The Endeavors of the Christian church will serve ice cream and cake at the home of Mrs. Barbara Dilts on Friday evening May 12. All are invited.

Dr. Roberts moved his family this week into the house vacated by Mr. Himmelreich, he having moved into the Dan Sargent property near the high school building.

If you want thirty minutes of laugh get Tom Whittaker to relate his experiences as assessor. It takes all kinds of people to make a world and Falls City has a few of each kind.

The Ladies' Auxiliary of the cemetery association met with Mrs. Isham Reavis Tuesday afternoon. No business of importance was transacted aside from fixing the time of the opening of the King soda fountain, which will be May 20th. These openings under the charge of the ladies have heretofore been quite profitable to the association, and we hope the one of May 20th will be equally so. A great deal of the credit for the beauty of the cemetery is due to the unselfish labor of the members of the association.

Have you missed Uncle Jesse Crook lately? The old gentleman is no longer able to come down town. For fifty years he has been a familiar figure and the streets seem lonely without him. He is able to be about the yard at his home, but the exertion of coming down town is too great for him to make the attempt. The entire community hopes that his health will improve and that his strength in a measure will return.

Every great daily paper in the state has written for seats in the congressional convention for their reporters. A great contest is expected and the newspapers will be represented in force to write it up. It would be quite an advertisement if these papers would speak well of Falls City as a convention city. If every one will do his part, the newspaper reports will be all right.

On Tuesday evening of this week a number of the young ladies of the Christian church went to the home of Rev. Cronenberger on North Stone street and gave him a pleasant surprise. The evening was spent in a very social way. Ice cream and cake were served and all present certainly enjoyed the evening.

Under the supervision of Geo. Grinstead ten thousand strawberry plants have been planted this week at the John Gilligan fruit farm. This will make the largest strawberry "patch" in this end of the county.

Why Suffer From Rheumatism?

Why suffer from rheumatism when one application of Chamberlain's Pain Balm will relieve the pain? The quick relief which this liniment affords makes rest and sleep possible, and that alone is worth many times its cost. Many who have used it hoping only for a short relief from suffering have been happily surprised to find that after awhile the relief became permanent. Mrs. V. H. Leggett of Yum Yum, Tennessee, U. S. A. writes. "I am a great sufferer from rheumatism, all over, from head to foot, and Chamberlain's Pain Balm is the only thing that will relieve the pain." For sale by Kerr's Drug Store.

JUNE THE MARRIAGE MONTH

New York, Though, Almost an Exception to a Worldwide Rule as to Weddings.

June is the favorite month for marriages the world over. In Scotland, for instance, 175 of 1,000 marriages take place in June, and in Sweden the proportion is 150.

In New York city the number of marriages in a year is 40,000 and the distribution by months is so even that the lead of June is very small. Last year June led with 3,723 marriages, but there were 3,709 in December, a favorite month for marriages, and 3,604 in November.

The month in which there are the fewest in New York city is March. May and August are two other months in which the number of marriages is small.

Though in most European countries June is the favorite month, there are some exceptions. Thus, in Holland, May is the favorite month for marriages, and in Italy February, which includes the period preceding the beginning of Lent.

In Germany, April, regarded as the first of the spring months, is the favorite one for marriages, and in Greece October is the favorite. In Russia, January is the favorite marriage month.

It is in consequence of these Old World preferences, no doubt, that the somewhat curious result is shown here: June is the favorite marriage month for those born here, whether of American or foreign parentage, but it is not for those foreign born.

Last year, according to the board of health figures, there were more marriages in December than in June of foreign born couples, and more in January, too.

IT REVEALS NEW WORLDS.

Most Recent Scientific Discovery Is the "Ultra-Microscope"—Great Aid to Science.

One of the most recent scientific triumphs is the "ultra-microscope."

Two continental experimenters are credited with the invention, which consists in the application to the microscope of highly concentrated artificial light by the aid of powerful lenses and prisms. The result is so greatly to increase the magnifying power that millions of particles hitherto beyond the range of the microscope are rendered visible. The ultra-microscope, too, has revealed, among other things, new and strange living creatures moving about in a drop of human blood.

By the old form of microscope only inactive microscopic matter could be photographed. Any activity, unless very slow, was lost altogether. Even the very slow movements caused blurrings.

Under the new microscope bacteria of all sizes stand clearly revealed, their slightest movements being plainly visible. The effect, of course, will be to render immense assistance to science in exploring the wonder world of microscopic things.

With Cleanly Persons if Soap and Water are Desirable Pompeian Massage Cream is Essential

You do not wear fresh underwear for "the looks of it," but to enjoy the *sense* of cleanliness. Clean outer garments answer for appearances.

Soap and water will take the surface grime off the face, but Pompeian Cream alone will take the hidden dirt from the pores—the dirt that makes the complexion sallow, muddy and oily.

Pompeian Massage Cream cannot improve nature but it permits nature to do its perfect work—it makes the pores throw off the dirt and impurities, and it gives a sense of cleanliness unknown before its use. Does not—cannot—promote the growth of hair on the face.
