D. McCallen is a new addition, this week, to the machinist force.

Fireman Clyde Scott is off duty on account of sickness of his wife.

Engineer Perry Gassaway is visiting relatives in Holdrege, this week.

Machinist J. Shea has separated himself from the company's pay roll.

Engineer Pronger is laying off on account of the illness of his baby girl.

J. M. Trammell is now employed in the round house as engine inspector.

Fireman C. G. Godsey, who has been sick for some time, has returned to work.

Engineer J. H. Moore has extended his visit to Seattle, Wash., and other coast points.

Hartley E. Durell has retired from the position of Burlington fireman and will in April commence the season as a high diver. He was at headquarters, yesterday.

"Dan" A. Lucas, foreman of the boiler shops, is the inventor of a contrivance which is coming into popular use among the manufacturers of locomotives all over the country. The invention is the Lucas nozzle. A full description of the nozzle, a sketch of Mr. Lucas' career as a boilermaker, and a halftone of the inventor were published in the February number of the Boiler-makers' Journal. The nozzle is an exhaust for steam, and is placed in the smoke box of the engine. Other exhaust nozzles are on the outside and on top of the engine, but with this contrivance, where the nozzle is in the smoke box directly under the smokestack, the steam goes out through the stack. Mr. Lucas has been at the Havelock shops for about four years. He came from McCook, Neb., where he was foreman of the roundhouse—Lincoln Star.

Call at THE TRIBUNE office and see what can be done for you in the way of reading matter for the coming year. It will save you money.

Always Waiting

for better opportunities is poor policy. It is far better to seize upon them as they occur. If you have a few dollars on hand, don't wait for more before starting a bank account. Come right down to the

First National Bank

Make your deposit and you will find it easy to make your second. Houses are built one brick at a time. So are big bank accounts.

We Know a Good Thing When We See It

We buy all our Household Notions, etc., at THE IDEAL 10c STORE

Will Build a Viaduct.

Order has been received at McCook headquarters to build a viaduct over the tracks between the depot and the round house and machine shop, and the work will begin shortly on this needed improvement.

It is to be regretted, however, that the order does not carry with it power to construct an under-ground way between the points above mentioned, which would certainly be more useful to the company in the long run, especially in view of the fact that the company contemplates in the future to pipe steam from the roundhouse to heat the headquarters building, eating house, freight house etc.

However, the construction of even a viaduct will be hailed with acclaim by employees and public.

Both Horses Perished.

Last Friday night, Fred Lepper hired a team at the "Blue Front" livery stable in McCook and drove out to Perry to attend a literary. The team was tied up, but in some manner broke loose and hitched to the buggy started for McCook. Although diligently hunted and inquired for, no trace of them was learned until Sunday noon, when Bert Sheldon went out in his field south of the railroad track to drive up some cattle, and in a small pond about 30 feet across and 3 1/2 feet deep, found the team still hitched to the buggy,—both horses dead. It is supposed the horses wandered about until thirsty and went to the pond to drink. It being frozen over bore them up until the center and deepest part was reached, when they broke through and were unable to free themselves and get out, and consequently perished.

PERU NORMAL NOTES.

The girls' basket ball team will leave Peru, Feb. 26th, for a week's trip. They will play with Lincoln High school, Crete, York, Grand Island and Kearney.

President Crabtree says he will not recommend any young man for a position who he knows uses tobacco in any form and he has been endorsed in this by the recommendation committee of the school.

Miss Vanehe Plumb, well known in McCook as a strong graduate of the high school, will graduate from the Normal, this year, and receive a professional life certificate. Her home at present is at Boulder, Colorado.

Mrs. Bertha Kuntz Baker of New York City gave a fine reading, last Tuesday evening, as one number of the Normal Lecture Course. A large audience were held as if by a spell as she read Justin McCarty's "If I were King."

The many friends of Sup't Geo. H. Thomas at the Normal have expressed themselves as highly pleased over his election as President of the State Library Association and member of the executive committee of the State Teachers' Association.

Saturday evening closed the preliminary debates that have been going on since Wednesday evening. Out of the twenty or twenty-five students who participated ten of the strongest were chosen to enter the state debates in April.

Who's your Tailor?

The most skillful cutters and tailors are to be found in the metropolitan cities.

This is one of the many reasons why we can give better values than the local tailor can—at a little more than half his price.

You'll appreciate what the *easy feel* is in one of our suits.

We'll show you an assortment of 500 styles of woollens to select from.

Made to your measure—taken by us.

All Druggists

Every Niece and Nephew of Uncle Sam

should be deeply interested in what he has said about soda crackers, because they are the one food with which all of them are familiar.

Uncle Sam has given out figures showing that soda crackers are richer in nutriment and body-building elements, properly proportioned, than any food made from flour.

This is saying much for common soda crackers, and much more for **Uneeda Biscuit**, because they are soda crackers of the best quality. They are baked better—more scientifically. They are packed better—more cleanly. The damp, dust and odor proof package retains all the goodness and nutriment of the wheat, all the freshness of the best baking, all the purity of the cleanest bakeries.

Your Uncle Sam has shown what food he thinks best for his people. His people have shown that they think **Uneeda Biscuit** the best of that food, nearly 400,000,000 packages having already been consumed.
