A Celebrated Apotegm.

Patriotism having become one of our topics, Johnson suddenly uttered, in a strongly determined tone, an apotegm, at which many will start: "Patriotism is the last refuge of a scoundrel." But let it be considered that he did not mean a real and generous love of our country, but that pretended patriotism which so many, in all ages and countries, have made a cloak for self-interest.—Boswell's Life of Johnson.

White Fur Tells Nothing.

Weasels, ermines and hares, which assume white coats for winter, have not much judgment about seasons. They generally change color about the same time every year, whether the snow comes early or late. No woodsman pretends to divine the weather from such creatures as change their color for the seasons.

Rarest American Book.

The rarest American book is the New England Primer, "the little Bible of New England," as it has been called, which is so rare that the earliest printed editions have vanished, no one knowing, indeed, when and where the first edition was actually issued.

Bacon's Prophetic Words.

Roger Bacon (1214-94) may have foreseen the possibility of making dynamite and other powerful explosives when he wrote the following words: "A small portion of matter, about the size of the thumb, properly disposed, will make a tremendous sound and coruscation, by which cities and armies might be destroyed."

AN INVITING PROSPECT.

Will Canada in the next quarter of a century take the place of the United States as the great wheat exporting section of the western hemisphere? Everything points that way. In the opinion of experts the United States has reached high water mark as a wheat exporting country. The increasing population over there has reached the point when home consumption is becoming annually greater in proportion than the increase in wheat production. As a matter of fact wheat production is decreasing over there as the land becomes more valuable and by reason of the demand for other forms of produce for home consumption. It is said that the wheat crop this year is not more than 70 per cent. of the crop of 1901 and much below the crops of 1902 and 1903. It is estimated that this year the United States surplus for export will not be over 100,000,000, which is less than any year since 1878 with two exceptions. Not only is this the case, but a considerable quantity of the best Canadian wheat is being imported into Minnesota and also Chicago.

All this tends to keep the price of wheat near the dollar mark, and "dollar wheat" is the loadstone that will attract farmers to the Canadian Northwest, where land is cheap and can be farmed on a wholesale basis, particulars of which may be had from any Canadian Government Agent. The reduction of American exports will have the double influence of increasing Canadian production and keeping up the price. It constitutes a rosy prospect for this country, and needs no exercise of optimistic enthusiasm to foresee the near expansion of the Dominion into the actual position of the "granary of the empire."

Strange Foods.

Certain Indians consider earth worms a dainty. They are dried and rolled together into a peculiar flour. In Bahama and some of the Florida keys the conch is eaten—by far the toughest food known; more like India rubber than anything else, having to be beaten and pounded before it can be masticated or even cooked.

Chinese Dress Colors.

Any color or harmony of colors may be used in the Chinese costume except solid yellow. That color is reserved for the robes of royalty. White enters not at all into the Chinese dress, that is, in solid color, for it is Chinese mourning.
