**RUNNING SORE ON HIS ANKLE.**

After Six Years of Intense Suffering, Promptly Cured

By S. S. S. entire circulation is in a deprived condition. They are a severe drain upon the system, and are constantly sapping away the vitality. In every case the poison must be eliminated from the blood, and no amount of external treatment can have any effect.

There is no uncertainty about the merits of S. S. S.; every claim made for it is backed up strongly by convincing testimony of those who have been cured by it and know of its virtues by experience.

Mr. L. J. Clark, of Orange Courthouse, Va., writes:

"For six years I had an obstinate, running ulcer on my ankle, which at times caused me intense suffering. I was so disabled for a long while that I was wholly unfit for business. One of the best doctors treated me constantly, but did me no good. I then tried various blood remedies, without the least benefit. S. S. S. was so highly recommended that I concluded to try it, and the effect was wonderful. It seemed to get right at the seat of the disease and force the poison out, and I was soon completely cured." **ADDITIONAL RAILROAD NEWS.**

**Watch Inspection Order.**

A new watch inspection order, effective February 1, has been issued by the Burlington. It applies especially to conductors, engineers, yard conductors and yard engineers, but all other employees concerned in the movement of trains are given an intimation that the company would welcome their compliance with the rule, because an opportunity is given them to buy the new standard watches of inspectors at cost prices. The new rule provides that hereafter each watch must be at least a "nickel, seventeen jewels, adjusted to temperature, isochronism, and positions, with patent regulator, and Breguet hair spring," and must not vary to exceed thirty seconds per week. Heretofore a fifteen jewel movement has sufficed.

Beginning February 1st, each watch must be taken to a designated inspector at the nearest division point and there the watch must be thoroughly gone over once each quarter during the first week of February, May, August and November. If found up to the required standard a card certifying to this fact, and thoroughly identifying the watch will be given the owner. This card must constantly be carried with the watch.

Beside that each man with a watch must go to the inspector once each week and there register and have the variations of his watch noted by the inspector, and have it reset to the correct time if there is any variation. The rules forbid an employe setting his watch or in any way changing its movements, unless it shall have run down.

Whenever a watch is found out of repair and has to be left for repairs a substitute watch may be furnished with the approval of the inspector, but must be accompanied by a special repair card.

Inspectors will have for sale the watches of the required standard at lowest figure and are to make necessary repairs to watches at reasonable rates, but it is not compulsory that they buy their watches or have repairs made by the inspectors. All must meet the inspector's approval, however.

This new rule by the Burlington is in accord with the more stringent watch inspection rules being adopted by the western railroads. It is with the idea of making accidents because of miscalculations in time due to defective watches absolutely inexcusable.

A number of Prospect Park young people attended the literary, recently, at the Starbuck school-house. They got there all right, but in coming home the moon had disappeared—and it seemed as though the road had, too,—for the party wandered around over the prairie until after midnight.

**PERIL OF THE SUBURBANITE.**

Why He Is So Frequently Completely Worn Out.

Of a truth black care, in the shape of some grim neurosis, sits ever close behind the city man, says the Medical Press. The rush and hurry of modern life, the fierce struggle for existence, the unnatural condition of environment all tend to exhaust and sap the nervous constitution. Perhaps one of the chief, albeit not always the best, recognized factors in the situation is the necessity of rapid and far-reaching transit. Every year the bulk of city men go further afield, and each morning and night perform their tedious pilgrimage to and from the scene of their busy labors. There can be no doubt that constant railway traveling of this kind is calculated, soon or later, to play havoc with the weakest constitution. While it is, of course, impossible to lay down any exact rule, it may be stated generally that no such daily railway journey should be much over an hour in length, a space of time that is far more than enough to carry the citizen into pure air and the most sylvan of scenery. Think of the rattle, the dust, the draughts, the bad lighting, the extremes of temperatures, the jolting, the constrained attitudes, the draggle-tailed discomfort of the average railway carriage to a man already exhausted with mental worries, especially if he has slept badly and scamped his meals. Let the country-dwelling citizen get his physician to make a note of the state of his nervous system and keep the record at hand for future reference. As every medical man of any experience can testify, the attempt to burn a candle at both ends, one in the city and the other fifty or a hundred miles away at the seaside, has cut off many a valuable life in the flower of its maturing manhood.

**City Built on Islands.**

The famous old city of Ghent, Belgium, is built on twenty-six islands, which are connected with one another by eighty bridges. Three hundred streets and thirty public squares are contained in these islands. Ghent has been the scene of many treaties, insurrections and revolts, and it was there the treaty was made terminating the war of 1812 between this country and England.

**Obituary.**

Shadrach M. Wilburn was born in Frankfort, Kentucky, August 26, 1818, and died December 31, 1899, aged 81 years, 4 months and 5 days.

**The Way to go to California**

Is in a tourist sleeper, personally conducted, via the Burlington route. You don't change cars; you see the finest scenery on the globe; you make fast time.

Your car is not so expensively furnished as a palace sleeper, but it is just as comfortable, just as good to ride in, and nearly \$20 cheaper. It has wide vestibules, Pintsch gas, high-back seats, a uniformed Pullman porter, clean bedding, spacious toilet rooms, tables and a heating range. Being strongly and heavily built, it runs smoothly—is warm in winter and cool in summer.

In charge of each excursion party is an experienced excursion conductor, who accompanies it right through to Los Angeles.

Cars leave Omaha, St. Joseph, Lincoln and Hastings every Thursday, arriving in San Francisco on the following Sunday, Los Angeles on Monday—only three days from the Missouri river to the Pacific coast, including a stop-over of 1½ hours in Denver and 2½ hours in Salt Lake City—two of the most interesting cities on the continent.

**ASK YOUR DOCTOR!**

Ask your physician this question, "What is the one great remedy for consumption?" He will answer, "Cod-liver oil." Nine out of ten will answer the same way.

Yet when persons have consumption they loathe all fatty foods, yet fat is necessary for their recovery and they cannot take plain cod-liver oil. The plain oil disturbs the stomach and takes away the appetite. The disagreeable fishy odor and taste make it almost unendurable. What is to be done? This question was answered when we first made

**SCOTT'S EMULSION**

of Cod-Liver Oil with Hypophosphites. Although that was nearly twenty-five years ago, yet it stands alone today the one great remedy for all affections of the throat and lungs.

The bad taste and odor have been taken away, the oil itself has been partly digested, and the most sensitive stomach objects to it rarely. Not one in ten can take and digest the plain oil. Nine out of ten can take SCOTT'S EMULSION and digest it. That's why it cures so many cases of early consumption. Even in advanced cases it brings comfort and greatly prolongs life.

See and get on all druggists. SCOTT & BOWNE, Chemists, New York.

Examine the new oil cloth on the kitchen floor; its color and gloss are being destroyed and you may see where a cake of common soap fresh from the hot water in the scrubbing bucket has been laid on it for a moment, the free alkali having eaten an impression of the cake into the bright colors.

A more careful examination will show small "pin holes" here and there where the alkali has cut through the surface to soak into and gradually weaken the whole floor covering.

This is what cheap soaps do. Use Ivory Soap, it will not injure.
