Charlie Leach is not quite certain whether he collided with a mogul locomotive or was run through a threshing machine. The bumps, bruises, sprains, cuts, etc. which decorate and pain him would indicate either or both. At any rate Charlie feels truly grateful that he escaped with his life, if his body is somewhat unrecognizable. So are his many friends.

OUTING SHOES.

It long ago seemed as though shoes could never be better and never be cheaper, but they are better now and cheaper now than they ever were before. The great every day favorite is our men's and ladies' shoe. It is as much a boon to the pocketbook as it is to the feet. It won't wear you out to wear it out. You don't need to take care of it; it takes care of itself. It will give you solid comfort for the simple reason that a better shoe for knockabout purposes has never been produced. If prices never appealed to you before, the price of this shoe will, for it costs only \$2.50. It will look nicer and wear longer than any shoe on earth.
