**Hardy Nursery Stock And Seeds.**  
 We have just been looking through the excellent catalogue issued by the German Nurseries and Seed House at Beatrice, Neb. This is the 24th annual issue and consists of 112 pages. Every page is full of interest.  
 The fruit tree department contains some particularly good novelties, including Currant and Gooseberry Trees. These were imported from Germany some years ago and proved wonderfully successful in this country. The seed department illustrates and describes a full line of garden, flower and field seeds.  
 Mr. Sonderegger, the proprietor of the German Nurseries, in talking of the great success of his nursery stock and seeds in all parts of the country, gives much of the credit to the rather severe climate of his district. It produces vigorous, hardy stock that can stand the raw, cold winters, and the dry, hot summers, if necessary.  
 We know that the company will be pleased to send their splendid catalogue to anyone interested in seeds or nursery stock. To those who mention this paper when writing, they will send a free trial packet of their New Coreless Tomato seed.

Patrons should enclose coins in an envelope, wrap them securely in a piece of paper, or deposit them in a coin-holding receptacle, so they can be easily and quickly taken from boxes, and carriers will be required to lift such coins, and where accompanied by mail for dispatch, attach the requisite stamps."
