SHARP POINTS.

People never tell the exact truth. Modesty will earn a man more than

ability. As a rule, when a story is funny, it is not true.

A picnic is not a success unless there

is pie to throw away. Most people just drag along until it is time for them to die. A laugh is an awfully good bluff to

make when troubles appear. A man never knows what is coming until it gets right on to him. There is one thing to the credit of old

maids; they accumulate no kin. When a man stops smoking, and begins again, he feels mighty sheepish. A man with a future isn't as interest-

ing to people as a woman with a past If you ask a hoy how his boil is, he will take off the bandage and show you. Some people imarine that as soon as they get married, they must kiss in public.

If a man expects to amount to anything, he must accomplish it in spite of hard luck.

Marrying men are beginning to remark that women have too much idle time on their hands.

There are lots of men who are pretty in society, but who are as absolutely uscless as dried currants.

No woman should give way to grief; let her keep her hair frizzed, and everything may come around all right. Nearly all the women recite these

days. They will simply have to quit it; the men are shy enough as it is. Much as people like to hear secrets they have the greatest admiration for

the friends who have never told them any. We have noticed that when a man is approached about advertising, he says he will "think about it," or "see you

again." The people should remember when cating, that Death keeps his white horse ready with the harness on in this | shall discriminate in favor of American weather.

JETSAM.

A new locomotive near Wishington made thirty-five miles in thirty-three minutes, and for a part of the distance ran at the rate of 102 miles an hour.

The map on the north wall of the Broad street station of the Pennsylvania railroad in Philadelphia is fifteen feet wide and 126 feet long, and is said to be the largest map in the world.

It is estimated that 30 per cent of the iron manufactured by Tennessee is sold outside of the southern states. It is said to be the favorite iron with pipe, plow and stove makers in the east and north.

The total wheat crop of New Zealand for this year is 3,613,000 bushels, or 1,000,000 less than for the previous year. It is estimated that the colony will have to import 500,000 bushels to

supply it own requirements. Of the four nationalities making up the population of Great Britain and Ireland, the Scotch are the heaviest men, the average weight being: Scotch, 175.3 pounds; Welsh, 168.3 pounds; English, 155 pounds; Irish, 154.1 pounds.

Working for the good of otheers indirectly brings about our own good.

There is no true greatness except the greatness of usefulness.

The despised milkweed can be used to advantage. Its seed yields a the oil. A perfect jam-that made of plums.

KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all dre ;gists in 50c and \$i bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

GRAND OLD PARTY

THE PROTECTIVE IDEA IS THE SOUND ONE.

If We Furchase Low-Priced Foreign Goods of Course Our Gold Will Con-Outward Some Se-

The Bounty Monoolists.

Representatives of the Atlantic coast shipping interests met in Philadelphia July 3, to take action toward "securing equitable protection, through national legislation, for agriculture and shipping." Among the resolutions passed was the following:

"Resolved, That since neither of the two great unprotected industries can derive any benefit from a tariff on imports, we call upon Congress to equalize the protection system by extending to agricultural staples and American shipping in the foreign trade that just measure of protection to which they are entitled, as long as protection is the controlling and public policy of this nation, and that this be done by an export bounty on the staples of agriculture and to American shipping in the foreign trade, either by a bounty on tonnage or a differential duty which and against foreign ships, all to the end that a restoration may be brought about of our merchant marine and farmers of the nation may not be driven into bankruptcy and ruin by the competition of the cheap land and

labor countries of the world." This resolution is incorrect. Both the agricultural and shipping industries can derive benefit from a tariff on imports. It was by a tariff on imports, a The incomes from the London daily discriminating tariff, that the Amerprosperous. By a similar tariff on imports, a discriminating tariff, American shipping can again be restored. And we are heartily in favor of the renewal of this policy, which is so

simple and thoroughly effective. To say that the agricultural industries of the country derive no benefit from a tariff on imports is equally untrue. What has been the experience of farmers who grow wool or hops for instance? The necessity for a protective tariff on foreign farm products will become more and more apparent with each coming year as the farm supplies of India, Austria, South America and Russia increase in quantity and seek

markets for their surplus. We believe in giving both to agriculture and to shipping "that just measure of protection to which they are enso to the exclusion of the products of our forests, our mines or our factories, all of which were totally ignored by the shipping and agricultural representatives at Philadelphia.

Our farm products are the finest in the world, as are the products of our shipyards, the manufactures of our shipbuilders. Mr. Charles H. Cramp, the great ship manufacturer of Philadelphia, does not believe it would be a good thing if the United States were a manufacturing country alone. We quite agree with Mr. Cramp and we are glad that we are able to produce almost every article of consumption that is a necessity and a comfort to our daily life.

As Mr. Cramp well knows, we can build in this country steamships second to none in the world. It is equally true of our sailing vessels. The idea that we cannot build iron vessels is rubbish. We have the iron and we have the steel in abundance and of the best quality. It was not so much the superiority of the iron and steel vessels that caused the English shipyards to give up building wooden vessels as it was their inability to secure an abundant supply of the proper kind of timber needed in shipbuilding at as low a cost as they could procure the iron and steel. The English shipbuilders were looking for cheapness in construction. steel. Without protection to our iron Economist. and steel interests Mr. Cramp would not today be able to manufacture the capable.-American Economist.

Twenty seven Wise Men of Manchester.

us through a valued English contemporary: Prior to the adoption of the Cobden idea in England the silk manufacturers ufactories upon the passage of the Gorof that country were protected and fos- man-Wilson tariff bill is hard for the tered by fairly adequate duties imposed democracy to explain to the satisfacupon foreign imports, which duties tion of American workingmen .- Salt were, about 1850, made the subject of a Lake Tribune. memorial by twenty-seven of the principal manufacturers of Manchester to Disraeli (then Chancellor of the Ex- Cleveland, but it also owes a great deal chequer), who, with the strange blind- more of a national debt through its ness of the frogs who invited King misguided infatuation for the same gen-Stork to come and reign over them, tleman .- St. Louis Star-Sayings.

prayed that the duty on foreign manufactured silks might be at once abolished. They complained in their memorial that their trade was in a depressed condition and their workpeople not fully employed; regrettable facts which they ascribed to the limited nature of the foreign demand for their goods, "and that this limitation is attributable to the protective duty imposed on foreign silks imported into this country, the effect of such duty being to create an impression in the markets of the world that England is unable to compete with the Continental manufacturer in the production of silk goods, and thus to throw the export their French and Swiss competitors."

The frogs were hotly impatient to be ruled by King Stork. The twenty-seven Manchester manufacturers were no less impatient for their doom. They begged in the same memorial that the duty might "be not partially and gradually but totally and immediately repealed, and thus to proclaim to the world that the Manchester silk manufacturer denounced the so-called protection and every aid a government can give; that he is prepared to depend solely on his own merits, and that he avows himself capable of taking a higher position in the race of competition, unfettered by protection, than he has hitherto attained under its fostering care."

Quos Deus vult perdure, prius dementat. This memorial was presented in 1852; the duty was totally repealed in 1860, and one of the most remarkable results was that every one of twentyseven firms was extinguished, not one being left to tell the horrid tale or to draw a parallel between the fate of the malcontent manufacturers and that of the fretful frogs.-The American Silk

The Tariff on Barley.

In 1832 a duty of 15 per cent ad valorem was placed upon foreign barley, and it was fixed at 20 cents a bushel in 1842. It was subsequently lowered to 10 cents, but advanced to 30 cents in 1890, and the result was that our that the independent land-owning imports of barley fell off from 10,000,000 bushels to less than 2,000,000 bushels. The 30 per cent rate given barley in 1894 is only 14 cents specific. The production of barley in the United States increased nearly 118 per cent in the past twenty years, from 32,000,000 bushels in 1873 to 69,869,000 bushels in

> The result has clearly proven that our protective policy in favor of this important agricultural product was wise in the interests of the farmers who were annually increasing the domestic output. By increasing the duty on barley in 1890 we lost only about half a million of revenue, in return for which our farmers increased their products 15,000,000 bushels over the average for eight years. This increase in one year was worth at least \$6,200,000, making the loss of revenue of trifling comparative importance.

The tendency was to draw farmers away from wheat and corn, just as the raising of beets for sugar would draw them away from cotton in Kentucky, Georgia, North and South Carolina and Alabama. The gain in domestic barley product, since the extra encouragement given it in 1890, ought to have titled," but we do not believe in doing guarded it. Was the duty lowered in 1894 in the interest of Russian and Canadian producers? It certainly was a piece of legislation that the farmers cannot regard with favor.

This subject was of concern to those who framed our first tariff law in 1789. At that time, when the subject of placing a proper rate of duty on ale, beer and porter was under consideration, Mr. Fitzsimmons thought the manufacture of those liquors "highly deserving of encouragement," as calculated to improve the morals of the people as fostering home manufacture. Mr. Lawrence favored a duty on them high enough to give a decided preference to American beer, as it "would tend to encourage agriculture, because the malt and hops consumed in their manufacture were the produce of our own soil."

Mr. Sinnickson favored a protective duty in order to increase the manufacture and lessen the price, and inasmuch as the raw material was produced in this country, the agricultural interests would be advanced. Mr. Madison moved a duty of 8 cents on beer. He did not think this would give a monopoly, but hoped it would be such encouragement as to induce the manufacture to take deep root in this country, in which case it would produce the collateral good (agriculture) hinted at by Mr. Sinnickson-the increase of barley and hops. Not a word was said That was the general reason why they about revenue from agricultural prodabandoned wooden ships and gave the ucts. That was never a consideration preference to those built of iron and with the true democracy .- American

The country may be in debt to Mr.

AMERICAN SCHOOLS.

Fruits of Their Work Compared With Foreigh Countries.

Colonel Robert G. Ingersoll gave utterance to a few striking educational truths in a recent address delivered before the surviving soldiers of his regi ment at Elmwood, Ill. He said:

"We spend more for schools per head than any nation in the world. Great Britain spends \$1.30 per head on the common schools; France spends 80 cents; Austria, 30 cents; Germany, 50 cents; Italy, 25 cents, and the United states over \$2.50. I tell you the school house is the fortress of liberty. Every school house is an arsenal, filled with weapons and ammunition to destroy trade almost entirely into the hands of the monsters of ignorance and fear. As I have said ten thousand times, the school house is my cathedral. The teacher is my preacher. Eighty-seven per cent of all the people of the United States over ten years of age can read and write. There is no parallel for that in the history of the wide world. Over 42,000,000 of educated citizens, to whom are open all the treasures of literature. Forty-two millions of people, able to read and write! I say, there is no parallel for this. The nations of antiquity were as ignorant as dirt when compared with this great republic of ours. There is no nation in the world that can show a record like ours. We ought to be proud of it. We ought to build more schools, and build them better. Our teachers ought to be paid more, and everything ought to be taught in the public schools that is worth knowing.

"I believe that the children of the republic, no matter whether their fathers are rich or poor, ought to be allowed to drink at the fountain of education, and it does not cost more to teach everything in the free schools than it does to teach reading, writing and ciphering.

"Have we kept up in other ways? The postoffice tells a wonderful story. In Switzerland, going through the postoffice in each year, are letters, etc., in the proportion of 74 to each inhabitant. In England the number is 60, in Germany 53; in France, 39; in Austria, 24; in Italy, 16, and in the United States, our own home, 110. Think of it. In Italy only 25 cents paid per head for the support of public schools, and only sixteen letters. And this is the place where God's agent lives. would rather have one good school master than two such agents."

Small Fry Swindlers. Some of the meanest of these are they who seek to trade upon and make capital out of the reputation of the greatest of American tonics, Hostetter's Stomach Bitters, by imi-tating its outward guise. Reputable druggists, however, will never foist upon you as genuine spurious imitations of or substitute for this sovereign remedy for ma aria, rheumatism. dyspessia, consumption, liver complaint and nervousness. Demand, and if the dealer be honest, you will get the gen uine article.

Other Victims Came Earlier. The occasional contributor walked into the office of the editor and bowed

to that dignified but busy personage "I would like to see the proofreaderr," he said. "I have a trifling affair

to adjust with him. "Very sorry," the editor replied, 'but several other gentlemen have applied ahead of you for the privilege of shooting the proofreader."-Chicago Times-Herald.

Paved With Molasses.

Perhaps the oddest pavement ever laid is one just completed at Chino, Cal. It is made mostly of molasses, and if it proves all of the success it is claimed to be, it may point a way for the sugar planters of the South profitably to dispose of the millions of gallons of useless molasses which they are said to have on hand. The molasses used is a refused product, hitherto believed to be of no value. It is mixed with a certain kind of sand to about the consistency of asphalt and laid like asphalt pavement. The composition dries quickly and becomes quite hard, and remains so. The peculiar point of it is that the sun only makes it drier and harder, instead of softening it, as might be expected. A block of the composition several feet long, a foot wide and one inch thick was submitted to severe tests and stood them well.

No Filigree Work.

Dean Hole tells of an old-fashioned cathedral verger, "lord of the aisles," who one noon found a pious visitor on his knees in the sacred building. The verger hastened up to him and said, in a tone of indignant excitement, "The services in this cathedral are at 10 in the morning and at 4 in the afternoon. and we don't have no fancy prayers."-

Tongue and Doctor Got a Rest.

"My doctor," said a somewhat voluble lady, "was writing me a prescription yesterday. I generally ask him all sorts of questions while he is writing them. Yesterday he examined me and sat down to write something. I kept talking. Suddenly he looked up and said: 'How has your system been?' Hold out your tongue.' I put out that member and he began to write. He wrote and I held out my tongue, and when he got through he said: 'That will do.' 'But,' said I, 'you haven't looked at it.' 'No,' said he, 'I didn't care to. I only wanted to keep it still while I wrote the prescription."

Had to Draw the Line.

Poole, the tailor, was an accommodating gentleman, and was often invited to the houses of "the great." When staying with a certain nobleman, he was asked one morning by his host what he thought of the party who had assembled the night before. "Why. very pleasant indeed, your grace, but perhaps a little mixed." "Hang it all, l'oole!" responded the jovial peer, "I couldn't have all tailors!"

The man is very poor who can put his riches in an iron safe.
