Nebraska has 5,300.35 miles of single track in operation by its railroads, an increase of 3,477.24 miles in ten years. We wonder if the next ten years will show as great an increase.

Four boys wrecked a fast mail train on the New York Central, lately, near Rome, New York. Too much yellow backed novel reading is the cause assigned. They intended to rob the dead and injured.

The new double-deck railway and highway bridge across the Mississippi river at Rock Island is now in course of construction. The U. S. government and the C., R. I. & P. railway are building it jointly to replace the present single track structure.

Mr. Westinghouse has communicated to Pennsylvania railroad officials preliminary plans by which he believes it possible to reduce the 5,000,000 tons of coal now used annually on their lines east of Pittsburg to about 600,000 tons, at a saving of $5,000,000 a year. The plan involves the equipment of the road with electrical apparatus, used in connection with gas engines.

Mr. Albert Johnson, a locomotive engineer who ran the first locomotive used on the Raleigh & Gaston, one of the divisions of the Seaboard Air Line, over fifty years ago, is at the Atlanta exposition in charge of the model of the "Tornado", the engine used in making the initial trip on the road. Mr. Johnson has been pensioned by the directors of the road. He is now over 90 years of age.

At Altoona, Penn., recently, Henry Cresswell, a yard conductor, boarded a runaway engine, which was making about 25 miles per hour and stopped it in season to prevent a wreck, although he was dragged for a considerable distance before he was able to get into the cab. The general superintendent sent him a letter of commendation with a check for $50. The engine had started several miles up the hill while the crew was off looking at a wreck.

Paul Morton, formerly general freight agent of the Burlington and at present president of the Colorado Coal, Iron and Fuel Co., has been elected third vice president of the Santa Fe; E. P.
