Say you saw it in THE TRIBUNE.

AN EXTINCT ANIMAL.

The Saber Toothed Tiger Was a Formidable Creature.

The most remarkable of all the extinct feline animals are those known to naturalists as the saber toothed cats or tigers, a group comprising the greater part of all the fossil forms. They date back to the earliest times of which we know anything about the family in North America and reach down to the time of man himself. A large and powerful species described from the Indian Territory by Cope lived contemporaneously with the hairy mammoth, as evidenced by the commingling of their skeletons. There can be little or no question but that the hairy mammoth was contemporaneous with man in North America as well as in Europe. Its geological range is from the close of the eocene to the latter part of the pleistocene.

The chief peculiarity of the animal is the extraordinary elongated canine teeth. The tail is of unusual length and the legs are short. The animal measures about seven feet in length aside from the tail. The lower jaws have a downward projection in front, due to a flange-like widening of the jawbones, which doubtless served as a protection to the teeth, preventing their injury or loss. In some of the larger forms from South America this flange was not present, while the canine teeth were even more elongated than in the case with this species, attaining a length of over six inches and protruding far below the jaws when closed.

A FAMOUS ROAD.

India's Tree Bordered Highway 1,200 Miles In Length.

The road I have in my mind is in India and stretches 1,200 miles from Lahore to Calcutta. It is the famous Grand Trunk road. Let me explain its nature, though one cannot do so by comparison, for there is no road of five miles in England that is anything like it. It is level. Indeed, there is not above a mile the whole distance where even a lady need dismount to walk. The material with which it is made is called kunker, and if you care to turn that word into concrete you have an idea of what it is like. It is exceedingly hard and as smooth as a prepared pavement. There is no dust. When I first got on this road and enjoyed the luxury of easy traveling I said, "This is magnificent, but in a little time I suppose it will become gritty and uneven." I went 50, 100 miles, 200 miles, 500, 600, 700 miles, and it was always the same, with not even a small stone to give a jog. Nearly the whole of the way is lined with a double row of majestic trees.

With two friends I rode across India during the hottest time of the year, in April and May, and was never seriously inconvenienced by the heat, for at a pace of fifteen miles an hour one could create a draft.—Chambers' Journal.

Roadside Wit.

He who matched wits with the author of "The Ancient Mariner" had indeed a lively task before him, for Coleridge was never caught napping. The poet was so awkward a horseman that his riding often attracted comment of anything but a complimentary nature. One day he was riding along the turnpike road in the county of Durham when a wag who met him fastened upon him as an excellent subject for sport. Consequently he drew rein and said in an impertinent drawl: "My graceful friend, did you happen to meet a tailor on the road?"

"I'm inclined to think I did," said Coleridge meditatively. "I was not sure at the moment, but he said something about my meeting a goose farther along the road."

The wag put spurs to his horse, and the poet jogged calmly on his way.

Past Salaries of Actors.

A number of autograph letters of Edmund Kean supply some interesting information about the salaries of actors early in the nineteenth century. One relates to an offer by Mr. Ellison offering Kean £3 a week as acting manager of "the new theater in Wych street." Later this rose to £25 a month. In 1826 Kean was offered \$12,000 a year to go to America. In the prime of his popularity he received £200 for a week in Edinburgh and apparently reached the highest point when Mr. Bunn wrote from the Theater Royal, Dublin, on Feb. 8, 1829, and offered him £50 a night to play in Dublin and Cork.—Liverpool Mercury.

Home Influences.

Each one of us is bound to make the little circle in which he lives better and happier; each one of us is bound to see that out of that small circle the widest good may flow; each of us may have fixed in his mind the thought that out of a single household may flow influences which shall stimulate the whole commonwealth and the whole civilized world.—Dean Stanley.

Got Too Important.

"What has become of the maid you thought such a prize?" "Oh, I had to let her go." Replied the second fashionable woman. "After her operation for appendicitis she thought she was one of us."—Philadelphia Ledger.

Right On.

Wisejay—It must be a great pleasure to tell a joke to an acrobat. Soft-boy—Why? Wisejay—Because he tumbles so easily. —Morristown (Pa.) Times.

A Good Guess.

Mother—Mercy, child, how do you get your hands so dirty? You never saw mine as dirty as that! Child—No, but I guess grandma did!—Philadelphia Inquirer.
