Heart Strength

Heart Strength, or Heart Weakness, means Nerve Strength, or Nerve Weakness—nothing more. Positively, not one weak heart in a hundred is, in itself, actually diseased. It is almost always a hidden tiny little nerve that really is all at fault. This obscure nerve—the Cardiac, or Heart Nerve—simply needs, and must have, more power, more stability, more controlling, more governing strength. Without that the Heart must continue to fail, and the stomach and kidneys also have these same controlling nerves.

This clearly explains why, as a medicine, Dr. Shoop's Restorative has in the past done so much for weak and ailing hearts. Dr. Shoop first sought the cause of all this painful, palpitating, suffocating heart distress. Dr. Shoop's Restorative—this popular prescription—is alone directed to these weak and wasting nerve centers. It builds; it strengthens; it offers real, genuine heart help.

If you would have strong hearts, strong digestion, strengthen these nerves—re-establish them as needed, with

WE SPREAD OUT.

Advice to Employer Got From His Boss in Apprentice Days.

The man was working on the side of a steeply sloping roof. All of a sudden his foot slipped, and, with a groan, he began to slide down slowly toward the edge.

As he slid he clutched with tense fingers at the tin, but it was smooth. It offered him no hold, and his speed gradually but surely increased.

As in a sitting posture, like a tobogganer, the man continued his deadly slide he began to pray in a loud, anguished voice.

Memory, as if in answer to his prayer, flashed across his brain the words: "Spread out."

The man instantly lay flat on his back, spreading arms and legs to their widest angle, making himself as much as possible like a starfish. And his speed at once decreased. The additional friction surface acted like a brake. A few feet from the edge of the roof he came to anchor.

"Help!" he then shouted. But the slight movement of shouting acted like a push, and he slipped down a few inches more.

"Help!" And again he slid a little. But this time help came. A rope was thrown, and the man climbed back to safety.

He wiped the dews of terror from his brow.

"My boss in my apprentice days," he said, "told me if I ever started sliding down a roof slope to spread out and it would stop me. I didn't believe him; but, by Jingo, he was right."

The man smiled and sighed, musing on his long dead boss. Then he crawled back to his dangerous work on the steep slope of the roof.—Philadelphia Bulletin.

A LOST ART.

Secret of the Tools Used by the Incas and the Aztecs.

What was the combination of metals from which the Egyptians, Aztecs and the Incas of Peru manufactured their tools and arms? Though each of these nations reached a high state of civilization, none of them ever discovered iron in spite of the fact that the soil of all three countries was largely impregnated with it. But they substituted for it a combination of metals that had the temper of steel, and the secret of the combination is lost to mankind.

Humboldt tried to discover the lost art by analyzing a chisel found in an ancient Inca silver mine, but all he could make of it was that it appeared to be a combination of a small portion of tin with copper. No present known way of combining these two metals will give the hardness of steel, so there must have been something else in the chisel which Humboldt missed.

And these ancient races were able to prepare pure copper so that it equaled the temper of the finest steel produced at the present day by the most scientific process. With their bronze and copper instruments they were able to quarry and shape the hardest stone, such as granite and porphyry, and even cut emeralds. The ancient peoples must have independently discovered the art of tempering copper, and yet it is a secret that baffles modern scientists of the whole civilized world.—New York Times.

Lemon Omelet.

Put the yolks of four eggs into a bowl with a tablespoonful of sugar. Beat until light and add the grated rind of a lemon. Whip the whites of the eggs to a stiff froth and mix lightly with the yolks. Then stir in a fourth of a teaspoonful of baking powder. Pour in the omelet pan, in which a tablespoonful of butter has been melted, and bake in a moderate oven for ten minutes. When done cut the omelet in half, put on a hot platter, with the following lemon jelly between the layers, and serve as quickly as possible.

Lemon Jelly.—Take one-half cupful of sugar, a tablespoonful of butter, the juice and rind of one lemon and two well beaten eggs. Beat together and stir over the fire until thick.—Delineator.

A Weed That Steals Oysters.

A seaweed has invaded the oyster beds of France and carried off 400,000 oysters. It has carried them off bodily, as a thief would do. The minute seeds of this weed float up the English channel in the current of the gulf stream; they settle on oysters in the Breton beds of Morbihan, Quiberon and Belle Isle, and they grow to the size of a duck's egg. They are full of water, but at maturity the water evaporates, and air takes its place. The egg shaped seaweed is then a balloon, and like a balloon, it lifts its oyster from the bottom and bears it out to sea.

Walking in New York.

Men walk more rapidly in the streets of New York city than in any other city in the world. The average speed during the business hours, according to the most careful calculations possible, is four and one-tenth miles an hour. After sunset the pace drops nearly one mile an hour.—New York Herald.

THE MYSTERY OF MARS.

Old but Unsolved Problem, Is There Animal Life on the Planet?

With a planet so old as Mars and so far along in the process of life extinction the conditions of life would be severe, and only a highly intellectual and scientifically developed race could endure and master them. The engineering skill and constructive capacity to control the annual floods from the poles, store the waters and build the thousands of miles of huge canals would require scientific knowledge beyond that possessed by us at the present time and financial resources in excess of those we have yet accumulated. The nation that finds the digging of a little ditch at Panama so great a task would be helpless in the face of such a problem as these thousands of miles of Martian canals. If, indeed, canals they be. Yet, in view of the greater life age of Mars, such higher intelligence would be natural in the regular process of development, assuming that it has ever been the abode of intellectual life.

Scientists are in the main in a receptive state on this subject. They are not ready to admit that the existence of life on that planet has been proved. They do not deny it, but call for greater proof than a plausible theory. Among others than scientists there is in the main a disposition not to accept the Martian human life theory or the theory of life on any of the thousands of spheres that wheel and glister in illimitable space. They seem to think that such a theory conflicts with religion and dwarfs man and his importance in the scheme of creation.

This seems to be a very narrow view to take, since it appears to set bounds upon the infinite power and creative desires of the Almighty, whose great scheme of mortal and immortal life is not necessarily confined to a single planet or the few billions of human beings who are born and die upon it. As to dwarfing the importance of man, a few billions more added to the billions on earth would make little difference. Man is at best a small and insignificant creature, but if all embracing wisdom, power and love takes so solicitous note of him it would be limiting those infinite qualities to say that one planet must be his abiding place. Therefore the question of human intelligence on Mars or any other planet of the solar system or the other great systems in remote space should be purely and simply a scientific one, to be accepted as true only when proved, but not to be rejected through sentiment or for any other reason whatever except lack of proof.—St. Louis Star.

An Oriental Blessing.

A well known representative from China, who was a guest at a wedding in a capital city, was approached after the ceremony by the best man and jocularly asked to go over to the young couple and pronounce a parental blessing. The obliging dignitary complied with pleasure. Placing his hands on the blushing bride and shaking bridegroom, he said: "May every year bless you with a man-child offspring until they shall number twenty-five in all. May these twenty-five man children offspring present you with twenty-five times twenty-five grandchildren, and may these grandchildren—"

But the little bride grew hysterical about this time, and the oriental blessing was ended amid the laughter of the guests.—Ladies' Home Journal.

A Cowboy Spider.

"Faking aside," said the nature student, "there is in New Zealand a cowboy spider. This creature throws a coil of web like a lasso over its prey's head, then adds more and more coils and when the prey is bound hand and foot devours it."

"There is a Borneo spider that in the spring days plays a fiddle. It is a common thing for a lovesick spider to dance before his girl, but this Borneo boy my drawing his arm across his tum produces a sweet, clear note. Whenever he sees a good looking young lady spider he stops and gives her a tune, hoping to win her by music.—Philadelphia Bulletin.

Miners' Freedom From Cancer.

"Miners never have cancer. In thirty-five years' practice in a mining town I haven't had a single cancerous patient."

"And to what, doctor, do you impute this immunity?"

"Miners are singularly cleanly. They bathe every day. They rarely smoke. They are a temperate and regular set. Above all—"

The physician smiled grimly.

"Miners," he said, "die young. Cancer is an old age disease. And they really are the reason of the miner's cancerous immunity."—Cincinnati Enquirer.

Not the Same.

"Excuse me," he said as he entered the public library at Peugantie, "but do you have any social registers here?"

"No, we haven't," said the librarian with considerable hauteur. "This here 'buddin' is hot up by steam, and we haven't got nothin' but radiators, and we don't allow no settin' around with your feet on to them neither. The nearest thing we got to a social registry in this town is the postoffice stove."—Lip-pincott's

WHAT IS A SALOON?

From a man in the penitentiary, who was sentenced there for crime which he committed while drunk:

- "A bar to heaven, a door to hell;
- Whoever named it, named it well.
- A bar to manliness and wealth;
- A door to want and broken health;
- A bar to honor, pride and fame;
- A door to sin and grief and shame;
- A bar to hope, a bar to prayer;
- A door to darkness and despair;
- A bar to honored and useful life;
- A door to brawling, senseless strife;
- A bar to things true and brave;
- A door to every drunkard's grave;
- A bar to joy that home imparts;
- A door to tears and breaking hearts;
- A bar to heaven, a door to hell;
- Whoever named it, named it well."

Killed By His Own Car.

G. B. Frederick, who was a son-in-law of John Flury, living southwest of Cambridge, was instantly killed by being struck by a street car in Denver, Monday, at 12:30 o'clock.

Mr. Frederick formerly lived in Cambridge, being section foreman. He has for the past three years been conductor on the Denver street car line, and was killed by being run over by his own car while changing a trolley.

Decased leaves a wife and one son aged 11 years to mourn him.

The remains were shipped to Cambridge; funeral was held at the Methodist church, Sunday at 2 p. m., and burial in Cambridge cemetery.—Cambridge Clarion.

Eclipse in June.

As the month of June is just upon us, it may be well to state that there will be two eclipses in that month this year. The first will be a total eclipse of the moon on the evening of the 3rd of June, commencing about the time of the moon's rising, and continuing till about 9 o'clock p. m.

The second will be a partial eclipse of the sun, on the 17th of the month. This eclipse will be late in the evening, and will not be over before the sun sets. There will not be over three-tenths of the north side of the sun covered by this eclipse, but that will be nearly one-third of center face of the sun, and will be well worth seeing.

Missions and Church Extension.

The Methodist people lifted an offering for Missions and Church Extension, last Sunday, amounting to \$152.60. The pastor informs the writer that this sum will be increased at least \$100.00 more between now and conference in September. The amount raised for these purposes, last year, was but \$113.00.

Stomach Trouble.

Your tongue is coated. Your breath is foul. Headaches come and go.

These symptoms show that your stomach is the trouble. To remove the cause is the first thing, and Chamberlain's Stomach and Liver Tablets will do that. Easy to take and most effective.

Which do you think won?

Not long ago two men, athletes, went into a contest to see which could stand erect and hold his arms stretched out full length at either side of his body for the longer time. One man had fed on steaks and chops, sausage, ham, roast beef, etc.; the other ate heartily, but confined himself to such foods as Quaker Oats, rice, macaroni, etc. Which do you think held out longer?

The first man lasted twenty-two minutes. The Quaker Oats-macaroni-ribe chap concluded to stop after he had been at it more than three hours.

There's more strength and economy in eating lots of Quaker Oats than most people imagine.

Every family should eat plentifully of Quaker Oats at least once every day; breakfast is the best time. It strengthens you for the day.
