Plates.

Individual plates for table use were unknown to the ancients, who held their meat in their hands or employed the flat wheaten cakes then made on which to hold their victuals. They are first mentioned in A. D. 600 as used by the luxurious on the continent, and in the ninth century they had come into common use both in England and on the continent. They were made of wood or some kind of earthenware, the former material being preferred because it did not dull the knives.

The Backbone of a Mighty Nation

is good food—food for brain, food for brawn, food that is strengthening, that gives energy and courage. Without a proper appreciation of this great fundamental truth no nation can rise to greatness.

As an article of food, soda crackers are being used more and more every day, as is attested by the sale of nearly 400,000,000 packages of **Uneeda Biscuit**, which have come to be recognized as the most perfect soda cracker the world has ever known.

And so **Uneeda Biscuit** will soon be on every table at every meal, giving life, health and strength to the American people, thus in very truth becoming the backbone of the nation.
