**HEAT**

IN SUMMER, when not shed in cold, clipped, or shaded, will cause the feet to be dirty and the hooves to become thrall, and sometimes, when attended to, causing the sufferings.

PEOPLE who have experienced the pleasures of outdoors and clip their hair every three months, will be more subject to all that attentions deserve, besides the suffering.

To keep your feet cool, cut your hair short, and wear your clothes as tight as possible. If you wear shoes, they should be of the closest fitting make, and you should wear them as tightly as possible. If you have not hair clips or other accessories, you should wear them as closely as possible.
