

## Cotton Holds Wrinkles —Wool Holds Style

You don't care what your clothes are made of—all you want is the result.

If somebody could invent a way to make more lasting and more stylish clothes out of part cotton than out of pure wool, you would prefer the cotton.

## Clothcraft All-Wool Clothes

But the facts, as you know, are that part cotton clothes hold wrinkles and keep shabby while clothes of pure wool hold style and keep shapely.

Clothcraft Clothes are pure wool—there's a Signed Guarantee in each suit. And they sell at the

same prices as part-cotton clothes.

They are the ONLY clothes at these prices that are Guaranteed pure wool.

As soon as enough people find out about these clothes, we won't be able to get enough from the factory to supply the demand.

C. L. DeGroff & Co.

### Congressman Norris One of the Lecturers

J. L. McBrien, who was recently placed at the head of the Nebraska university extension work, has secured among other speakers Congressman Norris of our city for the delivery of lectures in the state. These lectures are given free by the gentlemen delivering them. Congressman Norris spent last week and part of the present week in this work, and the Lincoln Journal refers to his work in the following language:

Congressman Norris gave his lecture, "A Dream of Peace," at Guide Rock Tuesday night. Wednesday forenoon he addressed the Superior high school pupils on "The Panama Canal." Wednesday night he lectured at Cadams. Thursday afternoon he addressed the pupils of the public school at Hubbell, and Thursday night he lectured there to a large audience. Friday afternoon he addressed the pupils of the high school at Wymore and Friday night he was greeted there by a large and appreciative audience. Sunday night, Oct. 10, he gives his great lecture, "A Dream of Peace," at Trinity M. E. church, Lincoln. Next Monday night he will lecture at Adams on "Cannonism and the Remedy." Next Tuesday night he lectures at Geneva and Wednesday night at Harvard. Then he returns to his home at McCook for the remainder of the week. He will devote the last two weeks of October to university extension lectures in Nebraska. Of Judge Norris' lectures, Mr. McBrien says: "I have heard Congressman George W. Norris in his great lecture, 'A Dream of Peace.' It ranks with 'The True Grandeur of Nations,' the great lecture that made Charles Sumner famous. Judge Norris served as a member of the world's peace congress at The Hague. He, therefore, speaks from a full under-

standing of the attitude taken by the leading civilized nations in behalf of world-wide peace." This lecture has been given on the leading chautauques' programs throughout the country and it should be heard by everyone who believes that peace hath her victory no less renowned than war, says Mr. McBrien. "It is a classic that is filled with the sentiment of the sermon on the mount."

"The lecture by Judge Norris on 'Cannonism and the Remedy' is the lecture of the hour. It is a scholarly, truthful and fearless exposition of the evils of the rules now governing the national house of representatives by the leader of the insurgent forces against the czarism of Speaker Cannon. It should be heard by every true American who believes in a government of people, by the people, and for the people. It is just such gospel as Judge Norris is making that will save the government from perishing from the earth."

#### Legal Blanks Here.

This office carries all kinds of legal blank forms and makes special blanks to order promptly and accurately.

### OIL MADE EARTH ROADS.

New Product Which Will Keep Dirt Highways Hard and Smooth.

Now it is possible to make smooth boulevards out of rough country roads at a comparatively small cost. Protracted rainy weather may prevail or regular "gully washers" may come, but the roads treated by the new process will keep hard and smooth even though mud is knee deep in the ditches and in the fields. A prominent oil company asserts it has solved the problem. The general manager of the fuel oil department of that company in New York city states that for several years his company has been making tests to perfect an oil which would serve the same purpose on the earth roads in the country and small towns as the asphalt road oil does on the macadamized boulevards. In April the company placed on the market the standard macadamized asphalt binder oil for earth roads. Tests have been made in different parts of the United States, and the general manager says it has been thoroughly demonstrated to be a complete success. To show his confidence in the oil, arrangements have been completed to build a small section of road at Independence, Mo.

The process of making good roads with this new brand of road oil is very simple. First the road must be plowed thoroughly and then run over several times with a harrow, after which it should be rounded with a grader and dragged to make it hard. After this it is ready for the road oil.

"The cost of this process is far less than the rock or macadamized roads, of course," said the manager. "It will cost from \$500 to \$600 a mile to thoroughly oil an earth road the first time. The cost after that is far less each year to keep it oiled."

"It is expected that this new process will revolutionize road building. We receive thousands of letters from all parts of the country asking for complete details. The demand has been so strong it has been necessary to have printed matter prepared on the subject. The good roads movement is spreading rapidly. It is one of the most striking evidences of continued and substantial prosperity. Good roads enhance the value of property and the pleasure of living in the community."

### CONCRETE BLOCKS FOR ROADS

Only the Wheel Track Is Paved, Reducing Cost of Construction.

Orlando H. H. Dickson of Jacksonville, Fla., one of the most active champions of good roads in Duval county for many years, has received word from his attorney at Washington that a patent has been allowed on his concrete block for constructing roads. The authorities at the patent office at first refused him a patent because the method was, they thought, in conflict with other similar roads that had been patented, but Mr. Dickson employed a first class attorney, who fought the matter through to a successful issue.

The road as patented consists of heavy concrete blocks in shape not unlike common T rails laid on their sides, except that they are much larger and only three or four feet in length. They have a mortise on one end and a tenon on the reverse end and so are locked together, making them a continuous road, but easily repaired if broken, as one block can be taken out and another one inserted in a few moments' time. The groove is large enough to easily carry an automobile tire, and such a road can be built with a double track at less cost than ordinary first class country roads cost. Mr. Dickson is in correspondence with several manufacturers of machinery for concrete work, who assure him that a machine can be constructed to turn out several hundred blocks in a day at small cost for labor. A short piece of the road is now in use between Jacksonville and Apoka and has been tested enough to prove its complete adaptability as a first class road for farm vehicles or automobiles.

### Crushed Coral For Roads.

General Carlos Garcia-Velez, minister from Cuba to the United States, who has been traveling in the west to promote reciprocity sentiment, says that Cuba boasts of more than 1,300 miles of the most excellent macadam roads in the world.

"We used crushed coral in our roads in Cuba," said he, "and there is no better medium for road building known. It is practically impervious to water and when rolled smooth preserves for many years its continuity. Our government has expended \$15,000,000 in the past three years in this kind of improvement and will continue until we have a perfect system of roads."

### Good Roads Would Help Everybody.

The good roads movement is an economic movement, a thing that touches somewhere and at some time touches the "pocket nerve" of every producer and every consumer in the land, a factor as indispensable as navigable inland waterways to the fundamental settlement of all freight rate questions. A real and stable macadam highroad between Denver, Kansas City and Chicago, for instance, would be of more benefit to the economic development of Colorado than forty successful appeals to the interstate commerce commission.

### Good Road Campaign.

The chamber of commerce of Wichita Falls, Tex., has engaged in a campaign of education on good roads subjects. It is sending out speakers with stereopticon exhibits to lecture in county schoolhouses on the advantages of improved roads and to secure signatures to a petition to the county commissioners to call an election to vote on a \$100,000 bond issue for the construction of good roads in the precinct or district.

## HUMOR OF THE HOUR

### Brave Girl.

"Saved!" cried the beautiful girl in triumph. "Saved!"

The old gentleman in the easy chair dropped his paper in astonishment.

"Who is saved, my daughter?" he interrogated with alarm.

"The whole city. My name shall go down to posterity as a heroine."

Still the old gentleman was visibly perplexed.

"But, my dear, I haven't heard of any great conflagrations or earthquakes. In what way was the city in danger?"

It was then that the beautiful girl came over and sat on the arm of his chair.

"Listen, father, and you shall hear. Twenty minutes ago Perceval Van Pickle proposed to me and vowed if I refused to become his wife he would jump into the main reservoir and end it all. When I thought of those twenty packs of Turkish cigarettes Perceval carries in his pockets I knew the water would be poisoned and the people doomed. Then I—I accepted. Don't you think I am a brave girl?"—Chicago News.

### The Ever Delicate Question.

"How old are you, madam?" asked the cross examining lawyer. The woman blushed deeply and stammeringly blurted out:

"I—I— and stopped short.

The attorney looked guilty. "Please, madam, quickly," he urged in a gentle, kindly voice. "It's getting worse every minute, you know."—Success Magazine.

### What Puzzled Him.

"What you want to do," said the druggist as he handed the old dinky the patent medicine, "is to take a dose of this after each meal."

"Yes, suh," was the reply. "an' now will you please, suh, tell me whar I'm gwine ter git de meals?"—Atlanta Constitution.

### Ma a Phrenologist.

"Pa, what do they call a person that reads heads?"

"A phrenologist, my bry."

"Gee! Then ma must be one of those things. She felt my head this afternoon and said right away, 'You've been swimming.'"—Detroit Free Press.

### Victims of Circumstances.

"Did any of your ancestors have insanity?"

"I'm afraid so."

"What was its cause?"

"The lack of facilities for employing alienists to show they were all right."—Denver Republican.

### Progress.

Reggie—I see you're still among the admirers of the popular Miss Peachley. How are you getting along?

Algy—Well, I think I've climbed to the top of the second division in her percentage column.—Chicago Tribune.

### Marked Down From Thirty-nine.

"While woman may have her face on the dollar," said the corn fed philosopher, looking thoughtfully at the coin. "yet, to tell the truth, she is more apt to have her eye on the 38 cents."—Indianapolis Journal.

### An Offhand Opinion.

"Do you think anybody ought to read that book?"

"Judging from the immense interest it appears to have created," answered Miss Cayenne, "I should say not."—Washington Star.

### Opposites.

Miss McQueery—You and Mr. Sophly correspond, do you not?

Miss Giddy—Oh, gracious, no! He's real dark complexioned, while I'm quite a decided blond, of course.—Philadelphia Press.

### Foolish Question.

"He told me if I didn't kiss him he'd drown himself."

"And did you kiss him?"

"Have you read anything about his committing suicide?"—Cleveland Leader.

### Applied Mechanics.

Boggs—Going out motoring this morning?

Toggs—Not for awhile; my wife's using my starting crank on her wringing machine.—Boston Herald.

### Touched.

Poetics—He told me a very touching story.

Hardhead—And how much did you have to let him have?—Cincinnati Times-Star.

### An Infant Industry.

"Airships are just in their infancy."

"Yes, and they're mighty hard to raise."—Cleveland Plain Dealer.

### Lyrical L'Africanique.

[In this the peculiar songs of the desert are admirably reproduced.]

The ostrich speeds across the sand. Gay beplumed is he and grand. He careth not for Teddy and His slaughterously inclined band. Gluschee gawawa quae-cooka-ee! Gawawawa!

The zebra zigzags o'er the zade\* And joins the zooful serenade. Where, resting in the zephrous shade, They fear no Teddine fusillade. Zillipopopwa! Zillipopopwa!

Situch!

The amphibious hippopot.

Who lives where it is very hot, Will have to hide an awful lot To hide the hide that he has got.

Woo buboo! Woo buboo!

OO-OO-OO-plububupp!\*

\*Zade—A kind of pluff.

\*\*This is the kind of noise the hippopot makes when dead or dying.

—Puck.

## A Poor Weak Woman

As she is termed, will endure bravely and patiently agonies which a strong man would give way under. The fact is women are more patient than they ought to be under such troubles.

Every woman ought to know that she may obtain the most experienced medical advice free of charge and in absolute confidence and privacy by writing to the World's Dispensary Medical Association, R. V. Pierce, M. D., President, Buffalo, N. Y. Dr. Pierce has been chief consulting physician of the Invalids' Hotel and Surgical Institute, of Buffalo, N. Y., for many years and has had a wider practical experience in the treatment of women's diseases than any other physician in this country. His medicines are world-famous for their astonishing efficacy.

The most perfect remedy ever devised for weak and delicate women is Dr. Pierce's Favorite Prescription.

IT MAKES WEAK WOMEN STRONG,

SICK WOMEN WELL.

The many and varied symptoms of woman's peculiar ailments are fully set forth in Plain English in the People's Medical Adviser (1008 pages), a newly revised and up-to-date Edition of which, cloth-bound, will be mailed free on receipt of 31 one-cent stamps to pay cost of mailing only. Address as above.
