Wealth in Japan. According to a list compiled in Tokio, there are in the whole empire only 1,018 Japanese who are worth a quarter of a million dollars or more. The population of Japan is about 51,000,000, the most of them poor, the wealth being distributed among a few people. But the list shows that the Japanese are getting rich rapidly, as there were only 441 rich Japanese ten years ago. At the rate they are now going it is more than likely that in a few years Japan will have rich men to spare.
