

## Thought Microbes In a Drop of Ink.

When applied to the newspaper page they make people think twice.

First, people think there's a man who keeps up with the procession.

Second, they think he must keep good goods on hand.

Again, if the home paper has enough drops of advertising ink on its surface to make a proper showing the outsider thinks this must be a pretty lively town.

Thus a drop of NEWSPAPER ADVERTISING INK is a good thing for the town.
