Question Answered.

Yes, August Flower still has the largest sale of any medicine in the civilized world. Your mothers and grandmothers never thought of using anything else for indigestion or biliousness. Doctors were scarce and they seldom heard of appendicitis, nervous prostration or heart failure, etc. They used August Flower to clean out the system and stop fermentation of undigested food, regulate the action of the liver, stimulate the nervous and organic action of the system, and that is all they took when feeling dull and bad with headaches and other aches. You only need a few doses of Green's August Flower, in liquid form, to make you satisfied there is nothing serious the matter with you. Get Green's Prize Almanac.

Would Smash the Club.

If members of the "Hay Fever association" would use Dr. King's New Discovery for Consumption, the club would go to pieces, for it always cures this malady, and asthma, the kind that baffles the doctors, it wholly drives from the system. It conquers grip, saves little ones from croup and whooping-cough and is positively guaranteed for all throat and lung troubles. 50c, \$1.00. Trial bottles free at McConnell & Berry's.

Mrs. I. B. West has been ill, part of the week, but is better, today. Dispatcher L. E. Cann's condition remains practically unchanged and is regarded as somewhat serious. One Burlington engineer doubts the stories that any locomotive ever attained a speed of ninety miles an hour working under high pressure. He thinks it possible that greater speed than that has been accomplished on down grades with the machines working under reduced pressure. The Burlington, he says, has locomotives that can do seventy miles an hour under favorable circumstances, and many of them can do sixty miles pulling a load. It is different, he thinks, when an engine is burdened with a heavy train and is trying to make speed under high working pressure on a level grade. This man should know. He runs an engine ahead of the Burlington's fastest passenger trains out of Lincoln.—Journal.
