CONGRESSMAN NORRIS has introduced a bill to equalize pensions, which if enacted, he says, will cost the government much less money than would a flat rate service pension.

REPRESENTATIVE NORRIS has introduced a bill appropriating \$125,000 for the erection of a public building at Grand Island on the site purchased there last summer.

REPRESENTATIVE NORRIS has recommended a young man by the name of Fell for appointment to the West Point military academy. Mr. Fell resides at Harvard, Clay county, Neb.

THE supreme court of Nebraska has declared the new revenue law constitutional and valid in every particular, thus finally settling in favor of the state the much-mooted tax law passed by the last legislature.

THROUGH the efforts of Representative Norris an original pension of \$8 per month was granted today at the pension bureau to Sarah Charter of Hastings. Mrs. Charter will receive in the neighborhood of \$700 back pay.

REPRESENTATIVE NORRIS of the Fifth Nebraska district has introduced a bill in the house establishing the minimum rate of pensions for the survivors of the civil war. It fixes the minimum pension at \$12 per month and automatically increases the allowance at the rate of \$1 per month until the limit of \$20 is reached. Mr. Norris also introduced a private bill to grant an increase of pension to Simeon Billings of McCook.

UNITED STATES SENATOR MILLARD doubtless represents the feelings of Nebraskans in opposing the proposed "asset currency" legislation. Better a greenback or free silver currency than a currency based upon bonds other than those of the United States, a currency subject to expansion and contraction to suit the whims of the gamblers of Wall street. The senator recently stated: "The people of the United States demand a stable currency. The moment that you put back of a currency railroad bonds or municipal bonds that moment you put in the minds of the public doubt and uncertainty. And the moment the doubt and uncertainty as to the future is created that moment the people become restless and panics are sure to result. I believe wholly in an asset currency, but it must be protected by the bonds of the government. There is nothing so sure or so certain as a money backed by the integrity and honor of a nation. This has been well established. To make a change now in our finances would be suicidal."—Lincoln Journal.

THE marvelous industrial development of the United States during the past decade contains no record that can compare with the growth of our great iron and steel industry. The whole fascinating story of the evolution from very small beginnings of the wonderful aggregation of cooking ovens, blast furnaces, and rolling mills, which render the valley of the Monongahela the very center of the world's iron and steel industries, has never been told. In a special number devoted to iron and steel exclusively, the Scientific American presents an authoritative account of how we have outdistanced all other countries in the production of iron and steel. How wonderful that development has been, is shown by the mere fact that in 1810 there were produced in the United States but 53,908 tons of pig iron, and that in 1902 the total output of pig iron passed far beyond that of our nearest competitor, Great Britain, reaching the huge total of 17,821,307 tons. How this vast output of pig iron is converted into armor plate, gun steel, structural shapes, tubes, rails and steel and wire, besides a host of other things, it is this special number's purpose to tell.

PROFIT

The matter of feed is of tremendous importance to the farmer. Wrong feeding is loss. Right feeding is profit. The up-to-date farmer knows what to feed his cows to get the most milk, his pigs to get the most pork, his hens to get the most eggs. Science.

But how about the children? Are they fed according to science, a bone food if bones are soft and undeveloped, a flesh and muscle food if they are thin and weak and a blood food if there is anemia?

Scott's Emulsion is a mixed food; the Cod Liver Oil in it makes flesh, blood and muscle, the Lime and Soda make bone and brain. It is the standard scientific food for delicate children.

Send for free sample.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

Try for Health

222 South Peoria St., CHICAGO, ILL., Oct. 7, 1902.

Eight months ago I was so ill that I was compelled to lie or sit down nearly all the time. My stomach was so weak and upset that I could keep nothing on it and I vomited frequently. I could not urinate without great pain and I coughed so much that my throat and lungs were raw and sore. The doctors pronounced it Bright's disease and others said it was consumption. It mattered little to me what they called it and I had no desire to live. A sister visited me from St. Louis and asked me if I had ever tried Wine of Cardui. I told her I had not and she bought a bottle. I believe that it saved my life. I believe many women could save much suffering if they but knew of its value.

Surgar Dunbar

Don't you want freedom from pain? Take Wine of Cardui and make one supreme effort to be well. You do not need to be a weak, helpless sufferer. You can have a woman's health and do a woman's work in life. Why not secure a bottle of Wine of Cardui from your druggist today?
