## WOMAN GIVES BIT OF CORNEA

New York Operation, Patterned After Experiment With Animal, May Revolutionize Optical Surgical Methods of Many Years' Standing and Make Vision a Commodity.

It may be that the blind who happen to be at the same time malefactors of great wealth will come to exact from the poor not only their goods, but their eyes as well. If the operation of Dr. Royal S. Copeland, dean of the faculty of Flower hospital, New York, who recently grafted a bit of the cornea of a woman's eye upon a Chinaman, succeeds this state of things may easily follow. The oculist has every reason to believe the operation will succeed. "It would be an expensive operation for a rich man," said Dr. Copeland. "I think that if I performed it and restored sight to a man who had been 07 blind he ought to pay me at least \$10,-000. The Chinaman paid nothing. I know of nothing in the law-to prevent the sale of an eye by a poor man to a rich man." \$ 6,945 34

> LONG NEGLECTED DADS HAVE HOL!DAY OF OWN.

Spokane Wife Starts Movement For Fathers Since Mothers and Children Are Honored.

Now comes the day of recognition for the neglected father, and if the movement inaugurated at Spokane, Wash., is followed a national observance of dad's merits will be launched. Officers of the Spokane (Wash.) Ministerial alliance and the Young Men's Christian association are sending invitations to churches and allied organizations all over the United States to pay tribute to the head of the house on fathers' day, Sunday, June 19, the rose being suggested as a suitable flower to the scene of an immense number of wear.

Mrs. J. B. Dodd of Spokane, originator of the idea, thus explained the plan for a national movement in a petition to the ministers of that city: "The beautiful custom of mothers' day suggests the question. Why not a fathers' day? This is further emphasized by the celebration of children's day by our Sunday schools. Fathers' elay would call attention to such constructive teachings from the pulpit as would naturally point out: "The father's place in the home. "The training of children. "The safeguarding of the marriage

"The protection of womanhood and

childhood. "The meaning of this, whether in the light of religion or of patriotism, is so apparent as to need no argument in behalf of such a day, to be celebrated all over the country."

patents have never been adjudicated otherwise than on the motion for the temporary injunctions issued pendente lite and then go on to say:

"There is no dispute as to the proposition that the question whether or not there has been an infringement of this patent, however broadly it may be construed, depends upon the question whether or not in the defendant's machine a tendency to spin or swerve is checked or counteracted by the operation of a vertical rudder. That, of course, on its theoretical and on its practical side is a question of fact. "It seems to us, irrespective of any other questions in the case, that infringement was not so clearly established as to justify a preliminary injunction."

## MARYLAND REEKS OF WHISKY

Distillery Collapse Causes Aromatic Brooks of Bourbon. After pouring rain for a week it

poured whisky in Baltimore county, Md., recently. Good old Maryland rye and bourbon streamed out of 3,000 barrels down the hill over pastures and potato patches to Gwynn falls, which flow by the suburban towns which dot the line of the Western Maryland railroad.

For miles and miles the odor of whisky filled the atmosphere. The cause of it all was the collapse of a nine story warehouse of the Gwynnbrook Distilling company near Owings Mills from the effect of heavy rains, which undermined the foundations. There were 20,000 barrels of whisky stored in the warehouse, 8,000 barrels of which went down with the portion of the structure that fell. The alcohol laden air which envelops the place is intoxicating.

Ocean Graveyard Now Harmless. The passing as an "ocean graveyard" of Sable island, off Nova Scotia, shipwrecks, has been caused by wireless telegraphy and modern lighthouses, the last wreck having been in. 1904. Since that time no vessel has been wrecked on the treacherous rib of sand forming the island coast, which had previously taken a toll of more than 250 vessels and many more than that number of human lives.

George Favorite Pseudynym. Women writers who take a masculine pen name seem particularly attracted by the name of George, perhaps because it carries a suggestion of solidity and strength. Two of the ear-Hest "Georges" were George Eliot and George Sand. An American author, Julia Constance Fletcher, writes over the name of George Fleming. Now comes Georg Shock (without the "e"), completing the historic number of "four Georges."

### Color Harmony.

The key to all color harmony is simoly this-that kindred or related colors day set for the hearing. harmonize, go well together, while unother. Those colors are kindred which 21st day of June, 1910. are side by side on the spectrum band or the color circuit. Red is kindred to orange because orange is an admixture of red and vellow; orange is kindred to yellow because of the yellow in the orange; yellow is akin to green because green is an admixture of yeilow and blue.
