

The Rayo Lamp

The Lamp That Saves The Eyes

Children naturally never think of possible strain on their eyesight when poring over a fascinating book. It is up to you to see they do not ruin their young eyes these long evenings by reading under a poor light. The Rayo Lamp is an insurance against eye troubles, alike for young and old.

The Rayo is a low-priced lamp, but it is constructed on the soundest scientific principles, and there is not a better lamp made at any price. It is easy on the eye because its light is so soft and white and widely diffused. And a Rayo Lamp never flickers.

Easily lighted without removing shade or chimney; easy to clean and rewick. Solid brass throughout, with handsome nickel finish; also in many other styles and finishes.

Ask your dealer to show you his line of Rayo lamps; or write for descriptive circular to any agency of the

Be Your Own Rain-Maker

Did the recent long, dry spell hit you pretty hard—cutting down your crop yield and your income for the year? In the Big Horn Basin and the Yellowstone Valley farmers have raised splendid crops. Their income this year will be greater than ever and it all comes from an ample water supply. The farmer "controlled the rain" and applied the water as his crops needed it. The Government system of irrigation provides during the growing season two feet of water per acre the equivalent of twelve heavy rains of two inches each; think what such a water supply would have meant to your community during the summer of 1911.

Why not go with me on the next excursion into the Big Horn Basin, and look over that land of sunshine and bounty; new Government units of the finest kind of irrigated land near Ralston now available with perpetual water rights on the easiest terms. These are the richest gifts the government has had to bestow upon its people within thirty years.
