COMING TO MCCOOK

Chief of Staff of Hot Springs **Doctors on Annual Tour**

COMMERCIAL!HOTEL, MAY 5

tation or for Examination

The Chief of Staff of the Hot Springs Doctors is making his annual tour of the state, visiting the towns and cities, calling on their patients in each community, and consulting with new patients who are desirous the great treatment that cures all chronic and nervous diseases of men and women. The phenominal success of the Hot Springs treatment is due to the fact that it removes from the patient's system the cause of disease; usually doctors treat the symptoms of the case, instead of making a complete diagnosis and then removing the cause as do these special

The human body has been the life study of these noted specialists, their skill in the matter of medical diagnosis puts them in the front ranks of American Specialists. After they make a painstaking examination they are in a position to state positively whether or a cure. If they do undertake a cure accumulates around the poles. In the patient is cured. They do this at short, many millions of tons of ice in The ones who eat at the restaurants extremely reasonable cost, they ask no fee at all until the patient is completely cured.

The highest standard of quality is the only standard in the medicines used by living thing is thus destroyed. the Hot Springs Doctors. These expensive medicines are especially prepared for each case, they are from the world's best laboratory, guaranteed by the pure food laws, eliminating all possibility of anyone taking into their treatment.

Chronic and nervous diseases like rheumatism, asthma, bronchitis, goiter, diseases of the heart, blood and lung diseases, catarrh, gallstones, epilepsy, kidney, stomach and bladder troubles and female diseases must yield to the treatment as given by these noted who have been restored to health, in many instances these people could not have been cured were it not for the Hot Springs treatment. For example take University Place, Nebraska. These catastrophe in the shade. Specialists made a careful examination of her case and found that she was suffering from rheumatism, kidney and stomach trouble. After taking treatment, here is what she says in her own words:

> University Place, Nebraska, April 18, 1909.

Words almost fail me to tell how thankful I am for renewed health and strength after suffering with stomach trouble which eventually reached a stage where I could scarcely retain food, and suffered great pain. To add to my trouble I was also afflicted with rheumatism which swelled my feet and hands so that I was helpless. 1 tried several local doctors but their treatment failed to give me any relief. I began to take the Hot Springs Doctors' treatment and commenced to improve at once, and now at the end of twelve months I am entirely recovered and feel as well as at any time of my life. I am glad to recommend the Hot Springs treatment for what it has done for me, to any who may be afflicted in the way I have been.

Mrs. H. R. White.

Here is a testimonial letter from Smith Center, Kansas, that is interesting:

> Smith Center, Kansas, April 14, 1909.

Mrs. Amis is getting along just fine; has not had any of her old dropsical trouble at all this year. It has been just about one year since Kind Providence sent you to Smith Center, and we are certainly thankful for the help you have rendered us. Wishing you unbounded success, we are as ever,

Mr. and Mrs. S. L. Amis. The treatment that has cured these people and restored thousands of others to health is available to the people in this section for it is this wonderful system of treatment that the Chief of Staff

on May 5th, at Commercial Hotel. As the Specialist will be here only one day, it is respectfully requested that people do not call out of idle curiosity. He will be busy with patients who really need his services and it would be an imposition to take up his time idly. It is also important to announce that married women who wish to con sult the Chief of Staff must be accom panied by their husbands, and all minors by their parents. If you are suffering with any chronic or nervous without any intermediate retransmis- them.-Houston Post, disease and desire to be restored to sions. That is the remarkable feat health, vigor and happiness, don't fail which has been achieved after a series to call MAY 5th, 1909.

The permanent offices of the Ho Springs Doctors are located at 14th and O streets, Lincoln, Nebraska.

END OF THE WORLD.

Speculations of Scientists as to How It Will Come About.

The terrible catastrophe in Italy which caused the inhabitants of the ill fated city of Messina to believe that the end of the world had come is only a foretaste on a small scale of He Will Make No Charge for Consul- what many eliment scientists believe will be the end of the world. That eternal problem of how the world will end is, in the opinion of many, a matter of scientific investigation, and it is curious that the majority believe that the earth will open up and fly to pieces in the most gigantic earthquake ever known, an earthquake that will wipe all life from the globe before the actual destruction of the earth is com-

The late Grant Allen firmly believed that the world would end by the crust of the earth eventually giving way beneath the colossal weight above it. And Abbe Dupin, one of the greatest scientists of France, believes that doomsday will begin with a war that will envelop the greatest nations in Europe, this being followed by a plague the like of which has never been known, culminating with an earthquake that will practically shake the world to pieces.

Mr. H. G. Wells, whose scientific prophecies are well known, is, hownot a cure is possible; if not they tell entirely frozen over. It is a well the patient so and refuse to undertake known fact that every year more ice settle about the earth's extremities each year, and, in Mr. Wells' opinion, And what if they did? They are all this will gradually extend until the whole world is frozen over and every

Several scientists are of opinion that we shall perish by fire and this old world of ours with us. Nikola Tesla, the great American, is convinced that, the atmosphere of the world being so fully charged with electricity, the result will be a gigantic explosion by system any poisonous drugs. A cure is spontaneous combustion, when the sure and permanent as a result of taking | world will be entirely encircled with the world famous Hot Springs home flame, which in the space of a few seconds will destroy all life.

Two of the world's greatest scientists firmly aver that the end of the world will be brought about by astronomical conditions. Take Professor Marienberg, the noted Austrian student. In his opinion the earth will fly from its orbit and come in contact with one of the other planets that may do you suppose I'd get from the clerks Specialists. In their Lincoln offices chance to be in a direct line. The are thousands of letters from people earth, being comparatively small, will, Chicago Record-Herald. of course, get the worst of it and split course directly the world swerved from the orbit all living things would die and such an earthquake take place the case of Mrs. White who lives at as would completely put the Italian

> Just as interesting is the prognosti cation of M. Camille Flammarion, one of the greatest living scientists. After many years of study he has arrived at the conclusion that the world will in the twenty-fifth century come across the path of the comet Beila, which crossed our line a few years ago. On this occasion, however, a collision will take place, and, Beila being infinitely greater than the earth, a shock may be expected which, he calculates, will be S65 times greater than the shock caused by the collision between two trains, each traveling at sixty-five miles an hour.-Cassell's Journal.

No "White Rhinoceros." Speaking of carnivora and the other fauna of Africa, let me say for the benefit of the American writers, lecturers and artists who wish to pretend to a knowledge of African animal life that there are no yaks, alligators, kangaroos, turkeys, bears or tigers in Africa outside of a circus or a zoological garden. There are two species of rhinoceros, the bicornis or prehensile lipped and the simus or square mouthed rhino. The latter, although almost as black as its relative, is called the white rhineceros on account of a blue, slaty tinge in its sin. To be exact, there is no such thing as a white rhinoceros,-Captain Duquesne, Famous Boer Hunter, in Hampton's Magazine.

A High Priced Cent.

Several silver dollars of comparatively recent date brought good prices at the recent coin sale held at the Elder auction rooms. One dated 1852 brought \$72. Another silver dellar struck in 1851 brought \$67, and still another of 1839 brought \$61.

Quite a number of early cents sold for high prices, a cent dated 1811

bringing \$22.50. Of the gold coins a North Carolina five dollar piece brought \$33.50, and a Mormon five dollar piece of 1849 sold for \$25.-New York World.

Phonographs In China.

American phonograph companies do a big business in China. The most famous Chinese bands and palace singers are engaged to make records. They of the Hot Springs Doctors brings to us are brought from all parts of the empire to the three record making centers-Pekin, Shanghai and Hongkong. Here the apparatus for making the master records is set up and the recording done under the direction of an expert. A record popular in the north of China seldom is popular in the

A FOOLISH OBJECTION.

Mrs. Sniggleigh Calls the Turn on Her Better Half.

was feeling a little peevish, "I can't understand why you have to spend so much money for clothes. Here we are strangers in a strange city. We go to ne balls, no receptions, no musicales or anything of that kind. Yet you appear to think it necessary to have a new gown made every week poisons. or two, and your bills for hats are simply enormous. It seems to me you might well economize a little. I hoped when I accepted my position in this you to answer that question!" town to be able to save about twoway things are going I shall never be swered. able to get ahead at all. I'll simply have to stay here and work away to the end of my days. I don't spend any more money for clothes than is absolutely necessary. Why should 1? ever, of a different opinion. The world | Who notices me outside of my office? will end, he declares, by its becoming Nobody. It is the same in your case. What do the people who pass you in the street care whether your gowns are made in the latest style or not? excess of that of the year previous to which we sometimes go don't care a son about your hats or ceats or furs. strangers to you. You ought to have some sense about these things. I hope you don't think it makes a particle of difference to the people you see in the cars when you go into town whether you are dressed as the wife of a millionaire might dress or not To speak plainly, Jessica, I'm getting rather weary of your extravagance. I wouldn't kick if a lack of fine clothes were going to deprive you of social pleasures. But your costly hats and elegant gowns don't seem to have helped you on at all. Nobody calls on you, and you are never invited to anything worth while."

"Why, Jonathan!" Mrs. Sniggleigh replied, perhaps a little more in anger than in sorrow. "You talk like a crazy man. You can't understand these things. What kind of attention in the stores if I didn't dress well?"-

Would He?

At a trustees' examination of the pupils of a public school in a New England town the queries were met so satisfactorily that the principal speaker finally announced himself highly pleased and that he would be glad to answer any question that the pupils might in turn put to him.

After much reflection one little chal arose and made known his desire to put a question. Permission being granted, he dazed the trustee with this

"If you, sir, was in a soft mud hear way up to your neck an' I was to heave a brick at your head, would you duck?"-Lippincott's Magazine.

Turn About.

"What," shouts the patron of the restaurant, "\$15 for coffee and rolls! It's outrageous. I won't pay it."

"Yes, you will," calmly states the proprietor. "My wife went into your millinery shop yesterday and paid \$50 for some wire frame covered with two feet of lace and an artificial rose. Now you see how it feels, don't you?" Judge.

A Plausible Statement.

"My dear, why did you put so much on the table? Why did you have chicken salad at my end and roast beef at yours?"

"Because you told me this morning that you wanted me to make both ends meat."-Baltimore American.

A POISON EPISODE.

When a Famous Chemist Was Silenced In Court by a Judge. There was a famous poisoning case

in England many years ago in which the strong point of the defense was to show that the accused, who was an expert chemist, would not have used a poison which could be so easily found after it had been taken into the human system. Sir Robert Christeson, "My dear," said Mr. Sniggleigh, who professor in Edinburgh university, a famous expert on toxicology, whose works are still standard on that subject, was put on the stand to prove this point. When he declared that a never are invited out anywhere. We chemist would certainly use some poison which would leave no trace, the prosecuting attorney asked him if he meant to say that there were such

Sir Robert replied in the affirmative. The prosecutor asked, "Name them!" "No." shouted the judge. "I forbid

In spite of the protests of the prosethirds of my salary, so that it would cutor the judge would not allow the be possible in a few years to refire, expert publicly to give the name of a after which we could travel and live poison which would leave no trace. in some more congenial climate. The and the question remained unan-

Now comes the curious part of the story. During the next two years Sir Robert received more than 4,000 letters from all parts of the world asking, begging, offering to buy, the name of the untraceable poison alluded to in his testimony. Many of these he kept as curiosities, showing them to his friends as evidence of the depravity of human nature. Some of the excuses for wanting the name of the poison were very ingenious. One man was writing a novel based on a poison plot and wanted to make use of the untraceable poison idea. He did not want to give the name of the poison in his book, but just wanted to have it by him in case any scientific critic should deny the possibility of such poisons, when he could send him the name in a private letter and quote the "distinguished authority" from whom it came, etc. Several persons professed to be studying chemistry and asked for the information on the ground of professional courtesy. To all such Sir Robert would send the advice to pursue their studies and they would soon know as much about it as he did. Many offered large sums of money for the secret, usually pretending they had bet still larger amounts that they could find it out in a given time and were willing to share their profits liberally with Sir Robert,

The thing which most impressed Sir Robert was the number of persons all over the world who seemed desirous of possessing the secret of an agent that would kill, but leave no trace, and the amazing falsehoods to which they would subscribe their names in order to obtain the information. It is said that whatever poison Sir Robert had in mind at the trial he never mentioned it, not even to his classes, so strongly was he impressed with the danger of letting such a thing become matter of public knowledge.

Washington's Spring.

The first thing that greets the eye of a stranger alighting from the train at Cold Spring, a village resting snugly in the highlands of the Hudson, is Washington's spring, inclosed by three bowlders in the rough, which, as one approaches, are seen to contain a tiny pool of spouting water. An inscription in relief upon the bronze plate announces that "General George Washington, in frequent visits to the American troops encamped near by during this spring and gave it its name, Cold

The encampments referred to were principally upon the famous Constitution island, just below, to which was attached one end of the great chain which was stretched across the river to West Point and checked navigation by the British warships during th Revolution.

Nietzsche and the Invalid.

An invalid lady who often met Nietzsche found him the gentlest, kindest and most sypmathetic of men. He "implored her with tears in his eyes not to read his books." Such was his knowledge of women that he was thunderstruck to find shortly afterward that the lady at once proceeded to read them all. He was further stupefied by the discovery that, having read them, she was utterly unmoved by the philosopher's unanswerable demonstrations that feeble persons like herself had no right to live and that women were distinguished by this, that and the other objectionable attribute. It must have been a blow to him.-London News.

Her Awful Sin.

A little girl of six once went in great distress to her mother, saying that she had committed a sin which could never be forgiven and which was too bad to be repeated. By dist of a little coaxing she was induced to make full confession, which was in this

"I felt so sorry for poor Satan and I wanted to give him a little comfort So I got a glass of cold water and poured it down a little hole in the kitchen floor.'

Discourteous.

At a game of "definitions" a discourteous wag gave just offense once by defining woman as "a creature that was made after man and has been after him ever since."

Her Exact Age. "How old is Belle? "Twenty-four her last six birthdays." -Boston Transcript.

Benevolent feeling ennobles the most trifling actions. - Thackeray.
