Pelican and Duck In a Ducl.

64 45

In Kew gardens, in the presence of a considerable number of spectators, an affair of honor was settled between a pelican and a duck. The birds had had words together, so to speak, and the pelican determined that the next best thing to making the duck eat his words was to eat the duck. So, after a little thrust and parry on the water, he made for the smaller bird and snapped it into his pouch.

Then a battle royal began inside the pouch of the pelican. The duck struggled, kicked, quacked and occasionally managed to get a leg or a wing outside, while his captor threw his beak high in the air, then dipped it into the water, and kept it there, as if trying to suffocate or drown its enemy. From the look of the agitated pouch it seemed as if the contest was by no means one sided, but that the pelican was having rather a rough time.

At last the duck got his head and one wing out, and then, with a magnificent effort, managed to get entirely free. 5.51 Once again on the water, the duck de-7 41 clined further combat and fied, while 9 09 the pelican remained, looking as if honor ^{9,09} were thoroughly satisfied.—London Telnot act egraph.

Giles In the Pulpit.

The tenets of John Wesley and his disciples were eagerly embraced in Norfolk, and Giles frequently became a lccal preacher. One "local," Sam by name, is described as "a born teacher," though his similes often dropped to the burlesque. Blue Stockings.

According to an English magazine the appellation "blue stockings" originated in the dress of a Benjamin Stillingfleet, grandson of the bishop, as he used to appear at the parties of Mrs. Montague, in Portman square. He used to generally wear blue worsted stockings, and he was a very amiable and entertaining man. Whenever he was absent from Mrs. Montague's evening parties, as his conversation was very interesting, the company used to say, "We can do nothing without the blue stockings." By degrees the assemblies were called "blue stocking clubs'' and learned people "blue stockings."

It has been noticed that almost invariably, when these coffee drinkers reach the age of 40 or 45, their eyesight begins to fail, and by the time they get to be 50 they become blind. One is forcibly impressed by the number of blind men seen about the streets of the city of Fez, the capital of Morocco, and this is invariably attributed to the excessive use of coffee --New York Ledger.

This child in turn married while still very young, with the result that Lady Child was a grandmother at 27.
