SEVENTEENTH YEAR.

McCOOK, RED WILLOW COUNTY, NEBRASKA, FRIDAY EVENING, FEBRUARY 17, 1899.

NUMBER 40

Unprecedentedly Cold.

The weather of the past two weeks and over is unanimously voted as having been without precedent in the history of the state within the past twenty years at least. The cold wave culminated on last Saturday night and Sunday morning, when the crest of the wave touched this part of Nebraska, thermometers over the city registering from 35 to 42 degrees below zero. Most of the thermometers in the city were not made to register such cold, twenty to thirty below zero being the lowest they could register, and in these instruments the mercury went out of sight, cozily hiding away in the bulbs of the thermometers.

While we know of no suffering, there doubtless was some among the poorer people of the city and country, and in a few instances help was extended by private parties.

Water pipes and flowers all over the city were frozen, in fact few homes or business places escaped the disastrous work of Jack Frost, who made himself felt in places that have always escaped hitherto.

The night of February 11th will long indicate the coldest weather ever experienced in Southwestern Nebraska.

It's Only Excessive Modesty.

It is to be fondly hoped that the public does not take the newspapers of McCook as representative of the business enterprise of the city. That is, we mean, that we fondly hope the people who buy goods will not look over the advertising pages of the McCook papers and from their lack of advertisements decide that the business men of McCook have no goods to sell or are lacking in enterprise, or anything of that sort. The facts are that the merchants of McCook have as many goods as ever, and perhaps are selling them as reasonably as ever, and that the merchants of McCook are as anxious to sell goods as they have ever been, and all that. The reason they do not use printer's ink must not be attributed to any lack of faith in advertising, or fear that the newspaper men will become too fat and saucy from excessive wealth, or anything of that sort, but must be credited to sheer modesty—nothing else.

Annual Election of Directors.

The McCook building and savings association held its annual meeting for the election of directors, Monday night, the 14th instant, and the result of the election was as follows: For three years, J. J. Garrard, Emerson Hanson and F. M. Kimmell; for one year, J. A. Wilcox. A review of the business of the association for the past year shows the institution to be in very satisfactory condition. The sale of shares in the new series opened in February is progressing nicely, offering a profitable investment to all who have a little spare money to place.

Scored a Big Fright.

The misbehavior of a coal oil heater in the basement of C. L. DeGross & Co.'s store, last Saturday afternoon, gave everybody on Main street a big fright. The oil in the heater caught fire. An alarm was raised, and the department responded, but no water was thrown, the fire being extinguished without it. A lively scare was scored, as the weather was intensely cold, and it was a bad time for a fire, and a dangerous locality, too.

Several Well Improved Ranches.

Large or small, in Chase or adjoining counties, for sale or lease, watered by best stream in the state, plenty of alfalfa land under irrigation. Large range, great grass country. No better place in the west for cattle or sheep. Small farms to sell at small prices. Parties wanting to either buy or lease a ranch will do well to correspond with the undersigned.

King and Ingeborg Fadness were made husband and wife in the presence of the members of the family and a few friends. The happy couple were the recipients of a number of beautiful presents. They enter their new relation with the best wishes of all.

Father Knowles Dead.

The death of Father Knowles of Culson, which occurred on Saturday, February 11th, at that place, will bring to the hearts of all in this city who knew him a feeling of pain. He was in his 90th year, and was one of the grand old men whom all felt it a benediction to know.

The entertainments to be given in the Assembly room of the high school, on the evenings of Monday and Tuesday, February 27th and 28th, by Mr. Swift and his marvelous microscope and telescope promise to be highly instructive and entertaining, and well worth the price asked, 25 cents. The proceeds will be devoted to buying a microscope for the public schools of the city. Both evenings there will be short talks by Mr. Swift descriptive of the microscope and telescope and the objects they reveal. Under his marvelous instruments a flea will appear to be the size of an elephant, and a fly to have 8,000 eyes. Grains of sand will appear to be boulders. The rumor has been received that the Burlington is soon to make this branch a part of the main line, building a cut-off some where in Colorado, in order to shorten the distance and make quicker time to Denver. Conductor George Willets caught a passenger who was trying to beat his way from Akron to McCook, recently, very neatly. The passenger in question only purchased his ticket from Denver to Akron; but the conductor noticed that the Akron passenger did not get off at Akron, but could not locate his man, who by putting his hat into another passenger's hat, that was properly ticketed, escaped detection, notwithstanding the conductor kept a sharp look-out for him. Finally, he sent the car porter into the car with a blank telegram, instructing him to call out the name Stokes—the passenger in question had a mileage book and the conductor remembered his name. The passenger fell into the trap easily, putting up a game about not being put off at Akron etc., but finally paying his fare.

A newspaper whose columns overflow with advertisements of business men has more influence in attracting attention to and building up a town than any other agency that can be employed. People go where there is business; capital and labor where there is an enterprising community. No power on earth is so strong to build up a town as a newspaper well patronized, and its power should be appreciated.—Talmage.
