AT OUR JOB PRINTING OFFICE

A Brief Word of Obituary.

Mrs. Marie Freibs, whose death was briefly noted in last week's Tribune, was born in Mechlenburg, Germany, April 12 b, 1827. She came to America and Red Willow county in the fall of 1884, where she lived until her death on November 22, 1909, at the home of her son in law, Joseph Boos, near the city. She was 80 years, 8 months, 9 days old board the marvelous speed and accuraat her death, which was peaceful and cy insured by my great system of addisubmissive, the result of old age and incident weakness. The funeral was h id, last Wednesday, from the home of J. P. Colling in Indianola.

A CARD OF THANKS.

For the many kindnesses and for the and p of friends and neighbors in the illness and after the death of our dear one M-s. Marie Freihs, we return one and

all our thanks. MR. AND MRS. JOS. BOOS AND FAMILY. MR. AND MRS. CARL SCHUEIZ AND FAMILY.

Contains no opiates or other harmful drugs. Keep always on hand, and refuse the substi-A. McMillen.

Christmas Presents

Are Now In Order Mr. Timid (hearing noise at 2 a. m.) travagant. But you must make allow-

Your business is one of your best friends. Why not give it a suitable present - some new and attractive stationery, for instance, such as we are prepared to print for you at right prices?

HIS STURDY WATCH.

the Aid of a Knife.

"Some men, don't you know." said Mr. Grillkillton, "will step off a curb. step down about a foot and break a leg, and then another man will tall of the top of a seventeer, story house and not even muss his clothes. And it's about the same way with watches.

"I dropped my watch the other day about six inches on to a time plush carpet, and it cost me \$16 for repairs. When I was out walking with my friend Bwillkwillby this morning be dropped his watch on the sidewalk. and it didn't so much as stop h.

"It sounded when it came down like a safe falling out of a high window. and it was only a two dollar watch and I expected, of course, to see Bwill kwillby just kick the fragments off the sidewalk and pass on, but it seems Bwillkwillby knew the watch better He picked up the crystal, not even cracked, from where it had flown, seven feet away, and put that in his pock et, and then he looked at the watch-

"It was going all right, but some how in the fall the long hand had got bent. He straightened out that bem hand with his pocketknife so that the two pointers wouldn't catch, and then he pried off the crystal rim of the watch and put the crystal back in place, and then he snapped the rim back on the front of the watch again and dropped the watch in his pocket and started on, and 'As I was saying. he said, just as if nothing had happened."-Washington Post.

BESTING THE BOASTER.

A Little Problem That Floored the Lightning Calculator.

"Now, gentlemen," concluded the lightning calculator, "I 'ave demonstrated to you upon this 'ere blacktion, substraction, division and multiplication, and I trust that you are all satisfied with the results. Now, gentlemen, I 'ave 'ere a little shillin' booklet explainin' my marvelous system in full and by a careful persual of which I will guarantee you to become as expert a lightnin' calculator as myself within the period of one week, by which time I shall be out of the town. Ahem! Now, gentlemen, when you recall that I was straight away able to multiply 1,111,111,111,937 by 937,111,-111,111,111 perhaps you will"-

"One moment, sir!" called out a shrill voice from the back of the crowd. "But will you answer me a question? I'm no scholar myself, but I was wondering the other night how old a child born in September, nineteen nought gine, would be in September, nineteen

The lightning calculator threw his interrogator a look of contempt. "One year, of course, my little man,"

be replied sarcastically. "Well," retorted the shrill voice, "! think if you were to go home and improve your own arithmetic you would find that child would be 17,101 years old."-London Answers.

A Matter of Smokestacks. The smokestacks on ocean vessels of

recent years have been made to slope backward more particularly to give the steamer a rakish air, the masts also being given the same slope. As to the effect on the draft, there is a slight one, as the wind pressure on the front of the stack sloping up and over the top of the stack is more apt to draw the smoke out than to cut it off, but from all we are aware of this seems to have been held of secondary consideration. The shape of the smokestacks also is changing from round to eval so as to present less surface at the front. If you compare the steamers with the sloping and straight smokestacks, in one case the former, while motionless, still appears to have life, while the rigidity of the other gives it an appearance of stiffness even while under considerable speed --St. Nicholas.

The Hunter and the Wind.

In hunting against the wind in open forests more game is passed than many hunters would suppose. The aumals see the man, note that he will pass them and hide by getting as near to the ground as possible. If they scent him after he has passed they evidently realize that the danger is over, though some, mostly the younger, inexperienced animals, then sheak off. Where game is very wild it is often in such localities as I have mentioned only possible to approach them with the wind by outdistancing the latter. because a big game animai at rest depends on its nose to save it from danger in the direction from which the wind comes and on its eves to watch the side from which it can get no other warning - "Track and Tracking," by Josef Brunner.

Welsh National Costume.

When the French made a half hearted attempt to invade Great Britain in 1797 a landing was made at Fishguard, Wales, but the soldiers of Napoleou were frightened off by the sight of a great number of Welsh girls and women, whom they mistook at a distance for soldiers on account of their red dresses and tall black hats. That is still the national costume of the Welsh

WINDOW GAZING.

He Keeps It .In Repair Himself With A Fascinating Occupation For the rourist In Paris

> is indow gazing is one of the recogthe a vocations of the tourist in Paris. In crybody changes in this inscinating or apation, and, in truth, it would be Im assible to resist the temptation, lefthe coust be utiful wares are set force to the most artistic manner, and the only way you can withstand the desire for pessession is to leave the coin of the reason and even your leiter of Challe at home; otherwise there is in terring into what excravagance, not to sa, waciesa pinchase, you may be per strated when probably you have has gene out for a morning stroll of adi tinese windows the jewelers

> seem to be the greatest unignets. 140 the bewildering part of it is that to the man or woman maversed in the knowledge of precious stones the matations thereof look quite as good as the genuine articles. Pearls, diamonds rubies, emeraids and so throughout the long list stones are so perfectly im itated that it is small wonder many American women succumb to the temptation of buying them. But there the temptation does not end, for they bring them home with all the intento dazzle, newlider and deceive their unsuspecting relatives and friends with the magnificence of their sudden ty acquired wealth of jewels. Women whom one would never suspect of wearing Imitation gems frequent the shops where they are for sale in Paris in the most open, not to say brazen, manner, while the foreign papers fair ly bristle with advertisements of reconstructed and imitation gens, which only goes to show what a incrative business it must be. - New York Trib-

AN OLD BUSYBUDY.

What the Bridegroom Thought of the Old Native at the Station.

While waiting for the train the bride and bridegroom walked slowly up and down the platform

"I don't know what this joking and guying may have been to you," he re marked, "but it's death to me. I never experienced such an ordeat."

"It's perfectly dreadful," she an swered. "I shall be so glad when wget away from everybody we know." "They're actually impertment," he

went on. "Why, the very natives"-At this unpropitious moment the wheezy old station master walked up to them.

"Be you goin' to take this train?" he asked

"It's none of your business," retorted the bridegroom indignantly as he guided the bride up the platform. where they condoled with each other over the impertinence of some of the natives

Onward came the train, its vapor curling from afar. It was the last to their destination that day-an express. Nearer and nearer it came at full speed; then in a moment it whizzed past and was gone,

"Why in thunder didn't that trans stop?" yelled the bridegroom. "Cos you sed 'twarn't none of my business. I has to signal if that train's

to stop." And as the old station master sorely stroked his board there was a wicked twinkle in his eye .- London Tit-Bits.

He Was Acting.

Stephen Phillips, the dramatist and poet, began life as a member of F. R. Benson's repertoire company. An amusing story is told of his debut. Mr Benson had told him that the great thing for an actor is to act. "It does not matter," he continued, "so much what the words are which the actor speaks as the impression which be conveys to the audience by those words. Then he gave Mr. Phillips the part of Balthazar in "Romeo and Juliet." On the first night Balthazar managed the first line of his part and then forgot the rest. Romeo, in the person of Mr. Benson, had to go to his assistance and speak the rest of the part for him. while Balthazar exhibited an agony of speechless grief. "What do you mean," Mr. Benson afterward demanded, "by going on the stage without knowing your part?" "I was only doing what you told me. You said the great thing on the stage was not so much the words you speak as to act. Well, ! was acting."-London Tit-Bits.

Tact. "I am sorry to have to tell you so, boys," said the pleasent looking visitor who was addressing the Sunday school. "but there is not one chance in a thousand that any one of you ever will be president of the United Still he failed to secure their undi-

vided attentiou. "But if you live up to your opportunities," he went on, eying them keenly, "some bright boy in this audience may become a great basebali pitcher or the world's champion batsman."

Instantly every boy sat up straight and began to listen.-Chicago Tribune.

Too Full. A man very much intoxicated was taken to the police station.

"Why did you not bail him out?" inquired a bystander of a friend. "Bail him out!" exclaimed the other "Why, you couldn't pump him out!"

Allowances. "Of course I admit your son is ex-

'em."-Judge.

To rob a robber is not robbing --French Proverb.

THE BLACK DIAMOND ONE MILLION BOLLARS FOR A GEOD STOMACH.

It Is One of the Curiosities of the Mineral Kingdom.

TO SCIENTISTS, for a new stomach. PUZZLE

Nature Has In Some Peculiar Way Produced This Rare Form of Carbon and Then Thrown Away the Secret of the Process-Found Only In Brazil

which we burn in our furnaces, but owns for a new stomach. the real "black diamonds" of com merce are among the most unique min serve a purpose in the industrial work that makes them of great value. The black diamonds are pure carbon and yet in no outward appearance resembie the diamonds which we are accustomed to wear as ornaments. They are slightly harder than the crystal or gem diamonds and, in fact, about the bardest substance known.

Black diamonds, or earbons, are among the greatest curiosities of the .aineral kingdom. They are without crystalline form and are found in ir. regular pieces, ranging in size from nalf a carat up to three, four and five hundred carats. They are dark gray black or brownish in color and opaque The real diamond of the jewelry trade | power to overcome digestive disturbance. is also pure carbon, but translucent and crystalline in form. Two objects so alike in composition could not be found so opposite in appearance as these two forms of carbon.

Another peculiar thing about the black diamonds is that they are found unly in one locality in the world. They come from a very small section of Brazil not more than 225 miles square in area. Outside of this limited territory money if you are not satisfied with the no pure black diamonds have ever been found.

What peculiar freak of nature caused the deposition of the black diamonds in this section of the world and nowhere else is one of the mysteries which science has failed to explain None of them has been found in the great Kimberley diamond regions, where the crystal form of diamonds have for so long been mined.

The whole origin of the black dia mond is, therefore, a scientific enigma. Naturally the question is raised, "Of tried several different keiney mills. what use is a black diamond?" No Seven weeks ago I commenced taking one would care to wear one of these Foley's Kidney Prits, and am feeling diamonds, which resembles a piece of better every day and will be glad to tell coal more than a real diamond, and so anyone interested just what Foley's far no one has popularized the black gems as the black pearl has been. Nevertheless the black diamonds serve a most important and useful function in the industrial world.

This pure black carbon is not only harder than the real diamond, but tougher and not so brittle as the gem. Consequently it is of great value for many mechanical purposes and particularly for boring with diamond drills. in diamond drilling the tips of the drills are studded with carbon, or black diamonds, and when the bores are deep the pressure is so great that the gem diamonds would be crushed in the process. But the carbon resists this continued pressure and slowly eats down into the rocks.

In diamond drill work the carbon is set in circular pieces of soft steel or iron, called bits, and these bits are attached to tubing. Armed with these black diamond teeth, the drills push their way down under severe pressure to a depth of five and six thousand feet, cutting through the hardest kind of rock. Some black diamonds are much harder than others, and there is no way to determine by the color the difference in the degree of toughness.

Black diamonds or pure carbon are not by any means cheap, and the own ers of the mines in Brazil where they are gathered are making a good thing out of their monopoly. There is no known substance that can take the place of carbon in drills in boring for | gold, silver, copper and other mineral deposits. Before the black diamonds of Brazil were discovered it was impossible to make borings.

When the carbon was first introduced in our industries it was used in diamond saws for cutting stones, marble and similar substances. Then the price advanced so that the carbon was found too costly for such use, and bort was substituted for stone cutting. Bort is really an imperfect crystal or gem diamond, but it is too brittle for use in drills. Consequently bort has taken the place of black diamonds for stone cutting, and the latter have been restricted almost entirely to diamond drilling purposes.

The average size of black diamonds used in the drills ranges from two to five carats, but the larger specimens give much better results. They cost more, but they last longer. Consequently there is a greater demand for the larger pieces of pure carbon, and the price is sometimes run up to premium figures for unusual specimens.

diamonds may some day give out and paralyze the diamond drilling industry has stimulated prospectors to systematic search for new deposits, but so far they have not been successful. On the other hand, scientists have been making a close study of the chemical conditions which have produced the black diamonds, but their manufacture is apparently about as difficult as the making of the gem diamonds. It is possible under certain conditions to make either, but not in sizes sufficient to be of any commercial value. Nature in some peculiar way has made "That's all right! But the more ar these rare products and then thrown lowances I make the quicker he blows the secret of the process away. If any man can ever unlock or find that secret he may cause a panic in the dia-

mond trade.-Scientific American.

This Offer Sould be a Warning to Every Man and Weman.

The newspapers and medical journals have much to say relative to a famous millionaire's offer of a million dollars

This great multi-millionaire was too busy to worry about the condition of his stomach. He allowed his dyspensia. to run from bad to worse until in the end it became in mable. His misfortune should serve as a warning to others. The term "black diamords" is some | Every one who suffers from dyspensia times jokingly applied to ordinary coal for a few years will give any thing he

Dyspepsia is caused by an abnormal state of the gastric juices. There is one eral products of the world, and they element missing-Pepsin. The absence of this destroys the function of the gastric fluids. They lose their power

We are now able to supply the pepsin in a form almost identical to that naturally created by the system when in normal health, so that it restores to the gastric juices their digestive power, and makes the stomach strong and well.

We want every one troubled with indigestion and dyspepsia to come to our store and obtain of Rexall Dyspepsia Tablets. They contain Bismuth-Subnitrate and Pepsin prepared by a process which develops their greater

Rexall Dyspensia Tablets are very pleasant to take. They sooth the irritable, weak stomach, strengthen and inrigorate the digestive organs, relieve nausea and indigestion, promote nutrition and bring about a feeling of com-
