Suggestions for Painting

- 1 — DON'T paint during wet or frosty weather.
- 2 — DON'T expect good results when you paint wet, sappy or pitchy lumber.
- 3 — DON'T fail to shellac all knots, sappy and pitch spots.
- 4 — DON'T be afraid to use PURE linseed oil liberally in priming coat.
- 5 — DON'T thin with or add anything but PURE linseed oil except in the following cases:
On old work where the surface is in fair condition, smooth and hard, use enough turpentine on under coats to cut the gloss.
During cold weather, when any paint is liable to crawl, add a little turpentine to under coats. Nothing should be added to the last coat.
- 6 — DON'T spread paint too thickly, as it will surely check and blister if not well brushed out.
- 7 — DON'T apply less than three coats on new work. Two are not sufficient.
- 8 — DON'T hurry. Allow plenty of time for each coat to dry well before applying the next coat.
- 9 — DON'T use anything but

DR. TURNER.

Dr. Turner's chapel talk was easily one of the best addresses of the year. The aptness of his expressions, the pointedness of his humor, and the native force of his logic gave to his address that strength which is often lacking in such talks. President Turner is serving his first year in Texas, but has already demonstrated the fact that he is a live wire and will bring things to pass for his institution. — Baylor University.

A Word From the Governor.
Topeka, Kansas.

To Whom It May Concern:
I had the opportunity on very many occasions, last year, to observe the practical working of the new and unique chautauqua system inaugurated by Mr. Keith Vawter, manager of the Redpath Lyceum Bureau. The three simultaneous chautauques moving from place to place offer a week's entertainment, each under the management of a high-class man, seems to me to constitute an ideal chautauqua system. The crowds were everywhere immense and enthusiastic and the economical features of the new system enabled the managers to furnish a week's program far superior to that which would be possible under a more expensive system. It lifts the responsibility from local communities and gives them a series of entertainments of a superior character at the least possible outlay of money and concern. Too much cannot be said in favor of this new chautauqua idea.
Signed, E. W. Hoch,
Governor of Kansas.
January 9, 1908.

The Work of An Artist Is Here

An artist paints nature not as it is, but as it seems. An artist takes a rugged and rusty mountain for a subject. The first strokes of a brush tell us nothing. Presently the colors are mixed and begin to glow. Soon we see the rising sun, the mountain is dotted with trees, a fawn startled into life is gazing in wonderment at you. In the gentle breeze the daisies sway and nod their heads—the lark lifts up his head and the yellow of his breast is of burning gold, the notes of his sweet song are almost heard.

So it is with the designers of Regina hats. Out of flowers, ribbons, braids, and bands they start the hat. As they place something here, a fold there, the beauty of the hat grows and unfolds. Oh, yes! We could take out some of the fine touches and reduce the cost. But women want hats that are beautiful and after all, Regina hats cost less than all others built of the same good materials. Regina hats are "worn by women of style."
