

The letter of Miss Merkle, whose picture is printed above, proves beyond question that thousands of cases of inflammation of the ovaries and womb are annually cured by the use of Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM:—Gradual loss of strength and nerve force told me something was radically wrong with me. I had severe shooting pains through the pelvic organs, cramps and extreme irritation compelled me to seek medical advice. The doctor said that I had ovarian trouble and ulceration, and advised an operation. I strongly objected to this and decided to try Lydia E. Pinkham's Vegetable Compound. I soon found that my judgment was correct, and that all the good things said about this medicine were true, and day by day I felt less pain and increased appetite. The ulceration soon healed, and the other complications disappeared, and in eleven weeks I was once more strong and vigorous and perfectly well.

"My heartiest thanks are sent to you for the great good you have done me."—Sincerely yours, MISS MARGARET MERKLEY, 275 Third St., Milwaukee, Wis.—\$5000 forfeit if original of above letter proving genuineness cannot be produced.

## CURING GRAIN IN A HOSPITAL.

Sanitarium for Sick Cereals at Port Arthur, Ontario.

Most of us are familiar with hospitals and retreats where life and health may be restored to human beings and animals, but a new and interesting phase is a sanitarium for grain.

Plants and flowers are subject to disease, and as the loss of crops throughout the United States alone has been estimated at some eighteen million dollars, it becomes imperative that an effort should be made to save the diseased grain. Very often farmers lose the whole crop because of be

Nurse in Wheat Hospital. ing compelled to harvest in wet weather.

To the new hospital, which is located at Port Arthur, Ontario, the farmers may send their grain to be treated and carefully nursed. After passing out of the care of the experts the grain is said to be cleaner and more wholesome than wheat which has not been subjected to this process. Convalescent wheat has been stored away and kept in perfect health for several years.

When the wheat ill unto death arrives, a nurse places it in a bath of pure water, where it is brushed and scoured in machines made for the purpose until the grains are highly polished and in good shape for the mill. It is then placed upon a bed made of screening and subjected to a jamming process, first of hot, then of cold air, until it is perfectly dry.

Again the grain is subjected to another cleaning process, after which it is ready to be returned to the owner, with the guarantee that it is thoroughly cured. Strange to say, when it is weighed it seems to have lost nothing, and being all grain and no chaff it weighs three or four pounds heavier to the bushel.

Rarest of All Stamps.

The scarcest stamp of all is the 1c British Guiana of 1856. Of this stamp absolutely only one specimen is known to exist, and for that one specimen M. le Renotiere von Ferrary, of Paris, is said to have once refused £5,000.

### A Long Sleep.

An agricultural laborer in Russia is reported to have slept for seven months. He "dropped off" while at work in the fields, was carried home, and remained slumbering for the period mentioned, watched from time to time by physicians. Curiously enough, he lost so little flesh that no attempt was made to feed him. When he awoke he was as weak as an infant, but after a fortnight's nursing was strong enough to return to his work.

# Save Your Thresh Bill

The ordinary old-style small cylinder wastes enough grain and time to pay your thresh bill.

Why not save the grain ordinarily put into the straw stack? Why not save the time which the ordinary threshing outfit wastes for you?

This can be done by employing the **RED RIVER SPECIAL.**

It has the **Big Cylinder**, with lots of concave and grate surface.

It has the **Man Behind the Gun**, that does most of the separating right at the cylinder.

Besides these, it has all the separating capacity of other machines.

It runs right along, saving your grain and saving time, regardless of conditions.

There has come improvements in threshing machinery the same as in everything else.

As the modern self-binder is ahead of the old reaper of forty years ago, so is the **Big Cylinder** and **Man Behind the Gun** ahead of the small cylinder old-style thresher.

The old-style thresher with its small cylinder and limited separating capacity, has stood for years without improvement.

The **RED RIVER SPECIAL** is fully up with the times.

It is built for modern, up-to-date work; to thresh well; to thresh fast; to save time and money for both the thresherman and farmer. It does it. There are reasons why. Send for our new book on threshing, it gives them and it is free.

Employ the **RED RIVER SPECIAL**, it is the only machine which has the **Man Behind the Gun**, and saves enough grain and time to pay your thresh bill.
