TALE OF ORANGE BLOSSOM

Legend of Spain Tells How It Was First Used at a Wedding in That Country.

The wearing of orange blossom at a wedding is accounted for in various ways. Among other stories is the following popular legend from Spain: An African king presented a Spanish king with a magnificent orange tree, whose creamy, waxy blossoms and wonderful fragrance excited the admiration of the whole court. Many begged in vain for a branch of the plant and a foreign ambassador was tormented by a desire to introduce so great a curiosity to his native land. He used every possible means to accomplish his purpose, but all his efforts coming to naught he gave up in despair.

The fair daughter of the court gardener was loved by a young artisan, but she lacked the dowry which the family considered necessary to a bride. One day, chancing to break on a spray of orange blossom, the gardener thoughtlessly gave it to his daughter. Seeing the coveted prize in the girl's hair the wily ambassador offered her a sum sufficient for the dowry, provided she gave him a branch and said nothing about it. Her marriage was soon celebrated, and on her way to the altar, in grateful remembrance of the source of all her happiness, she secretly broke off another bit of the lucky tree to adorn her hair.

Whether the poor court gardener lost his head in consequence of his daughter's treachery the legend does not relate, but many lands now know the wonderful tree, and ever since that wedding day orange blossom has been considered a fitting adornment for a bride.

NO REJECTED LOVERS.

Jilted Sweethearts Are Unknown in the Cape Horn Race of Savages —Refusal May Mean Death.

Courtship amon the Tierra del Fuegians (the strange race of savages inhabiting the islands in the neighborhood of Cape Horn) is a simple but serious business.

Having chosen a bride, the savage wooer offers the lady his hunting bow. If she takes it and returns it at once, then the snitor

understands that he is accepted. As a matter of fact, a woman rarely, if ever, rejects an offer of marriage, for a Tierra del Fuegan does not take a rejection patiently, and is apt to resent a denial by wounding the damsel with an arrow.

It is, perhaps, needless to add that there are no henpecked husbands in Tierra del Fuego. The men, in fact band themselves together in a sort of society, the aim of which is to keep the women in subjection. This curious custom is the outcome of a tradition that the women once had the upper hand, and forced the men to do all the drudgery. As men in a savage state are even more prejudiced against work than their civilized brothers, it is quite natural that they should take measures accordingly.

"Oh—er, lemme see," said his pa. "Oh, they're these country jays that blow out the gas."—Philadelphia Press.
