### Question Answered.

Yes, August Flower still has the largest sale of any medicine in the civilized world. Your mothers and grandmothers never thought of using anything else for indigestion or biliousness. Doctors were scarce, and they seldom heard of appendicitis, nervous prostration or heart failure, etc. They used August Flower to clean out the system and stop fermentation of undigested food, regulate the action of the liver, stimulate the nervous and organic action of the system, and that is all they took when feeling dull and bad with headaches and other aches. You only need a few doses of Green's August Flower, in liquid form, to make you satisfied there is nothing serious the matter with you. Get Green's Prize Almanac. A. McMillen.

### Does It Pay to Buy Cheap?

A cheap remedy for coughs and colds is all right, but you want something that will relieve and cure the more severe and dangerous results of throat and lung trouble. What shall you do? Go to a warmer and more regular climate? Yes, if possible; if not possible for you, then in either case take the only remedy that has been introduced in all civilized countries with success in severe throat and lung trouble, "Boschee's German Syrup." It not only heals and stimulates the tissues to destroy the germ disease, but allays inflammation, secures easy expectoration, gives a good night's rest, and cures the patient. Try one bottle. Recommended many years by all druggists in the world. Get Green's Prize Almanac. A. McMillen.

### ONE THOUGHT.

Though time may dig the grave of creeds And dogmas wither in the sod, My soul will keep the thought it needs, Its serverless faith in God.

No matter how the world began Nor where the march of science goes, My trust in something more than man Shall help me bear life's woes.

—Ella Wheeler Wilcox in Woman's Home Companion.

### ABSENTMINDEDNESS.

#### Absurdities Into Which Victims of the Habit Have Fallen.

When lapses of memory become habitual, the person is properly called absentminded. The Chicago Tribune relates the following absurdities into which some victims of this disease have fallen:

A bridegroom of 24 hours left his wife, strolled around to his mother-in-law's house and asked her if her daughter was at home. This came from force of habit. He had been calling there daily for some time, and it probably occurred to him that he had not paid his usual visit.

A Chicago bank president is unable to account for three-quarters of an hour of his life. He went into a restaurant as usual and ordered his lunch. Nearly an hour later he found himself in his office chair and suddenly remembered the order.

He went back across the street and asked if the luncheon was ready. The clerk informed him that he had eaten, paid the bill and gone away some 15 minutes before, that he had put his hat on as he went out and that he (the clerk) had not noticed anything peculiar in his actions.

The bank president congratulates himself that he can be trusted to behave like an ordinary mortal even when he doesn't happen to have his mind with him.

An editor of a daily paper has laid himself open to unkind remarks by trying to take up a collection in his office. Happening to want a small coin, he turned to his fellow worker and asked for a quarter.

"Haven't got it, but here's a dollar," the man replied as he tossed it over. The editor put the dollar in his pocket and immediately turned to a special writer at the next desk and said:

"Miss —, could you lend me a quarter?" Then, seeing the man from whom he had got the dollar grin, he added hastily: "Oh, never mind. I just got a dollar from Brown."

In analyzing his conduct he said that Brown's reply that he did not have a quarter was apparently the only part of the transaction that made any impression upon him. But he is under suspicion in that office and will probably never be able to live it down.

### HOW ZULU WOMEN SEW.

#### They Use Skewers For Needles and Giraffe Sinews For Thread.

The skill of the Zulus of South Africa in sewing fur is a household word in South Africa, and some of the other tribes compete with them. The needle employed is widely different from that used by the ordinary needlewomen. In the first place, it has no eye; in the second, it is like a skewer, pointed at one end and thick at the other.

The thread is not of cotton, but is made of the sinews of various animals, the best being made from the sinews in the neck of a giraffe. It is stiff, inelastic, with a great tendency to "kink" and tangle itself up with anything near it. Before being used it is steeped in hot water until it is quite soft and is then beaten between two smooth stones, which causes it to separate into filaments, which can thus be obtained of any length and thickness. Thus the seamstress has a considerable amount of labor before she commences with the real work in hand.

Finally she squats on the ground (for no native stands to work or do anything else who can possibly help it) and, taking her needle, bores two holes in the edges of the rug or garment on which she is working. The thread is then pushed through with the butt of the needle, drawn tight, and two more holes are made with a like result, the skewer progressing very slowly, but fast enough for a country where time is of no value whatever.

The skin upon which the seamstress is working is damped with water before she commences, and as the damp thread and hide dry out they bring the work very closely together.

### His Sympathy.

An old housewife in the country was bemoaning her poverty to an unsympathetic husband.

"Things ain't as they used ter be," she complained. "Why, I ain't got anything like I used ter hev, I ain't got quilts enough ter go round the beds, there's two of the best chairs broken, an I ain't got no dress the's really fit ter go ter meetin, an if I was ter die tonight I wouldn't hev a cap ter be buried in."

The old man had stood the whining as long as he could.

"Blast it all, then," he fiercely ejaculated, "why didn't yer die when yer did hev a cap?"

### Fire and Mosquitoes.

Italian peasants living in swampy regions still follow the old custom of lighting fires for the purpose of purifying the air of malarial poison. As a matter of fact, this is the worst thing they could do, as the fire attracts mosquitoes, which are now known to be transmitters of malarial fever.

At Peckforton, Cheshire, England, is to be seen a very queer beehive. It is in the shape of a castle on an elephant's back and is carved in stone.

Next to opium in power are certain kinds of grasses, notable among which is hemp, which causes intoxication and anesthesia.

To eradicate worms from the system, give the child plain, nourishing food and White's Cream Vermifuge. The result will be the worms will disappear and the child become healthy and cheerful. Price 25 cts. A. McMillen.
