### Modern Surgery Turpased.

"While suffering from a bad case of piles I consulted a physician who advised me to try a box of DeWitt's Witch Hazel Salve," says G. F. Carter, Atlanta, Ga. "I procured a box and was entirely cured. DeWitt's Witch Hazel Salve is a splendid cure for piles, giving relief instantly, and I heartily recommend it to all sufferers." Surgery is unnecessary to cure piles. DeWitt's Witch Hazel Salve will cure any case. Cuts, burns bruises and all other wounds are also quickly cured by it. Beware of counterfeits. McConnell & Berry.

Stockmen in Nebraska are beginning to know how important it is to have an acquaintance with the best methods of rendering stock immune against diseases to which cattle and swine in our state are peculiarly liable. The importance of a knowledge of the anatomy and physiology of farm animals is also making itself felt. Losses amounting to thousands of dollars are frequently met with because of not having such knowledge as is mentioned above. The cost of attending the school of agriculture which began, last Monday, is less than one hundred dollars per year. The subjects named above are thoroughly taught. Stockmen would do well to have their sons attend. Students will be admitted for two weeks after the opening day.

Corning, Ohio, Nov. 5th, 1900. Pepsin Syrup Company, Monticello, Ill.

While visiting in Taylorville, Ill., I came across your Dr. Caldwell's Syrup Pepsin. Have used two and one-half bottles and it has done me more good than all the medicine taken for two years. Please let me know if you will send me three or four bottles and what it will cost to send it to Corning, Perry county, Ohio, and oblige. Mrs. SARAH A. McCracken. Sold by A. McMillen.

It has been estimated that the annual loss to the United States from insect ravages amount to between three and four hundred millions of dollars. When it becomes known that not a single crop which is grown upon the farm escapes the attacks of insect pests, it will be apparent that an essential part of an agricultural education should be a training in elementary entomology, and that the course in the subject named above should be planned to give such knowledge as will enable those who take it to combat successfully the ravages of insect pests. Are there not many young men in Nebraska who desire to do some work in Entomology? The University of Nebraska school of agriculture which is now in session offers some excellent work in the study of insects.
