WHEN Turk meets Greek then comes the foot race.

THE prophets forecast a bountiful harvest from the great spring floods. May they not be false prophets.

SO FAR in the Graeco-Turkish squabble the Lord seems to be on the side of the stronger battalion, if He has anything at all to do with such work.

THE condition of the farmers in the Missouri and Mississippi valleys is anything but reassuring. The prospects are that many valuable acres will not be seeded, this year; and if at all very late in the season. The cry comes up from all that section about the lateness and wetness of the season.

THE dedication of the splendid mausoleum in Riverside park, New York, wherein lie the remains of America's greatest soldier, Ulysses S. Grant, this week, was one of the most imposing pageants ever witnessed in this country. The tomb and the impressive manner of its formal dedication are worthy the memory of the great general.

THE board of fire and police commissioners of Lincoln have undertaken a large, but righteous job; they are insisting upon the Slocumb law being observed, and have notified all saloonmen to remove all chairs, card tables or beer tables, wine rooms or partitions and to and to keep their curtains up four feet from the bottom.

THE new factory of the Wisconsin Beet Sugar company at Menomonee Falls was considerably delayed in construction by various causes, but it has finally begun turning out the finished product. It was found that the beets which were stored in pits all winter against the completion of the factory came out in the spring in almost perfect condition. Next fall the factory will begin a campaign as soon as the beets are ready. Then by storing all the crop that cannot be handled at once it will be possible to continue in operation until the beets are all worked up. The farmers in the vicinity of Menomonee Falls will find a ready market for all the beets they can raise for many years.—Journal.

SECRETARY FURNAS has issued a circular correcting or intending to remove erroneous impressions about the "State Fair Bulletin", held by some of the Nebraska press. He states that the Bulletin is not a source of expense to the state board of agriculture, but is simply an individual enterprise, obtaining its revenue from advertisements, and transported free by the railroads. Also, that the Bulletin has been found most advantageous to the Nebraska as well as similar publications have been to other state fairs, and concludes with the statement that he believes the management is entirely excusable in using so valuable a gratuitous medium, and hopes to have the hearty cooperation of the Nebraska press in the future as in the past. And we see no good and sufficient reason why the Governor shall not have it.

Now that the assessor has been around again one is reminded of the fact that the farmer bears more than his share of taxation, all his property being in sight. In the majority of cases he has no desire to hide any of it, but a squint at the assessor's book reveals a state of absent mindedness that's more than amusing.

As a great deal of corn, last year, was planted late and failed to ripen, there is a tendency everywhere to plant very early, this spring. This may not prove to be the best, for last year's conditions may not be repeated. But few people have any faith in the moon but prefer to wait until the soil has attained a certain degree of temperature before any planting is done.

No one has a patent on farming either good or bad. All that he does is out in plain view, for every passerby to see and talk about. The farmer cannot take his fields into the house or conceal them back of the barn, and odd as it may seem the writer derives much pleasure from the comments of the many who go back and forth and in loud voices exchange ideas as to how this or that should be done. A certain patch of rye which looks well for so early in the season has been a thorn in the side as it were of more than a few, and one day not long ago as a train of hog wagons from Frontier county hurried by a fat man in the lead was heard to call to some one how well a certain batch of shoats at home would do on that rye and he'd be durned if he wouldn't drive 'em down if it wasn't quite so far.
