Defiance Starch—Never sticks to the iron—no blotches—no blisters, makes ironing easy and does not injure the goods.

Luxury for Young Aristocrat.
The duke of Devonshire presented Lord Tavistock, his eldest son, with a silver-mounted motor car for his use while at Oxford university.

Defiance Starch is the latest invention in that line and an improvement on all other makes; it is more economical, does better work, takes less time. Get it from any grocer.

Think on this doctrine—that reasoning beings were created for one another's sake; that to be patient is a branch of justice, and that men sin without intending it.—Marcus Aurelius.

With a smooth iron and Defiance Starch, you can launder your shirtwaist just as well at home as the steam laundry can; it will have the proper stiffness and finish, there will be less wear and tear of the goods, and it will be a positive pleasure to use a Starch that does not stick to the iron.

Has Star Worn by Columbus.
It is not generally known that the insignia of the Golden Fleece conferred upon the first duke of Wellington was that actually worn by Columbus, and, as a special mark of Spain's gratitude, this insignia was made hereditary, so that the present duke is the proud possessor of the star worn by the discoverer of America.

Starch, like everything else, is being constantly improved, the patent Starches put on the market 25 years ago are very different and inferior to those of the present day. In the latest discovery—Defiance Starch—all injurious chemicals are omitted, while the addition of another ingredient, invented by us, gives to the Starch a strength and smoothness never approached by other brands.

Public School Pupils Best.
Figures concerning the students matriculated at Cornell in the last 29 years indicate that 42 per cent. have come from private schools and 58 per cent. from public schools. Of private school pupils, 153 were dropped after the first term and 111 from public schools, and the percentage of failures among the public school graduates is much lower than those of private schools. Consequently, the Cornell faculty favors withdrawing the privilege of admission by certificate from private schools.

A Great Outside Remedy.
Most pains are of local origin—a "crick" in the back, a twinge of rheumatism, a soreness all over arising from a cold—are all cured by outside applications. The quickest, safest and most certain method is Alcock's Plaster, known the world over as a universal remedy for pain. They never fail, they act promptly, they are clean and cheap. You can go right ahead with your work while the healing process goes on. Sixty years' use has given them a great reputation.

Money in British Banks.
In the last 15 years British bank depositors have doubled in number, from less than 5,000,000 to 10,000,000, and the ratio of depositors to population has increased from 1 in 7 to 1 in 4.35. Deposits have increased from \$269,140,861 to \$740,248,181.50, and the number of postoffice banks from 10,000 to 15,000. The average of each account is now \$74.30. The scope of the bank has been enlarged, so that now \$243.32 can be deposited in any one year, and the total deposit of any one individual may aggregate \$973.30.

CHICKEN WAS ALL RIGHT.

How One Woman Was Cured of an Old Prejudice.

"But I never eat fried food," said my guest, raising her hand in protestation when I said in pleasantry: "I have fried a chicken to-day in your honor." "But if you eat my fried chicken and have faith in my assertion that it will not harm you, you will be glad that you tried it," I replied, and went on helping her to the second joint and a piece of the breast, and added a generous supply of cream gravy for the baked Jersey sweet which was offered on another small plate. It was a moment when friendship of long years seemed about to be strained, and I would not have placed my guest in the position of taking Hobson's choice had I not known and felt that she was in a half starved condition through fear that different sorts of food might harm her. She had been seriously ill nearly two years before and could not quite shake off the effect so far as a lingering fear that she could not do this or that without evil result. This fear was principally in regard to food and her menu was pitifully limited.

The chicken in question was young and tender and had been plunged into deep smoking hot fat until the outside was seared, then the kettle was set back where the cooking would go on more slowly and reach the bone. In reality it was more delicate than most broiled chicken, for almost no fat had been absorbed and there were no hard, burned or dried portions.

While we were deep in conversation about some pleasant matters my friend tasted and picked until only the bones remained on her plate. Then after a light dessert we went out for a walk in the fresh air, and minor interesting sights along the way prevented dwelling on the anticipated troubles and they did not become real. My friend afterward alluded to it as "a successful treatment." But she added: "I wouldn't risk any other cook's fried chicken." However, she had learned that the digestive organs and nerves bear quite close relation, and given well cooked food, fresh air, and absence of fear will help digestion to unaccustomed or forgotten tasks.—Chicago Inter Ocean.

Tasty Mexican Dishes.
"101 Mexican Dishes" gives the following recipes: Take the sardines carefully from the box, skin and bone them and lay on brown wrapping paper until ready to use. Cut strips of bread a little longer and a little wider than the sardines, removing all crusts. Fry these in olive-oil a delicate brown. Lay a sardine on each piece and put in the oven until heated through. When ready to serve sprinkle each one with grated parmesan cheese and lay a thin slice of pimiento (green pepper) on top.

Line the sides of a baking dish with a light puff-paste; cover the bottom with sliced pineapple; next, a layer of peeled sliced oranges, then sliced bananas, and then a few thin slices of lemon. Sift a generous supply of sugar between the layers. Repeat the layers until the dish is full and cover the top layer with chopped nuts. Lay over the top narrow strips of pastry and bake slowly for an hour or more.

Pounded Cheese.
This is a reliable recipe which may be made up in quantities and packed down in small stone jars, covered, and set away in a cool place. Place in a mortar with three ounces of butter about a pound of good dry cheese and pound it to a paste. Into this mix a half tablespoonful of black pepper and a teaspoonful each of mustard (made mustard), ground spice and curry powder; add, also, a wineglassful of sherry, and the cheese is ready for use. It is tasty if served on slices of bread and sprinkled over with a little paprika.

Cream Cheese and Gooseberries.
This combination is one of the most palatable there is when it is a question of mixing cheese and fruit. It is much used for luncheons, as cream cheese is a sort of non-committal variety and the average woman is fond of it. Take one package of fresh cream cheese and beat in enough rich cream to make it soft and somewhat foamy. Pile it into a pyramid heap in the center of a plate and surround it with stewed gooseberries. The gooseberries should be cooked until they are quite done and plentifully sweetened. This is to be served on toasted saltines or water biscuits.

To Retain Color in Cotton Goods.
Delicate shades of cotton fabrics, blues, pinks, lavenders and so forth, can be laundered and still be as pretty as new, if they are treated as follows, says the Housekeeper: Drop one teaspoonful of spirits of turpentine into one-half gallon of cold water, wet the goods thoroughly in this, wring dry and hang in the shade. When thoroughly dry it can then be laundered. There is no odor left from the use of the turpentine. This method has been tested time and again, and always with perfect results.

Dado Is Economical.
Nothing is more economical in wall decoration than a dado, says an authority on house decoration. As the lower part of the walls become soiled more quickly than the upper, a room can often be freshened simply by renewing the dado, without touching the upper walls. Another advantage of the dado is that it gives a room a comfortable and furnished appearance without the addition of a lot of furniture. This is particularly true of a hall or stairway where there is a lot of space that needs breaking up.

The Sunny South.
7.0m when all outdoor farm work has ceased in the north, the term "sunny south" and all that it means, appeals with full force to the northern farmer as he realizes that with him it is a case of remaining indoors for the next several months consuming everything that has been produced during the growing season. In the "sunny south" something can be raised every month in the year, and practically every day can be spent out doors. No blizzards. No sunstrokes. Cattle-raising is very profitable. Large profits are made with little labor in growing fruits, vegetables, etc., for northern markets. Strawberries and cantaloupes are great revenue getters. Water unsurpassed. Work plentiful. Lands cheap and productive. For reliable information, address G. A. Park, General Immigration and Industrial Agent, Louisville & Nashville Railroad Company, Louisville, Ky.

Claim Nearly Cost Life.
Fred McNulty, of this city, had a terrible experience while holding down a claim which he has several miles east of here. He went to the claim just before the big blizzard of last week. The weather previously had been mild, and McNulty had no store of fuel in the shack. The storm was so fierce that he could not make his way home, so he went to bed in order to keep from freezing to death. For three days the storm raged, and McNulty lay covered up to his ears, without a bite to eat and only a small quantity of water. When at last the storm subsided he made his way to a neighbor's, a mile distant, freezing his face and ears while en route. When he finally reached Minot he was compelled to take to his bed as a result of his experience.—Minot Correspondence Duluth Herald.

DISFIGURING SKIN HUMOR.
Impossible to Get Employment, as Face and Body Were Covered with Sores—Cured by Cuticura.

"Since the year 1894 I have been troubled with a very bad case of eczema which I have spent hundreds of dollars trying to cure, and I went to the hospital, but they failed to cure me, and it was getting worse all the time. Five weeks ago my wife bought a box of Cuticura Ointment and one cake of Cuticura Soap, and I am pleased to say that I am now completely cured and well. It was impossible for me to get employment, as my face, head and body were covered with it. The eczema first appeared on the top of my head, and it had worked all the way around down the back of my neck and around to my throat, down my body and around the hips. It itched so I was obliged to scratch it, and the flesh was raw. I am now all well, and I will be pleased to recommend the Cuticura Remedies to all persons who wish a speedy and permanent cure of skin diseases." Thomas M. Rossiter, 290 Prospect Street, East Orange, N. J., Mar. 30, 1905.

Millions for the Vatican.
Father Francis Xavier Werntz, the new general of the Jesuit order, has turned over to Pope Pius the entire patrimony of the order, amounting to \$40,000,000. This is done as a tribute of loyalty on account of the trouble between the Roman church and the French republic, which has greatly diminished the resources of the former.

Have No Confidence in Gunners.
Notwithstanding some recent good gun records on British warships the admiralty still seems to lack confidence. The plan to make a target of the wrecked and abandoned battleship Montague on Lundy Island has been abandoned, for fear the gunners might destroy a lighthouse that is in the neighborhood.

Cheap Sterilization.
Tests made in France indicate that water can be sterilized with ozone at the cost of about a cent and a half for every one thousand gallons, when the process is carried on on a large scale.

Real Home of the Peanut.
Botanists have placed the home of the peanut in Africa, but some authorities think it native to Brazil. Louisiana finds the Spanish variety—a small, but fine nut—best adapted to the climate of that state. The "goob-er grabbers" of Georgia and South Carolina like the small white and red peanut of Tennessee, and each year shows an increasing cultivation in those states of that variety.

WHAT JOY THEY BRING TO EVERY HOME

as with joyous hearts and smiling faces they romp and play—when in health—and how conducive to health the games in which they indulge, the outdoor life they enjoy, the cleanly, regular habits they should be taught to form and the wholesome diet of which they should partake. How tenderly their health should be preserved, not by constant medication, but by careful avoidance of every medicine of an injurious or objectionable nature, and if at any time a remedial agent is required, to assist nature, only those of known excellence should be used; remedies which are pure and wholesome and truly beneficial in effect, like the pleasant laxative remedy, Syrup of Figs, manufactured by the California Fig Syrup Co. Syrup of Figs has come into general favor in many millions of well informed families, whose estimate of its quality and excellence is based upon personal knowledge and use.

Syrup of Figs has also met with the approval of physicians generally, because they know it is wholesome, simple and gentle in its action. We inform all reputable physicians as to the medicinal principles of Syrup of Figs, obtained by an original method, from certain plants known to them to act most beneficially and presented in an agreeable syrup in which the wholesome Californian blue figs are used to promote the pleasant taste; therefore it is not a secret remedy and hence we are free to refer to all well informed physicians, who do not approve of patent medicines and never favor indiscriminate self-medication.

Please to remember and teach your children also that the genuine Syrup of Figs always has the full name of the Company—California Fig Syrup Co.—plainly printed on the front of every package and that it is for sale in bottles of one size only. If any dealer offers any other than the regular Fifty cent size, or having printed thereon the name of any other company, do not accept it. If you fail to get the genuine you will not get its beneficial effects. Every family should always have a bottle on hand, as it is equally beneficial for the parents and the children, whenever a laxative remedy is required.
