How to Feed Stock

This is the question that interests every farmer. Experience has demonstrated that they require something besides corn and water. The larger per cent of food they can eat and digest the faster they will grow and fatten. This can best be accomplished by giving them some good Stock Food or something else that will increase the appetite and aid the digestion. I carry the

Omaha the Market Town.
The live Commercial Club of Omaha is planning another trade excursion from June 20 to 22. They will be in our city on Friday June 22. These excursions have been quite successful in the matter of extending the acquaintance of the wholesale merchants of Omaha. The Club declares it is not the intention to solicit orders on these excursions, but merely to extend acquaintance and make new friends. It makes a merchant feel better if he has a personal dealing with. Omaha is growing rapidly and is surely becoming the Market Town of this territory.
