The School Pennant and Class of 1910.

To all interested patrons of the public school:

Without warning to parents or guardians, the entire graduating class of the McCook high school gave notice to the superintendent and faculty, Monday last, that they had decided by class vote to sever their connection with the school. The immediate cause of this unwise act was the placing of a class pennant on the wall without the sanction of the faculty, although the class affirm that such sanction had been asked and no final negative given. The pennant was taken down by order of the superintendent, after which a seemingly innocent petition was circulated, asking that the pennant be restored. The matter seemed of so little vital interest and was so courteously presented to me, by one of the class, (not a member of my family), that I signed it. Myself, among others of the signers, was asked to come to the school and discuss the "pennant question" with the superintendent; but my duties are of such a nature as prevented me from being present. Later on I talked with several members of the school board, and all said the superintendent was right and received the unequivocal support of the board. I was also informed that the school was impregnated with clans, coteries and frats, Greek, Latin and Sicilian, which were creating anarchy in the school and must be suppressed or the school temporarily disbanded. Now, I affirm the school is the public's, the people's, and not that of any clan or clique, in or out of the school; and that any citizen has a right to know, if chaos reigns in our educational institutions, why such is a fact, and how it can be remedied.

I have interviewed the superintendent, in a personal way, and his presentation of the case was seemingly fair and impartial, and it is not my desire to criticize his action, but to turn the sunlight of publicity schoolward, to correct any seeming wrong.

At all times in my home no adverse remarks toward men, institutions, or things are allowed to go unrebuked, as I think the young often speak and act as they feel, not as they know.

The school board is composed of men of such sterling citizenship as to carry with it the conviction that they are thoroughly alive to the situation, and their support of the superintendent and faculty shows they deem the children have studied too much Patrick Henry and too little George Washington.

I believe the faculty and school board are honest in their contention, but I have also heard "The Bitter Cry of the Children," and I am not ready to condemn them off hand.

What I really want is that the public at large shall begin to take a more vital interest in the schools and their progress. I have no feeling of anger or resentment, ament the unfortunate action of the class of 1910, but only sorrow and humiliation to know that such a thing could occur. John Rockefeller, Jr., said to his Sunday-school class, that it was necessary that many buds should be sacrificed that one "American Beauty" should come to its greatest perfection; but in this case, it seems to me, that twelve buds of promise have been sacrificed, and not even the aromatic fragrance of one is left to add pleasure to the senses. Yours sincerely,
J. F. FORBES.
