Dollar

"Decoys"

Did you know that there was a relationship between dollars? Well it must be true anyway. Did you ever notice that once a man gets a few dollars others seem to fly into his pocket as if by magic? Most of the dollars of the United States are gathered together in large amounts. The more dollars a man gets the faster others join them. You may be unable to account for this but it is true nevertheless. Dollars like to congregate. Why not start a congregation of your own? Let's explain. You make quite a bit of money don't you? You spend it don't you? Well now just for once try putting a few dollars --- just a few---in this bank. See if others don't follow. The first few act as a "decoy." You are cordially invited to place your "decoys" in this bank. We are sure that by using one of our bank books for a "blind" you will be able to "bag" considerable.

Tuesday of this week, Secretary of Interior Ballinger resigned from the cabinet and President Taft appointed Richard L. Fisher to fill the vacancy. The resignation was timely but tardy. Fisher has been president of the national conservation league, and is quoted as being a conservationist of the Pinchot type.

The play deals with the love story of a poor young man and a rich and cynical girl who doesn't realize her love until the barriers of wealth and position are swept away in the great Chicago fire.

The play is under the direction of Messrs. Gaskell-MacVitty and Carpenter, who have given it the sumptuous mounting and excellent and well balanced cast that is usual in their productions.
