

# FACTORY BEING CONSTRUCTED!

The mammoth beet sugar factory now being built by the U. S. Beet Sugar Co., at Garden City, Kansas, in the famous irrigated district of the Arkansas Valley, at a cost of over Three Quarter Millions of Dollars, is progressing rapidly. The Company has just purchased 40,000 barrels of cement with which to continue the work. This means about 300 car loads. This is an 800 ton factory and will handle the beets grown on 6,000 acres of land this summer. The slicing of the beets will commence October 1st. Each ton of beets will produce 200 pounds of sugar, which would be 160,000 pounds per day or twenty-four million pounds for the entire season. For this 120,000 tons the farmers will receive in cash \$5.00 per ton, or \$600,000. Plans are now being made to build a large factory at Deerfield, just up the valley.

## This Is the Country For the Poor Man—

the country that will increase your wealth. Lands here are still within the reach of all, but the acreage is limited. Every day lessens your chance of getting one of these desirable farms on which you can raise anything that is raised here, and more or it. Good schools, climate fine and by means of irrigation there is never a crop failure of any kind. A renter here with a small capital may buy out there and become independent. Good soil and water whenever you need it, make the crops, and the crops are the real index of the value of the land. Remember, the extent of this Valley is limited and is rapidly settling up. Land values are bound to increase.

Be sure and go with us on the next excursion. Lands that will bring the farmer from \$50 to \$150 per acre returns every year and can now be bought for from \$25 per acre up, will surely sell for \$100 or more per acre in a short while.

Don't neglect this opportunity, but come with us on

## August 21 or September 4

A chance of a lifetime—private car for your comfort, free sleeper—lands shown free of charge.

### The Cuban Question.

The United States gets from Cuba twelve-sevenths of the sugar it imports. The commerce between the two countries for the last fiscal year exceeded \$120,000,000. The Cuban bonded debt of \$35,000,000 is mostly held in this country. American capital in excess of \$100,000,000 has been invested in Cuban plantations, mines and railroads. Whatever tends to check industry in Cuba, to lessen productiveness, to diminish trade and the return on capital effects directly the interest of a great many Americans who but for their personal concern might view a Cuban insurrection with about as much indifference as they do one in Columbia.

There is much British, Canadian, German and Spanish capital invested in Cuba. Most of it went there because of the substantial assurance given by the United States that the capital would be protected—that there would be some kind of stable government in the island. If there should be indications of a return to the destructive conditions which existed prior to the Spanish war, when patriotic bandits were burning sugar plantations and killing the great industry of Cuba, the moneyed and propertied interests, American, European, and Cuban, would look to the United States for relief. Much as it might dislike to intervene it would have to do so.

Intervention which was confined to putting the Cuban government on its legs again if it should be unable to put down an insurrection would not be entirely satisfactory. A government which had to be propped up with American bayonets would not be greatly respected by Cubans or by foreigners. If Cubans were Egyptians an American protectorate might

answer all purposes, but the Cubans being what they are there are serious objections to a protectorate.

The Americans who have capital invested in Cuba are mostly for annexation for business reasons. They are anxious to send to this country duty free the sugar, citrus fruit, and other products which are dutiable. So are many of the Cubans, and Europeans who are not representatives of foreign manufacturers. Those manufacturers do not mean annexation, for it would mean to them the loss of the Cuban market. Probably some of the men who are making war on the Cuban government would rather the United States should rule the island than that President Palma and his friends should do so. They might argue that they would have a better chance at the local offices.

There would be opposition to annexation in some quarters in this country. The American sugar producers and the tobacco raisers would protest against it. They know that if Cuba were to become a part of the United States its products could not be treated as Philippine products have been. If the mass of the American people should reach the conclusion that annexation was desirable or was to be preferred to the bolstering up of an ineffective Cuban government, the hostility of the sugar and tobacco interests, or of any surviving anti-imperialist would count for nothing. If after it had been demonstrated that the Cubans could not govern themselves the United States were to assume jurisdiction over them no one could truly say that this country had been false to the assurances of disinterestedness it gave at the beginning of the war with Spain. This country has an abund-

ance of perplexing domestic problems to deal with. It has the Philippines on its hands. It is not ambitious for a territory of Cuba, which would be insistent on statehood. It does not want a state of Cuba. The state government might be vexed with insurrections as the Palma government is, and federal authority might have to intervene to keep the peace. But there can hardly be an escape from annexation of the Cubans shall prove that they are unable to give due protection to the vast material interests which are concentrated in Cuba. —Chicago Tribune.

### Cheap Farm Land.

Southwest Offers Best Opportunities  
For Securing Homes.

Many farmers in the Northern and Eastern states are selling their high priced lands and locating in the Southwest. Many who have been unable to own their homes in the older country are buying lands in the new country.

Unusual opportunities exist along the lines of the Missouri Pacific-Iron Mountain Route.

The rich, alluvial, delta lands and river bottom lands of Southeast Missouri, Eastern Arkansas, Louisiana and Texas, capable of producing 60 bushels of corn, a bale of cotton, 4 to 6 tons of alfalfa 150 bushels of potatoes, and other grains, vegetables and hay crops, can be bought for \$7.50 to \$15.00 per acre. When cleared and slightly improved will rent for \$4.00 to \$6.00 per acre cash.

Uplands more rolling, lighter soil, adapted to fruit growing—peaches, pears, plums grapes, berries—also melons, tomatoes and other vegetables, can be bought for \$5.00 to \$10.00 per acre in unimproved state. Many

places with small clearings and some improvements can be bought very cheap.

This is a fine stock country. No long winter feeding. Free range, pure water, mild climate. A healthy, growing country with a great future.

Write for map and descriptive literature on Missouri, Arkansas, Louisiana Texas, Kansas or Indian Territory. Very cheap rates on first and third Tuesdays of each month.
