WASHINGTON, Sept. 23.-The easy assurance and confidence of the treasury officials that there will not be a bond issue and that the treasury gold reserve will not again be seriously depleted is explained by a prominent official, who says that through the good ties in elaborate displays, and all were offices of the bond syndicate, promises so good, so full and complete, that it have been secured from bankers in the principal cities of the country that in case of necessity they can be called upon to place up to \$30,000,000 of gold in the treasury in exchange for legal tender. This important matter has been quietly negotiated by Messrs. Belmont and Morgan during the last

fifteen days. The reasons which have led to the action are varied, but all tend to the same end. On the part of the administration it is recognized as good politics to avoid another bond issue and throw the responsibility and necessity for remedial financial legislation upon ful ever held, and if there was any- the incoming congress. NO CUBAN RECOGNITION.

The United States Unlikely to Take Any Positive Action at Present.

WASHINGTON, Sept. 18 .- Save vague newspaper reports, nothing is known at the state department of the intenformal application for such recognition by the United States has been made. It is not perceived here how the insurgents can reap any substan-tial advantages at this time for such recognition. The only comfort that they would derive would be from the moral effect of an assent by an independent power to the proposition that hey had assumed statehood.

As far as the United States is conerned, it took such a pronounced stand in the case of the late Brazilian insurrection that it could scarcely recognize the insurgents in the case of Cuba at present without a complete reversal of its position. It has held that, to entitle them to recognition, insurgents must set up a seat of government and maintain it; that they must issue money, and must possess a navy to make effectual any blockade they wish to establish-in short, that they must have an actual defacto government. The state department is not informed that any of these requirements have been met by the Cubans.

Warner, professor of economies and social science in the Leland Stanford university of California, and read by John N. Dryden of Kearney, Neb., created a sensation. "If the state itself is under the influence of criminals," wrote Mr. Warner, "how can it hope to reform criminals? Setting a thief to catch a thief was an old-time doctrine, but the plan of setting a thief to reform a thief has never yet been defended. The representatives of the state with which criminals are most frequently brought into contact are policemen, police justices, sheriffs, sheriffs' deputies and others only a shade-if at all-better than the criminals themselves. The hope for the cure of criminals largely lies in curative treatment in the early stages. Petty offenders and those on the verge of criminality in the large cities seldom or never get beyond this line of guards, and live more or less in their presence. The police to them represent the state."

the American Book Company. A dispatch from Norfolk, Va., says: The American Book company of New York has just gained a signal victory in the courts of Virginia and has received an absolute and complete vindication after a long and exhaustive trial by special jury in the Circuit court of this city. The Pilot newspaper of this city, upon the awarding of the contract for school books to the American Book company, printed a long article written and prepared by R. E. Byrd, an agent and attorney for Ginn & Co., of New York, in which it was charged that the state superintendent had been bribed by the American Book company. The Pilot was immediately sued for libel, and, after a five weeks' trial, which created an immense amount of interest throughout the state, a verdict for punitive damages was recently awarded, and the jury found that the statements made were false and a deliberate libel. Not only so, but the company, upon unimpeachable evidence, was proved to have dealt honorably and uprightly in every particular in their negotiations with the state officials. It was further proved at the trial that no better terms had been made with any other state for school beo's. In fact, the attorney-general of Virginia stated that the American Book company 'seemed to throw open their whole business to us,' and after full and complete examination of all the original contracts made with the various states he expressed himself as absolutely satisfied that the prices were the same in all cases and that no discrimination whatever had been made against the state of Virginia. Furthermore he mentioned that none of the statements of the American Book company had been accepted until every one of them had been absolutely verified by direct reference to the governors of some fifteen states, with whom contracts had been made. This proved conclusivelythat the representations of the American Book company were correct in toto. This celebrated case has thus ended in a complete triumph in every respect for the American Book company, and has shown in clear contrast the clean and business-like methods in which they carry on their great industry as compared with the attempted use of political pulls and misstatements by their opponents."—Chi-
