USE OREGON KIDNEY TEA.

IT WILL CURE YOU OF BACKACHE, Inflammation of the Bladder and Kidneys, Diabetes, Loss of Flesh, Damp Swellings, Constipation and Complaints arising from a world condition of the urinary organs.

THE HUMPHREYS' HUMPHREYS'

That the diseases of domestic animals, HORSES, CATTLE, SHEEP, DOGS, HENS and POULTRY, are cured by Humphreys' Veterinary Specifics, is as true as that people ride on railroads, and messages by telegraph, or sew with sewing machines. It is irrational to both, ball and bleed animals in order to cure them, as it is to take passage in a ship from New York to Albany. Used in the best stables and recommended by the U. S. Army Cavalry Officers.

500 PAGE BOOK on treatment and care of Domestic Animals, and stable chart mounted on rollers, sent free.

In use 30 years. The only successful remedy for Nervous Debility, Vital Weakness, and Prostration, from over-work or other causes. \$1 per vial, or 5 vials and large vial powder, for \$5. Sold by Druggists, or sent postpaid on receipt of price.

HUMPHREYS' MEDICINE CO., Corner William and John Sts., New York.

The Human Electrical Forces!

How They Control the Organs of the Body.

The electrical force of the human body, as the nerve fluid may be termed, is an especially attractive department of science, as it exerts so marked an influence on the health of the organs of the body. Nerve force is produced by the brain and conveyed by means of the nerves to the various organs of the body, thus supplying the latter with all that is necessary in sake their health. The pneumogastric nerve, as shown here, may be said to be the most important nerve of the body, as it supplies the heart, lungs, stomach, bowels, etc., with the nerve force necessary to keep them in a healthy condition. As will be seen by the cut the long nerve descending from the base of the brain and passing down the back of the neck is the pneumogastric, while the numerous little branches supply the heart, lungs and stomach with necessary vitality. When these branches become in any way disordered by irritation or exhaustion the nerve force which it supplies is lessened, thus causing the diminished supply are consequently weakened.

Physicians fail to recognize the importance of this fact, and treat the disease instead of the cause of the trouble. The noted specialist, Franklin Miles, M. D., has given the greater part of his life to the study of this subject, and the principal discoveries concerning it are due to his efforts. Dr. Miles' Researches in the animal and man brain and nerve force is prepared on the principle that all nerves and many other difficulties originate from disorders of the nerve centers. Its wonderful success in curing the disorders is testified to by thousands in every part of the land.

It cures sleeplessness, nervous prostration, dizziness, hysteria, sexual debility, St. Vitus dance, epilepsy, etc. It is free from opiate or dangerous drugs. It is sold on a positive guarantee by the druggists, or sent direct by the Dr. Miles Medical Co., Elkhorn, Ind., on receipt of price, \$1 per bottle, six bottles for \$5, express prepaid.

FOR THROAT AND LUNG

complaints, the best remedy is

ON THE WAY TO CHURCH.

There is one I know. I see her sometimes pass in the morning streets upon her way to mass; A calm, sweet woman, with unearthly eyes. Men turn to look at her, but never stop, Reading in those blue depths the death of hope, And a wise chastisement for thoughts unwise.

Pure is her brow, as of a marble saint; Her brown hair pencils it with ripples faint, There is no shadow on it and no light; Her cheeks are pale, like lilies in eclipse; Hardly a little redness on her lips.

Paints the sad smile where all the rest is white.

Tall is she and bent forward like a reed Which the wind toys with as she walks with speed;

Girl-like her limbs and virginal her waist; Of the world wonders there is none so sweet As is the summer lighting of her feet.

Speeding her onward like a fawn in haste.

What is her secret? All the world has tried To guess it. One I knew in guessing died And was no wiser for his mortal pain.

Each has turned sadder from the thankless quest

And gone back silent, even if he guessed, Knowing all answer would be counted vain.

I knew her once. I know her not today.

Our eyes meet sometimes, but hers turn away.

Quicker from mine than from the rest that look.

Her pale cheek quivers, a flush comes and goes,

As in the presence of a soul that knows,

And her hands tighten on her missal book.

Men have done evil, yet have won to heaven.

Lived in blood guiltiness, yet died forgiven.

May I not, too, one day win my grace?

Ah, nor the sacrifice of this worst sin

Outweighs all grace. I dare not enter in

Kneel, God's robber, near that angel face.

THE ORIGIN OF ANTHRACITE.

A Possible Solution of One of the Mysteries of Science.

The main difference between anthracite and bituminous coal is that the former is devoid of volatile matter. Heretofore the theory generally accepted to account for this difference was that presented half a century ago by Professor Rodgers while conducting the first geological survey of Pennsylvania. Observing that the anthracite beds lay in the eastern part of the state in close proximity to the Archean axis of elevation, he surmised that these coal beds had so to speak, been "cooled" upon the elevation of the Appalachian chain—that is, he supposed that the heat and pressure accompanying the Appalachian elevation, acting most vigorously near the axis, had distilled and removed the volatile matter of the coal bed nearest it.

To adjust the theory of increasing facts, Professor Lesley added the supposition that the heat involved in this theory was brought up by conduction when the superincumbent layers of rock were extremely thick, which have since been mainly removed by the erosive agencies which have been active over the region for millions of years. The inadequacy of these theories has led Professor J. J. Stevenson of the University of New York to propound another and simpler theory, which was ably defended by him at the recent meeting of the Geological Society of America.

He would account for the lack of volatile matter in anthracite coal by the simple fact that it had been longer exposed to that kind of decay which takes place in vegetable matter when immersed in water, and which consists chiefly in the loss of the hydrocarbons which constitute the volatile elements in bituminous coal. On this supposition the anthracite beds are those which were formed earliest in the swamps and lagoons of the carboniferous period and remained longest devoid of the covering of sedimentary deposits, which subsequently preserved them from further change. This theory is confirmed by the fact that there is no such strict relation of the anthracite beds to the Appalachian axis of elevation as Professor Rodgers had supposed and by many other considerations which Professor Stevenson is about to publish. This simple cause seems adequate to account for all the phenomena and probably solves one of the long standing mysteries of geological science.—Independent.

Anatole Lionnet promised to sing it the next evening and did so. He then spoke to the publisher about it, but the same objection was made. "Yes, it is charming, no doubt," said the publisher, "but it will not sell." However, if M. Lionnet will undertake to sing it for a few nights I will consent to publish it and give Gounod 100 francs for it." Gounod joyfully accepted the modest sum; it was the first he had earned.—London Globe.

Four Bits and No Kiss.

The following account of a ceremony which was performed in Tucker county, W. Va., is worth relating and will serve to show how solemn an affair the question of matrimony is considered to be in the infant protege of the Old Dominion.

"Do you take this woman, whose hand you're a-squeezin', to be your lawful wife in flush times and skin?"

"I reckon that's about the size of it, squire."

"Do you take this man you've jined fests with to be your pard through thick and thin?"

"Well, you're about right for once, old man."

"All right, then, kiss in court, an I reckon you're married about as tight as the law can jine you. I guess four bits will do, Bill, if I don't have to kiss the bride."—Cor. Washington News.

She Had to Give a Reason.

The other day I was told of a little girl who attended a distribution of prizes given by the Society for the Prevention of Cruelty to Animals. She had won, you must know, a book as a reward for writing the best essay on the subject given, and with the other successful children, was undergoing a vivere examination. "Well, my dear," said the gentleman who had given away the prizes, "can you tell me why it is cruel to dock horses' tails and trim dogs' ears?" "Because," answered the little girl, "what God had joined together let no man put asunder."—Leisure Hour.

Miss Knowles' Victory.

Miss Ella Knowles, who missed by a few votes being elected attorney general of Montana, was afterward appointed assistant attorney general. A few weeks ago she was sent to Washington on important business relating to Montana's school lands, which was pending in the interior department. About \$200,000 was involved in this litigation. Miss Knowles had to make a presentation of the state's claim before six heads of law divisions. Finally she got it before First Assistant Sims and secured a decision in favor of her state.

Paddington, a London district which contains 100,000 inhabitants, burns 30,000 tons of garbage a year in furnaces which furnish sufficient power to light all the streets of Paddington and reduce the cost of electric lights to all the house-holders in the district.

The first forks made in England were manufactured in 1608. Their use was ridiculed by the men of the time, who argued that the English race must be degenerating when a knife and a spoon were not sufficient for the table use.

In cleansing japanned goods never use hot water. Wet a cloth slightly in warm water and rub the article to be cleaned. Should any smear appear sprinkle with flour and wipe dry.

A man at Stamford, N. Y., has the watch Major Andre offered as a ransom to his captors. He has documents to prove that it is genuine.

Never sigh over what might have been, make best of what is. This bit of philosophy is valuable to the married man.

SAFE FROM HOG CHOLERA.

"HOG CHOLERA" is a great scourge among swine, especially in the South. It also insures very rapid growth of swine, and is superior for medicating our hogs for hog cholera. It costs less than \$1.00 for 100 lbs. of pigs, or one head of a hog.

It is a safe and effective remedy.

Buy the genuine, "GIVING TO THE WORLD," International Stock Food.

We OFFER \$1000 CASH PREMIUMS

to anyone raising the largest hog from an 822 pig.

No restrictions as to breed, food or feeding. Not restricted to International Stock Food. See our full particulars.—From our catalog.

WE PAY \$1000 CASH PREMIUMS

to anyone raising the largest hog from an 822 pig.
