to water but you can't make him drink.

You can't make him eat either. You can stuff food into a thin man's stomach but that doesn't make him use it.

Scott's Emulsion can make him use it. How? By making him hungry, of course. Scott's Emulsion makes a thin body hungry all over. Thought a thin body was naturally hungry didn't you? Well it isn't. A thin body is asleep—not working—gone on a strike. It doesn't try to use its food.

Scott's Emulsion wakes it up—puts it to work again making new flesh. That's the way to get fat.

Home for Families of Bandits.

Not actuated by remorse, but by pure philanthropy, Jim Jenkins, hunter of outlaws, has concluded to devote all his money to the maintenance of a home for the orphans and widows of men he has run to earth, in particular, and of criminals of the great Southwest in general. Jim Jenkins, now of Kansas, is now 65 years old and has spent forty years as a scout and hunter of bandits and train robbers. In this way he has made about \$50,000. Among the distinguished outlaws he has chased were Jesse James and his brother, Bob Ford, Bill Dalton and Bill Cook, while he was the leader of the band that caught Cherokee Bill in 1895. In the Dalton raid in Coffeyville, Kas., Jenkins was shot eight times. He estimates his bag of bad men at about 150. The home, which is being built on a 5,000-acre farm owned by Jenkins, near Pryor Creek, I. T., is to cost \$20,000.—Buffalo Express.

Subsidies to Support Art.

The government of Bavaria has voted a considerable sum for the maintenance of art institutions throughout the kingdom during the coming year. The allowances for the purchase of paintings and their preservation is particularly liberal. The various art institutes in Munich receive handsome subsidies and the German museum in Nuremberg gets an increased allowance. Various other institutions have been voted large amounts for repairs and maintenance. These art allowances in all reach 3,108,183 marks (\$739,741).—Emil Henzel, in Chicago Record.

Water Supply for Tampico.

English engineers are making surveys and plans of Tampico and the surrounding country with a view of supplying the town with drinking water and a complete system of sewerage. Should these works be carried out there will be an excellent opening for the sale of plumbing supplies. At present there is no plumbing establishment in the port.
