerated; but I did have faith enough to come and see the country, and am now ready to confirm the statement of the country as made in the circular, and believe that Mr. Colvin has underestimated it in many particulars.

I have bought myself a fine 640 acre farm and will go to farming in earnest this spring. I never saw so fine laying land for farming, where the yield per acre is so great, and you can buy the land at from \$10 to \$15 per acre. This is a good location to rent land, as you can get one-third of all the crop, and in many cases get two crops for breaking the land. Corn is yielding heavy and this is a fine country to feed stock. I am sorry that all the farmers in the east cannot see this country, as I am satisfied there are many who are giving a heavy rent that could own homes here and get all the crop. I find that the price of land is advancing, and in a short time the cheap land will all be gone.

Hoping my farmer friends will be interested enough to visit Southwestern Nebraska, I remain,
Very truly yours,
R. P. BARR.

R. P. BARR.

DEAR FRIEND:—I arrived here with my three car loads of stock and goods in fine shape. Was greatly surprised to find the ground bare and roads so fine, and such nice weather, there having been a heavy snow on the ground when I left Lake City, Iowa. I find there has been only from 4 to 6 inches of snow here this winter, and there is but little frost in the ground now. I am more favorably impressed with the country now than when here before. There can be no finer farm land found than here, and the vast amount of corn piled all over the prairie will vouch for its productiveness. When I first read the description of Southwestern Nebraska, with prices of land written by S. H. Colvin, of McCook, Red Willow county, Nebraska, I believed it too greatly exaggerated; but I did have faith enough to come and see the country, and am now ready to confirm the statement of the country as made in the circular, and believe that Mr. Colvin has underestimated it in many particulars.

I have bought myself a fine 640 acre farm and will go to farming in earnest this spring. I never saw so fine laying land for farming, where the yield per acre is so great, and you can buy the land at from \$10 to \$15 per acre. This is a good location to rent land, as you can get one-third of all the crop, and in many cases get two crops for breaking the land. Corn is yielding heavy and this is a fine country to feed stock. I am sorry that all the farmers in the east cannot see this country, as I am satisfied there are many who are giving a heavy rent that could own homes here and get all the crop. I find that the price of land is advancing, and in a short time the cheap land will all be gone.
