

# JUST A LITTLE DIFFERENT

That touch that adds just a little more style, character and tone, to distinguish them from the ordinary, everyday kind of shoe sold by the general stores. There is a solidity in the make that also gives to our goods the wearing quality, lacking in so many shoes you have bought, and makes them look neat till they are worn out. It pays to buy the kind we handle. We are exclusive dealers in footwear, and therefore can afford to and do carry a larger stock, and in all grades, than is possible for those who do not make a specialty of this line.

## COAL CHUTE TRAGEDY

The Burlington Coal Chute at Akron, Colorado, This Time.

## MCCOOK AFFAIR REPEATED

Only the Particulars Include the Death of a Trainman—Brakeman J. C. Ferguson—and the Slight Injury of Brakeman Arthur Elson.

The Burlington's coal chute at Akron, Colo., collapsed early Tuesday morning of this week, while a string of loaded coal cars were being pushed up onto the elevated track.

Brakeman J. C. Ferguson of this city went down in the wreckage to his death. Brakeman Arthur Elson was but slightly injured. The string of coal cars and elevated track were badly damaged in the wreck. The wrecker and crew were at once dispatched there from McCook to pick up the wreck, returning here on Thursday morning.

Brakeman Ferguson was a comparatively new man on this division. He leaves a wife and three children.

There were several freight cars in the string between the engine and the coal cars, it not being safe or practicable to run road engines up the incline any consideration distance. The accident is said to have been an exact counterpart of the McCook accident of a few weeks since. As a result all bumping posts will in future be dispensed with—and present posts removed in due season.

Undertaker Herman Pade of our city went up to Akron and prepared the body for shipment. Remains arrived here on 14, Tuesday night.

The remains were shipped to Clifton, Kansas, for burial, leaving here on No. 2, Wednesday morning. The wife and three children accompanied the body.
