Fell Into a Cesspool.

Mrs. C. Redfield of South McCook had a very narrow escape from death, last Sunday, by falling into a cesspool on their place. The excavation was about 20 feet deep. In falling she came in contact with a board near the bottom of the pool, which saved her, doubtless, from death by drowning or suffocation. The little children aroused the neighbors, and the woman was rescued from her perilous position, fortunately not much the worse for her terrible experience.

At the Perry Dump.

The Great Western Sugar beet people are now at work on their dump at Perry, having the McCook dump pretty well finished. This is the third dump in this county, namely, Red Willow, McCook and Perry.

TWO DROWNED IN STREAM.

John Brown and Clarence Morrison Meet Death in Frontier County.

Curtis, Neb., Aug. 21. (Special Telegram.)—The twelfth of the big August rains fell last evening causing some damage to the railroads and loss of life as well. John Brown, aged 70 years, a resident of Frontier county, and Clarence Morrison of Watons, Mo., aged 23 years, were drowned while attempting to cross a swollen stream in a canyon, northwest of Stockville. Morrison's body was recovered a short distance below, where it had caught in a wire fence. Brown's body was found a half mile further down the stream, where it finally lodged.—Omaha Bee.

THE NEW CAPUCHIN HOOD AND SLASHED SKIRT.

The clothes of the summer season were comparatively bright in color, the suits for the fall are expected to show rather dark tones—principally shades of blue, brown, green, gray and purple.

The suits for dressy wear have the coats quite short and are made of both plain and fancy velvets, satins and satine. In the

Ladies' Home Journal Pattern No. 6218-6233.

semi-tailored suits, the coats are about 28 and 30 inches in length and cut in rather straight lines, with a variety of shaped collars. The suit pictured here shows one of the favorite styles of collar. Some of the models are made with a hood in the back, with a deep point and forming rather large revers in the front.

The illustrated design was shown in a fancy striped serge with the collar and pleated sections of the skirt of black satin.

With the more expensive suits a waist or overblouse of chiffon is worn, matching the cloth in color and with touches of hand embroidery or beadwork in East Indian effect. Some of these models show revers of the cloth of the suit or of matching satin. The skirts average about 2½ yards in width, with many tunics and slashed effects and trimmed to match the coat.

All grades of Oxford flour and each sack guaranteed at the McCook Flour and Feed Store.

THERE IS PLENTY OF WATER

IN THE

Big Horn Basin and Yellowstone Valley

All of the rivers and irrigation canals are now running bank full. The writer has just returned from an extended inspection trip through the Big Horn Basin and Yellowstone Valley, where he found that the farmers have all the water they can use for irrigation; crops are accordingly fine.

OPPORTUNITY FOR INVESTMENT

Money invested in Government irrigated lands, Carey Act lands, or deeded lands in the Big Horn Basin, at present prices is sure to bring large returns for the reason that the farmers of this country are beginning to understand that the Basin and Yellowstone Valley have an ample water supply and that the water comes down from the mountains just at the time when it is needed for irrigation.

PERSONALLY CONDUCTED EXCURSIONS

Come with one of our personally conducted excursions first and third Tuesdays, and let me show you the crops that follow a reliable water supply. Write today for our new folder telling all about these lands. It is free.
