

HOLD UP A CALIFORNIA TRAIN BUT GET NOTHING.

SCARED OFF BY ANOTHER TRAIN.

The Engineer and Fireman Compelled to Have the Messenger Open the Express Car-Passengers Fired at Who Looked Out of the Windows-Jump on the Engine and Make Their Escape.

STOCKTON, Cal., March 11.-The express train known as the European Mail was held up near Castle Switch, about four miles from here, at 10:20 o'clock last night, but the robbers got nothing and were forced to flee by the arrival of the Oregon express at the point a few minutes later.

As soon as possible the Oregon express came here and a large posse of officers left on it for the scene of the robbery.

When the robbers left they started away on the engine of the European Mail. This they soon abandoned and it rolled into Lodi half an hour later, going very slowly, with no one on board and registering but forty pounds of steam. George Andrews, the engineer of a freight train lying there, got aboard and stopped it. A stick of dynamite was found on the seat in the cab.

The story of the hold-up, as told by Engineer Engles of the mail train, is as follows: "A short distance south of Castle Switch myself and Fireman House were startled by a man who crawled over the tender and pointing a pistol at our heads, ordered us to stop the train. He was masked. I stopped the engine and the fellow then ordered us to get off, which we did. Two other masked men were standing on the ground waiting to receive us. They ordered us to walk back to the express car, the men telling me to instruct the messenger to open the door as they had dynamite and would blow the car up if the door was not opened. I told the messenger this and he opened the door and then shut it again after which he fired two shots at the robbers. A passenger stuck his head out of one of the windows and one of | Two Hundred Thousand Shoe Workmen the robbers fired at him. The men threatened again to blow the car to pieces with dynamite if it was not opened and the express pessenger then complied with their demands, the men got inside taking us with them and ransacking the car. All 'the money was in the big safe and they did not try to open it. They got nothing whatever. After satisfying themselves that there was nothing of value outside of the safe and that had been securely locked, they jumped out of the car and went ahead to the engine again, taking us with them. Reaching the engine the men uncoupled it from the train and firing some shots at the passenger cars to scare their occupants, I suppose, pulled the trottle and started toward Lodi. A brakeman was sent back to Stockton to flag the Oregon Express, which was soon to come along and we waited until the engine came from Lodi."

TRAMPS CAPTURE A TRAIN.

Fifty Disreputables Terrorize an East ern Freight Crew.

WILMINGTON, Del., March 11.-Last night a gang of about fifty tramps captured the Philadelphia, Wilming, ton and Baltimore freight train from Baltimore, just outside of Baltimore and at once began to abuse the trainmen. After the tramps had secured possession of the train they began quarreling among themselves and during one of their fights a man was thrown from the train and it is supposed fatally injured if not killed outright.

This morning the men were all sent to jail for long terms. Others will be arrested if they remain about here.

field in which I could enlarge my work, and I feel sense of relief amounting to exultation. Whereunto this work will grow I can not prophesy. It is inviting and promising beyond anything I have ever touched. The churches are the grandest institutions this world ever saw, and their pastors have no superiors this side of heaven; but there is a work churches, and to that work I join myself for a while, "Lest I build on an-

The church is a fortress, divinely built. Now, a fortress is for defense and for drill and for storing ammunition, but an army must sometimes be on the march far outside the fortress. In the campaign of conquering this world for Christ the time has come for an advance movement, for a "general engagement," for massing the troops, for an invasion of the enemy's country. Confident that the forts are well manned by the ablest ministry that ever blessed the church, I propose, with others, for a while to join the cavalry and move out and on for service in the open field.

In laying out the plan for his missionary tour, Paul, with more brain than any of his contemporaries or predecessors or successors, sought out towns and cities which had not yet been preached to. He goes to Corinth, a city mentioned for splendor and vice, and Jerusalem, where the priesthood and Sanhedrim were ready to leap with both feet upon the Christian religion. He feels he has a special work to do and he means to do it. What was the result? The grandest life of usefulness that man ever lived. We modern Christian workers are not apt to imitate Paul. We build on other people's foundations. If we erect a church we prefer to have it filled with families all of whom have been pious. Do we gather a Sunday

"No," say the doctors, standing there and fanning their patients, "we have three important cases here and we are attending to them, and when we are not positively busy with their wounds, it takes all our time to keep the flies off." In this awful battle of sin and sorrow, where millions have fallen on millions, do not let us spend all our time in taking care of a few people, and when the command comes: "Go into the world," say practically: "No, I can not go; I have here a few choice cases and tre multitudes to-day who have never | work. aad any Christian worker look them in

the eye and with earnestness in the accentuation say: "Come!" or they would long ago have been in the kingdom. My friends, religion is either a sham or a tremendous reality. If it be a sham, let us cease to have anything to do with Christian association. If it be a reality, then great populations are on their way to the bar of God unfitted for the ordeal, and what are we doing? In order to reach the multitude of out-

siders we must drop all technicalities out of our religion. When we talk to people about the hypostatic union and French encyclopedianism and Erastinianism and Complutensianism, we are as impolitic and little understood as if a physician should talk to an ordinary patient about the pericardium and intercostal muscle and scorbutic symptoms. Many of us come out of the theological seminaries so loaded up that

we take the first ten years to show our people how much we know and the next ten years to get our people to know as much as we know, and at last find that neither of us knows anything as we ought to know. Here are hundreds of thousands of sinning, struggling and

lying people who n ed to realize just one thing-that Jesus Christ came to save them, and will save them now. But we go into a profound and elaborate definition of what justification is, and after all the work there are not, outside of the learned professions, 5,000 people .n the United States who can tell what justification is. I will read you the defiaition:

"Justification is purely a forensic act, the act of a judge sitting in the forum, in which the Supreme Ruler and Judge, who is accountable to none and who alone knows the manner in which the ends of his universal government can best be obtained, reckons that which was done by the substitute, and not on account of anything done by them, but purely upon account of this gracious method of reckoning, grants them the full remission of their sins."

Comparatively little effort has as yet peen made to save that large class of persons in our midst called sceptics, and he who goes to work here will not be building upon another man's foundation. There is a great multitude of Red and green species of birds may them. They are afraid of us and our vary to yellow, but the utmost efforts of churches, for the reason we do not know how to treat them. One of this class met Christ, and hear with what ners attractive. So a church in this tenderness and pathos and beauty and success Christ dealt with him: "Thou shalt love the Lord thy God with all thy neart and with all thy soul and with all thy mind and with all thy strength. This is the first commandment, and the second is like to this, namely: Thou shalt love thy neighbor as thyself. There is no other commandment greater than this." And the scribe said to him: 'Well, Master, thou hast said the truth, for there is one God; and to love him with all the heart and all the understanding and all the soul and all the strength is more than whole burnt offerings and sacrifices." And when Jesus saw that he answered discreetly, he said unto him: "Thou art not far from the kingdom of God." So a sceptic was saved in one interview. But few Christion people treat sceptics in that way. Instead of taking hold of them with

clesiasticism.

When they grow up, if unreformed, they will outvote your children and they will govern your children. The whisky ring will hatch out other whisky rings, and grog shops will kill with their horrid stench public sobriety, unless the church of God rises up with outstretched arms and enfolds this dying population in her bosom. Public schools can not do it. Art galleries can not do it. Blackwell's Island can not do it. Alms houses can not do it. New York tombs can not do it. Sing Sing can not do it. People of God, wake up to your magnificent mission! You can I am busy keeping off the flies." There do it. Get somewhere, somehow, to

I have heard of what was called the "thundering legion." It was in 179, a part of the Roman army to which some Christians belonged, and their prayers, t was said, were answered by thunder and lightning and hail and tempest, which overthrew an invading army and saved the empire. -And I would to God that you could be so mighty in prayer and work that you would become a thundering legion, before which the forces of sin might be routed, and the gates of hell made to tremble. All aboard now on the Gospel ship! If you can not be a captain or a first mate, be a stoker, or a deck hand, or ready at command to climb the ratlines. Heave away now, lads! Shake out the reefs in the foretopsail! Come, O heavenly wind, and fill the canvas! Jesus aboard will assure our safety. Jesus on the sea will beckon us forward. Jesus on the shining shore will welcome us into harbor. "And so it came to pass that they all escaped safe to land."

ABOUT BLUE ROSES.

Sirius and Arcturus are Said to Have Changed Color.

well-known naturalist recently wrote: "We may have a yellow rose, but it is pretty well agreed that if we ever see a blue one it will be by a process of continuous variation and selection." By this process it is meant that if a blue rose is ever produced from a red variety, for instance, the change will not be a sudden one, a leap from one color to the other, but the result of a gradual progression through a series of steps leading regularly from red to olue, says the Youth's Companion.

In fact, it has been found that both lants and animals exhibit a tendency toward a definite succession of colors, and certain colors have been regarded as representing higher stages of evolution than others. The changes toward these "higher" colors are usually continuous and require a series of variations, while, on the other hand, instances of sudden reversion to "lower' colors are not uncommon

Red is regarded as a higher color, in this sense, than yellow. The yellow primrose sometimes varies to red, but the change is never sudden or discontinuous, because it is a change in the direction of progression. But from red to yellow the change sometimes occurs by a jump, so to speak, because it is going backward. The same thing seems to apply in the case of birds. breeders to produce red canaries from yellow ones have only resulted in an

The owner of an Irish water spaniel was out walking with him, when he crossed a frozen mill dam, and accidentally dropped his snuff box through a small crevice in the ice. The dog was greatly distressed at not being able to get the box, bz* was obliged to go home with its owner, who thought no more of the matter. Two months afterward when the frost had gone, he and the dog passed the same place. The dog paused opposite the spot where the box had disappeared, seemed to think intently for a minute, then plunged in, and returned to the bank with the snuff box in his mouth.

A Faithful Friend.

It is good for a man to have a friend who can say the right thing. When Tommers got so hard up that he had to take a job at laying gas pipe he was astonished to find his friend Brown lookng down at him in the trench one day. "This is not the first time I have seen

Aestheticism in Heat.

If once we come to know the charm that the open fire has to offer, and if once we realize its potency against many ills, we will surely insist upon its presence, let the inventors and the economists offer what they will. For during the long winter days, such as we recently have undergone, it makes the home so bright and cheery as to shut out even the thought of the dreary bleakness without. And when the spring opens, and even when the summer comes, it allows of just sufficient heat at eventide to chase away the dampness that is certain to be felt. It makes home a centre of warmth and inspiration. It chases away dull care. It invites the day-dreams that we all must love. It provokes imagination to play his jolliest pranks. It sends its influence forth and bids us hasten back that we may enjoy the good it has to offer. It acts as a magnet and draws the family close together. It promotes merry chat and harmless jest. It suggests good homely games, and the young folks seek it out. It becomes a centre of attraction, and brings good friends to share its light and warmth. It makes a house a home in very truth; and, withal, it does more toward producing that decorative effect that appeals to all æsthetic souls than does any other object to be obtained for the same, or even double, the essential

The fact is, this is a big world. When, in our school boy days, we learned the diameter and circumference of this planet, we did not learn half. It is the lati-BOONE, Iowa. March 11 .- The police | tude and longitude and diameter and circumference of want and woe and sin that no figures can calculate. This one spiritual continent of wretchedness reaches across all zones, and if I were called to give its geographical boundary I would say it is bounded on the north and south and east and west by the great heart of God's sympathy and love. Oh, it is a great world. Since six o'clock this morning at least \$0,000 have been born and all these multiplied populations are to be reached of the gospel. In England or in eastern American cities we are being much crowded and an acre of ground is of much value; but out west 500 acres is a small farm and 20,000 acres is no unusual possession. There is a vast field here and everywhere unoccupied, plenty of room more not building on another man's foundation. We need as churches to stop bombarding the old iron-clad sinners that have been proof against thirty years of Christian assault, and aim for the salvation of those who have never yet had one warm hearted and point blank invitation. There are churches whose buildings might be worth \$200,000, who get into sympathy with the great outside world and let them know that none are so broken-hearted or hardly bestead TOPEKA. At least 3,000,000 people in this cluster of seaboard cities, and not more than 200,000 in the churches. Again, there is a field of usefulness but little touched or occupied by those who are astray in their habits. All northern nations, like those of North America and England and Scotland, that is, in the coller climates, are devastated by alcoholism. They take the fire to keep up the warmth. In southern countries, like Arabia and Spain, the blood is so warm they are not tempted to fiery liquids. The great Roman armies never drank anything stronger than water tinged with vinegar, but under our northern climate the temptation to heating stimulants is most mighty and millions succumb. When a man's habits go wrong the church drops him, the social circle drops him, good influence drops him, we all drop him. Of all the men who get off the track, but few ever get on again. Near my summer residence there is a life saving station on the beach. There are all the ropes and rockets, the boats, the machinery for getting people off shipwrecks. One summer I saw there fifteen or twenty men who were breakfasting after having just escaped with their lives and nothing rore. Up and down our coasts are built these useful strucures, and the mariners know it, and they feel that if they are driven into the breakers, there will be apt from shore to come a rescue. The churches of God ought to be so many lifesaving stations, not so much to help those who are in smooth waters, but those who have been shipwrecked. Come, let us run out the life boats! And who will man them? We do not preach enough to such men; we have not enough faith in their release. Alas, if when they come to hear us, we are laboriously trying to show the difference between sublapsarianism and supralapsarianism, while they have a thousand vipers of remorse and despair coiling around and biting their immortal spirits. The church is not chiefly for goodish sort of men whose proclivities are all right, and who could get to heaven praying and singing in their own homes. It is on the beach to help the drowning. Those bad cases are the cases that God likes to take hold of. He can save a big steamer as well as a small sinner, and when a man calls earnestly to God for help ne will go out to deliver such a one. if it were necessary, God would come down from the sky, followed by all the artillery of heaven and port of State Treasurer Atherton for never so large ears of corn, never so Get one hundred such redeemed men TOPEKA, Kan., March 11. - The legal the month of February shows that big heads of wheat, he would remain in each of your churches, and nothing decided the cash balances on hand in the poor. "Certainly," was the reply. "What is a cigar?" asked O'Finnerty. "Why, tobacco, of course, done into a oll for smoking purposes."

"Well, then.you've made out a mighty veak case against me," exclaimed 0'Finnerty, "for the rolls that I was selling were made of cabbage leaves."

A Bank Failure.

AN INVESTIGATION DEMANDED.

A general banking business is done by the human system, because the blood deposits in its vaults whatever wealth we may gain from day to day. This wealth is laid up against " a rainy day " as a reserve fund -we're in a condition of healthy prosperity if we have laid away sufficient capital to draw upon in the hour of our greatest need. There is danger in getting thin, because it's a sign of letting down in health. To gain in blood is nearly always to gain in whole-some flesh. The odds are in favor of the germs of consumption, grip, or pneumonia, if our liver be inactive and our blood impure, or if our flesh be reduced below a healthy standard. What is required is an increase in our germ-fighting strength. Dr. Pierce's Golden Medical Discovery enriches the blood and makes it wholesome, stops the waste of tissue and at the same time builds up the strength. A medicine which will rid the blood of its poisons, cleanse and invigorate the great organs of the body, vitalize the system, thrill the whole being with new energy and make permanent work of it, is surely a remedy of great value. But when we make a positive statement that e8 per cent. of all cases of consumption can, if taken in the early stages of the disease, be CURED with the "Discovery," it seems like a bold assertion. All Dr. Pierce asks is that you make a thorough investigation and satisfy yourself of the truth of his assertion. By sending to the World's Dispensary Medical Association, Buffalo, N. Y., vou can get a free book with the names, addresses and photographs of a large number of those cured of throat, bronchial and lung diseases, as well as of skin and scrofulous affections by the "Golden Medical Discovery." They also publish a book of 160 pages, being a medical treatise on consumption, bronchitis, asthma, catarrh, which will be mailed on receipt of address and six cents in stamps.
