

TRY THIS WITH YOUR GASOLINE STOVE

FIRST:—Fill the stove with gasoline then open any of the valves.

If it's an

INSURANCE GASOLINE STOVE

no gasoline will flow--because the "automatic cut-off" will keep the valve closed.

Next:--Light the stove--then blow out the flame.

If it's an INSURANCE the flow of gasoline will STOP--because the "automatic cut-off" will close the valve.

But--If it's not an INSURANCE the gasoline will always leak when any of the valves are opened or the flame is blown out--because the valves have no "automatic cut-off." The INSURANCE is patented and is the only gasoline stove with safety devices to protect the operator from accidents.

SAFETY

Is the paramount feature in a gasoline stove. You can only have it with an INSURANCE. For sale only by

McCook, Neb.

(Continued from page 1.)
2 years more?—these same men? Not if we know ourselves! Vote for McAdams for mayor, and for Wm. Middleton and Herman Brown for the council.

AS TO TAXES.

Do the taxpayers of McCook know that the present city council squeezed out of them during the year ending May 2, 1910, the sum of \$3836.69 in taxes as a water fund, besides which tax each consumer paid for the water he used at the 16c rate? Do they know that most of this tax of \$3836.69 was paid over by this council to the McCook Water Co. for services which the city will perform for itself at almost no cost when it has its own plant.

Do the voters know that that tax of \$3836.69 which was actually collected from them (over and above the amount of their individual water bills at 16c) was almost enough to pay the interest on the entire issue of city water bonds which were voted for a city plant?

In other words the taxpayers under the management of the present city council have been paying (under the court's supervision) at least 6% interest on the capital invested in the old water plant, and are then being saddled with almost another 6% tax in the shape of a "water fund" of \$3836.69 most of which goes to the Water Company.

And those councilmen who did this are now asking the people to re-employ them to conduct important affairs!

Will we do it? Are we so rich as not to care? Are we so blind as not to see? Are we so dumb as not to feel? No! We will not vote for these men again!

We propose to put in there men who figure, men who calculate, men who will perform for the interests of the tax-payers and people of McCook. Voters! Vote for Jas. McAdams for mayor and for Wm. Middleton and H. C. Brown for the city council.

(For the figures \$3836.69 see Resolution of city council dated May 9th, 1910.)

NO CONFISCATION.

There are a few estimable citizens in McCook who have been led to regard the municipal ownership campaign as one carried on for the purpose of ruining the owners of the present water plant by practically confiscating their property. They are too quick in drawing their inferences and taking their places in opposition to the movement. There is no such purpose dominating the leaders of the movement. There may have been some ill-considered expression uttered violently by some uninformed and experienced helper in the work whose utterance has been heard or heard of and taken as the responsible expression of the plan and purpose of the campaign. But it would be no more unfair in time of war to take the irresponsible utterings of mere camp followers, than it is to judge this movement in like manner. The users of water in McCook are willing to pay and expect to pay for the labor, fuel, supplies, repairs, replacements and all other like items involved in the pumping of the water, as well as the cost of reading the meters, making out the bills, receiving and disbursing the moneys involved, and on the top of that an interest charge of six per cent per annum on the money in the plant. Not one farthing less do we hope or expect to get off with.

To satisfy us that we pay no more the city must operate its own plant.

In the same manner and by the same token we are willing to deal with the old water plant. No confiscation about it. There is the good brick pump house. There is the comfortable and good brick dwelling used by the engineer. There is the 15 good acres of land lying about the plant on the river. There is the stand pipe with its 19 years of service and exposure behind it. There are the cast iron mains lying in the streets possibly as sound as ever but largely misfits as to size and needing to be dug up and replaced, having originally cost in times of high prices from \$48.00 to \$52.00 a ton as against \$25.00 a ton, the price now being paid by the city of Wymore for the pipe, delivered, for its new plant. There are the boilers and pumps, old and worn but not worthless. All these are usable and palpable in value, and all these are acceptable to the men who lead this movement at their fair and honorable value. No confiscation is planned. No confiscation would be tolerated by the men whose names make up the Peoples' Water Ticket. These men are not confiscators. They have no means derived from any source but persistent industry and economy. This talk is only dust thrown up to mislead.

We have no apologies to offer for the names of McAdams, Middleton and H. C. Brown. They are not confiscators. They expect your votes.

SPRING 1911

Queen Quality SHOE

We've just received our new "Queen Quality" styles for Spring and they're beauties. We did not believe such footwear possible at the price. The makers have outdone themselves. Smart, snappy styles with plenty of comfort and service—just what you have been looking for. You'll buy here eventually. Why not to-day?
