

A curious indication of an anomalous state of affairs in athletics at the university of Illinois is seen in the fact that, while President Draper has put himself on record as emphatically in favor of collegiate and intercollegiate athletics, and while the university authorities officially that "much attention is paid to athletics," there, the young men recently debated in one of their debating societies the question: "Resolved, That foot ball should be prohibited at the university of Illinois." The question, after a thorough treatment, was decided in the affirmative.

It is said that there are three times as many teachers employed in the Sunday schools in Massachusetts as are employed in the public schools in that state, and the Congregationalist says that Sunday school teaching has reached a stage of development when teachers, in addition to piety, must have mental equipment.

Of the candidates for the British army who fail to pass the tests four out of five are rejected because of defective vision. The "eyesight" test consists of being able to count correctly with both eyes, as well as each eye separately, a number of small black dots exhibited on a card ten feet from the candidate.

In speaking of the late Dean Vaughan of Llandaff, the World of London, says: "Mrs. Vaughan is probably the only person now living who could disclose the number of bishops which her husband refused between 1855 and 1863. Lord Palmerston is said to have at one time offered Dr. Vaughan every see which became vacant, and the queen and the prince consort, were most anxious that he should accept a bishopric, and so also were the divines of such very different church views as Archbishops Sumner, Longley and Tait, Bishops Wilberforce, Lonsdale and Hamilton, and Deans Milman, Wellesley and Stanley."

Many accidents caused by hot crimping-iron have been reported but none has been more strange and serious than that which occurred to Mrs. Pool, of Plainfield, N. J., a few days ago. Mrs. Pool was curling her hair, when the hot iron slipped and struck the center of her left eye. Cold water was at once applied, and considerable relief was had for a time. Later, however, the eye pained so badly that Mrs. Pool fainted. The next day the right eye was affected and the attending oculist now says that it is likely the sight of both will be lost.

Says the Portland (Me.) Express: "The sight of a young man going to school these mornings with his books under one arm and a big bull dog pipe projecting from his mouth is one of end-of-the-century incidents that teach people that the youth of today is somewhat different from the one of 'ye olden times.' One would think so; but it is unfair to the youth of today to take the urchin mentioned as a sample. There were boys who were no honor to their friends even in the good old times."

LENGTH OF A THOUGHT.

Surprising Results of Experiments Made by a Noted British Scientist.

How long does it take a man to think? Professor Richet, at the recent meeting of the British Association, gave the results of his investigations into this subject. He found that by mentally running up the notes of the musical scale for one or more octaves and then dividing the total time by the number of notes thought of, the time taken for each note was one-eleventh of a second. There are various ways of arriving at conclusions as to the amount of time necessary for realizing any physical sensation or mental impression. If the skin be touched repeatedly with light blows from a small hammer a person may, according to Professor Richet, distinguish the fact that the blows are separate and not continuous pressure when they follow one another as frequently as 1,000 a second. The smallest intervals of sound can be much better distinguished with one ear than with both. Thus the separateness of the clicks of a revolving toothed wheel was noted by one observer when they did not exceed sixty to the second, but using both ears he could not distinguish them when they occurred oftener than fifteen times a second.

The sharp sound of the electric spark of an induction coil was distinguished with one ear when the rate was as high as 500 to the second. Sight is much less keen than hearing in distinguishing differences. If a disc half white and half black be revolved, it will appear gray when its revolutions exceed twenty-four per second. It has been found that we can hear far more rapidly than we can count, so that if a clock-clicking movement runs faster than ten to the second we can count four clicks, while with twenty to the second we can only count two of them.

The Birds' Balance of Power.

In a recent lecture Prof. Wilmer Stone of Philadelphia cited many facts to show that birds are nature's great check on the excess of insects, and that they keep the balance between plants and insect life. Ten thousand caterpillars, it has been estimated, could destroy every blade of grass on an acre of cultivated ground. In thirty days from the time it is hatched an ordinary caterpillar increases 10,000 times in bulk, and the food it lives and grows on is vegetable. The insect population of a single cherry tree infested with aphides was calculated by a prominent entomologist at no less than 12,000,000! The bird population of cultivated districts has been estimated at from 700 to 1,000 per square mile. This is small compared with the number of insects, yet as each bird consumes hundreds of insects every day the latter are prevented from becoming the scourge they would be but for their feathered enemies.

Use for Old Gold.

One of the most sensible "fads" among the girls just now is to save up all their old jewelry, old gold trinkets which have the tops worn off, gold fob chains, gold bracelets, and pins, and even necklaces, and take them to some reliable jeweler, who will either melt them down and make what she wants out of them, or else will exchange them, allowing her for the weight of the gold. One girl made a collection for several years of broken bits of jewelry and, with some of her grandmother's added to them, sold them to her own jeweler and now is the happy possessor of a beautiful pearl necklace which she got in exchange.—Harper's Bazar.

The relative size of the earth as compared with the sun is, approximately, that of a grain of sand to an orange.

The psalter of Spain is supposed to have been introduced into that country by the Moors. It is still in common use among the peasants.

The eye of the vulture is so constructed that it is a high power telescope, enabling the bird to see objects at an almost incredible distance.

In China government appointments are determined by the literary attainment of the applicants, and numerous instances are known of men spending many years in preparing for the government examination.

The number of miners employed in gold mining in New South Wales during 1896 was 12,069 in reefing, 9,482 Europeans and 710 Chinese in alluvial working, making a total of 22,257 men, an increase of 773 on the number so employed during 1895.

An English paper tells a story of the Rev. Mr. Watkinson, a Wesleyan preacher. Some time ago he was staying with a good woman who was yearning for the good old times and mourning the degeneracy of modern days and customs. The Wesleyan ministers of the early part of this century, she said, rose early, and dear Mr. Wesley was in his study at 4 o'clock in the morning. "It is not so now," she said; "were Mrs. Watkinson anything like Mrs. Wesley I should be up at 2 o'clock."

M. Mounet-Sully, the famous tragedian of Paris, is having built for himself a splendid house near Bergero. The construction is to be of mingled Roman and Byzantine character architecturally, and is described as a veritable palace. The country around is smiling and reposeful. The actor intends to dwell in the palace permanently when he retires from the stage. He is a native of the Perigord district, and wants to end his days near the spot where he was born, and far from the tumult of Paris.

Paris has, apart from two places where paupers can spend the night, fourteen asylums for the homeless, which last year lodged 144,037 persons, of whom 15,557 were women and 2,665 children. Among the lodgers were 246 professors and teachers, 18 students, 5 authors, 3 journalists, 129 actors and singers, 20 musicians and 16 music teachers.

Railroad Economy.

The Baltimore and Ohio South Western Railway has been experimenting with electric motors on turn-tables. Turning locomotives at divisional points and terminals is a service of much annoyance and no little expense to railroad companies. It generally takes four men to turn a locomotive, and while they are doing so their regular work is abandoned.

Experiments were made with an electric motor on the 60-foot turntable at Chillicothe with such success that the Park Street turntable in Cincinnati was similarly equipped. The result has been rather astonishing in the matter of expense. The current was purchased from the power plant, and it cost on an average of less than one-half a cent for each time the table was turned. When this same table was operated by hand it cost 12 cents for each engine. The yearly saving is about \$709.

A parcel containing flowers, without sufficient postage attached, was deposited in the Battle Creek, Mich., postoffice the other day. Law and custom demanded that it be sent to the dead-letter office, but the clerks surmised that the flowers were intended for a funeral and took up a collection among themselves so that the parcel was sent on its way without delay. There was no clew as to the identity of the person who mailed it, and it was a clear case of casting their bread upon the waters by the postal clerks, even if it did cost them but a few cents at the most.

Speaking of the last achievement in India of the "gallant Gordons, Black and White" says: "Not the least of the splendid anecdotes with which the Gordons have enriched military history comes to their fellow countrymen this morning, and the name of the piper who, shot through both feet, sat and played his friends on to victory, will long be a cherished memory. Let your boys hear that story; they will be the better for it."

Their Marvelous CURE BY "5 DROPS"

RHEUMATISM, NEURALGIA, CATARRH, ASTHMA, LA GRIPPE

"5 DROPS" is the most concentrated and powerful specific known. Free from opiates and perfectly harmless. Relief is usually felt the very first night. We have letters of grateful praise from thousands who have been cured by "5 DROPS," and who recommend sufferers from Rheumatism and kindred diseases to use it. Gentlemen: I write to let you know that your medicine has in my case proven all you claim for it, and more. For it did for me what no other medicine had done before. I could not move without help, and the doctors made fun of me for sending to you for medicine. They said I was past medicine help, but I have been three months enjoying as good health as ever I did in my life. Enclosed herewith find one dollar for which please send me another bottle of "5 DROPS," for I know of lots of people that suffer with Rheumatism, and I wish to try this on the worst of them, and perhaps they will believe me. FRANK COPPLAND, Needham, Wis., Oct. 12, 1897.

For Forty-Two Years. Gentlemen: I feel it my duty to let you know what "5 DROPS" has done for me. I have had Asthma for forty-two years and Hay Fever for fifteen years. I do not know how long I suffered with Catarrh, but I think about twenty years. Towards the end of July I began taking "5 DROPS." When I had used about a week the Asthma began to leave me and in two weeks it was gone. I am sure "5 DROPS" through the help of God did cure me, for I took no other medicine in that time. I have not had the Hay Fever since I commenced taking the "5 DROPS," and I am in good hopes that with the help of the Inhaler and Special Preparation, it will also cure my Catarrh. SWANSON RHEUMATIC CURE CO., Oct. 29, 1897.

As a positive cure for Rheumatism, Sciatica, Neuralgia, Dyspepsia, Backache, Asthma, Hay Fever, Catarrh, Sleeplessness, Nervousness, Nervous and Neuritic Headaches, Heart Weakness, Toothache, Earache, Croup, Swelling, La Grippe, Malaria, Creeping Numbness, etc., etc. "5 DROPS" has never been equalled.

"5 DROPS" taken but once a day is a dose of this great remedy and to enable all sufferers to make 100,000 sample bottles, 25c each, prepaid by mail. Even a sample bottle will convince you of the merit, for a cheap medicine can't do that. Large bottles, 50c. For 30 days' bottles for \$2.50. Not sold by druggists, only by us and our agents. Agents wanted in new territory. Write for particulars.
