Sleeping, dining and reclining chairs (seats free) on through trains. Tickets sold and baggage checked at any point in the United States or Canada.

For information, time tables, maps and tickets, call on or write D. F. Hostetter, Agent, McCook, Nebraska, or L. W. Wakeley, General Passenger Agent, Omaha, Nebraska.

ADDITIONAL RAILROAD.
Engineer F. J. Zajicek has sold his property at Oxford. Consideration, \$1,200.

Lindsay Kilburn of the Beaver City day force, visited with headquarters' friends, part of last week.

The tramp nuisance continues: There were 15 of the gentry in countable view on fast freight 77, Sunday, as the train pulled into McCook.

A special pulled through McCook on Sunday morning about 6:30, bearing Pennsylvanians to the great educational convention at San Francisco.

Conductor Thos. Malen, who for several years had the run from Hastings to Red Cloud is now running on 15 and 16 between here and McCook—Red Cloud Argus.

Passenger train No. 1 was an hour late Friday. On account of a strong side wind, two engines, 2801 and 2704, were placed at the head of the long heavy train from McCook to Akron.

Spontaneous combustion made it necessary recently at Holdrege to shovel all the coal off a car at that place. They had a slight fire in the freight house at that place, same day.

Don't Forget to Get Our prices on corn and feed of all kinds. **McCOOK MILLING CO.**

Foley Kidney Pills are composed of ingredients specially selected for their corrective, healing, tonic, and stimulating effect upon the kidneys, bladder and urinary passages. They are antiseptic, antihitic and a uric acid solvent. A. McMillen.

It is not too late yet to paper and there are some real bargains for you in our wall paper room.

L. W. McCONNELL, Druggist.

Rehall A. B. C. Seltzer quiets the brain after a feverish, restless night.

L. W. McCONNELL, Druggist.

Huber handles the Carhart gloves and caps also, and a full line of other makes.

You will find them fresh and clean at Wagner's grocery.

Steel Cars.

New steel mail cars were put in use on four through Burlington trains Friday and two others will be in use within a few days, according to announcements at the office of Chief Clerk Butler of the railway mail service. The new cars are required under the recent order of the postoffice department that no wooden mail cars shall be run between steel cars. Trains No. 9 and 10, which carries mail between Oxford and Omaha, and Nos. 1 and 6, between Lincoln and Denver were the first to be given the new equipment.

These cars are but forty feet long, instead of sixty as before, but are very heavy, weighing forty tons. They have the very minimum of wood about them, and represent the best construction so far attained in that line, being much better looking than those in use on the Union Pacific whose cars resemble torpedoes on a large scale, being built for speed at a sacrifice of appearance.

BEGGS' BLOOD PURIFIER CURES and Purifies the Blood.

These shoes are equal to any \$5.00 and \$6.00 shoes on the market. They look as well—are just as stylish and wear as well—cost only \$3.00 and \$4.00 for ladies' and \$4.00 for men's. With every pair of these shoes you get a calendar on which you mark the date you began to wear them—when they are worn out count up the days of service you have had and you will never again buy anything but Calendar Shoes. **VIERSEN & OSBORN, McCook**

Estimate of Expenses

For the current year, 1911, by the city council of McCook, Nebraska:

Be It Resolved, by the Mayor and City Council of the City of McCook, Red Willow County, Nebraska, that the following be, and the same hereby is, adopted as the estimate of expenses for said city of McCook for the fiscal year commencing May 2nd, 1911:

Salaries of officers	\$ 2200 00
Supplies, claims and elections	3000 00
Making and repairing alleys, streets and crossings	2000 00
Firemen and supplies	1800 00
Lighting streets	2800 00
Interest and principal due on bonds and sinking funds	12000 00
Maintenance of free library	1100 00
Maintenance of sewer	300 00
	\$25200 00

The entire revenue for the city for the year ending May 1st, 1911, was as follows:

General fund	\$6187 00
Occupation fund	3635 00
Water fund	3446 00
Cemetery fund	167 00
Road fund	1630 00
Light fund	2992 00
Library fund	1269 00
Sewer fund	453 00
Scale fund	274 00
	\$20053 00

Adopted and approved this 26th day of June, 1911.

JAMES McADAMS, Mayor.
Attest:
FRANK L. TRAVER, City Clerk. (Seal.)

DEEP SEA DIVERS.

Death Always Hovers Round Them While They Toil.

PERILS THEY HAVE TO FACE.

The Awful Pressure of Water and Air That May Bury or Burst Them—The Helmet Telephone a Wonderful Aid In Work and In Times of Danger.

It is surprising to learn how many uses there are for divers. The navy, of course, employs many to set submarine mines and torpedoes and to attend to investigations of the condition of ships' bottoms. Bridge construction companies use them, as do those who build dams, waterworks and reservoirs. Waterworks in large cities keep a diver on their staff constantly. Wrecking companies need their services, and the profession of underriver tunneling makes many demands on the time and skill of the man in armor.

Since Smeaton in 1779 designed a pump to supply air to the diving bell little real improvement in the art has been made, save in detail of helmet and clothes, until the invention of the telephone. The greatest advance ever made in the art, divers will tell you, is the combination of the telephone with the diving suit. Before its advent divers had to depend entirely upon pulls on the life line for communication with the surface and upon signs to each other when under water if two wished to communicate. Today the modern diving helmet is equipped with a telephone, and the diver can not only hear what is said to him from the surface, advise those in charge of his pump as to whether the air is "coming right" or not, but he can communicate to a brother diver and hear the instructions sent to him from the surface, all of which facilities are of great assistance in the work.

At first thought it may not seem so difficult a thing, ~~the going down~~ ~~under water and breathing~~ ~~is not in from a pump by a tube.~~ But the physical drawbacks to the work are enormous. For every ten feet a diver descends he sustains an additional pressure of four and a half pounds ~~over every square inch of his body.~~ ~~When this means~~ ~~may be better understood~~ when considering the greatest depth ever made by a diver—204 feet. His body at that depth sustained a pressure of eighty-eight and a half pounds to the square inch over and above the fifteen pounds always sustained when in the air.

Divers must descend very slowly, swallowing as they go; otherwise they may bleed at the nose and ears and even lose consciousness. And they must ascend even more slowly than they descend, particularly when coming from great depths; otherwise they may literally burst from internal air pressure. At the least, too sudden a rise may cause an attack of that terrible disease known to tunnel workers called caisson disease, or the bends, in which air gets into the tissues under pressure and causes the most extreme torture.

The diver, getting ready to descend, clothes himself in very heavy underwear of gauze or flannel, the drawers well secured to prevent slipping, and adds a pair of heavy woolen socks.

If the water be cold two such suits may be worn. If the depth to be negotiated is great cotton soaked with oil is put in the ears or a heavy woolen cap pulled down over them. Shoulder pads, if worn to take the weight off the helmet, are next tied on, after which the diver wriggles into his heavy suit of rubber and canvas. Next come the inner collar and the breast-plate, which are secured with clamps to the rubber dress, the utmost care being taken in this operation not to tear or pinch the rubber. Finally the shoes are fitted on and the rubber gloves clamped to rings in the sleeves.

The helmet is the last to go on, and never before the valves and telephone have been tested. The attendants start to pump as the helmet is clamped home. The helmet is attached to the pump with a rubber tube, which is canvas and wire protected. No diver descends, after the helmet is put on, until he has tested the outfit and found that his air supply is sufficient and the pump working properly.

He is supplied with a life line, with which he can signal should his telephone get out of order and by which he may be drawn to the surface should he become helpless for any reason. He must take great care when walking about on the bottom not to foul his life line or his air tube and for this reason must always retrace his steps exactly to his starting point if he has gone into a wreck or about any obstructions. For the same reason two divers working together must be careful not to cross each other's path.

Sometimes the life line may become so entangled in wreckage that it must be cut, and then there is danger of the diver not finding his way back to his boat or float, especially if the bottom is muddy and fouis the "seeing." But the greatest danger of all, of course, is that the tube be cut or the diver faint. In either case he is in desperate straits. If the man handling the life line "feels" anything wrong he will haul the diver up willy nilly and regardless of the severe bleeding at nose and ears which will result from too rapid a rise to the surface. But if the diver be inside a wreck or if his life line gets tangled in wreckage such hauling would do no good. It is in situations like these that the slender connecting link of telephone wire means so much to the men who risk their lives far beneath the surface of the water.—Scientific American.

ORDINANCE NO. 200.

An ordinance for the purchase by the City of McCook of the entire plant of the McCook Water Works Company, including real estate and meters owned by said Company in McCook, Nebraska, and to provide for the payment of said plant.

Be It Ordained by the Mayor and City Council of the City of McCook.

Section 1. The McCook Water Works Co. having submitted to the City of McCook a proposition to sell to said City the entire plant of the McCook Water Works Company, including real estate, houses, machinery, meters and all other property owned by said Company in said City, and to transfer and convey to said City all of said property by good and perfect title, free of all incumbrance, at and for the sum of sixty-five thousand dollars, which may be paid in cash or in the registered and signed water bonds of said City, which have already been voted by said City, and the city engineer of said City having made and submitted to the Council of said City an estimate of the present value and cost of said plant, showing said cost to be sixty-seven thousand, seven hundred and fifty-six dollars and seventy-two cents, that said City hereby accepts said offer; that water bonds of said City previously voted and issued by said City be used in payment for said plant to the amount of sixty-five thousand dollars par value; that said bonds be delivered to said Company upon delivery to said City, on or before July 1, 1911, of deeds of general warranty and bills of sale conveying the title and possession of all the property described in said offer to said City with abstracts showing good and perfect title in fee simple to said real estate in said company at the time of such delivery, free and clear of all incumbrances.

Section 2. Said City being in great impending danger from fire, drought and in other impending danger, requiring immediate operation of this ordinance, it shall take effect and be in force from and after its passage, approval and proclamation by said Mayor, posted in at least three of the most public places in said City.

Passed and approved this 30th day of June, 1911.

JAMES McADAMS, Mayor.
Attest:
FRANK L. TRAVER, City Clerk. (Seal.)

Hay Fever and Summer Colds must be relieved quickly and Foley's Honey and Tar Compound will do it. E. M. Stewart, 1034 Wolfram St., Chicago, writes: "I have been greatly troubled during the hot summer months with hay fever and find that by using Foley's Honey and Tar Compound I get great relief." Many others who suffer similarly will be glad to benefit by Mr. Stewart's experience. A. McMillen.

For summer diarrhoea in children always give Chamberlain's Colic, Cholera and Diarrhoea Remedy and castor oil, and a speedy cure is certain. For sale by all dealers.

To lighten housework

Use Old Dutch Cleanser

Its rapid action enables you to accomplish more work in less time and with less effort than otherwise possible. It cleans mechanically—no harmful chemicals—and will not scratch or injure the surface. Keeps cooking utensils, floors, woodwork, metal work, windows and everything about the house, barn or dairy spick and span. Its fine particles quickly banish dirt and grease which soap, snap powders and other cleansers will not effect.

Avoid Caustics and Acids
