NEED FOR "OXEN TALK"

Men of Affairs Have to Use Vituperation Occasionally in Dealing with Colleagues.

Whenever Theodore P. Shonts, head of the Interborough-Metropolitan company, returns to his office and remarks: "I gave them oxen talk!" his secretaries know then some one got a good laying out. Of course, there is a story about the way "oxen talk" got into the Shonts family, and here it is:

His father was a western pioneer, and crossed the plains with an ox train. One of the party was a clergyman, and although he had the finest yoke, he was always getting stuck. The leader grew tired going to the rear every few hours to get the clergyman's oxen over the rough places, but under his fluent cursing the oxen never failed to move. Finally he said to the clergyman:

"Parson, you've just got to learn oxen talk. Damn 'em, sir, Cuss 'em right and left; it's the only language they understand."

Mr. Shonts' father learned "oxen talk" along with the minister, and both have found use for it on rare occasions in driving ox-like men.

MATCHED THE BOSS.

Boston and Cambridge people of an earlier day remember well Prof. Child of Harvard, a scholar who was likewise a live man. President Eliot tells with great gusto a story about his faithful attention to city politics.

Prof. Child always attended to his duties as a citizen of Cambridge. One night he went to a ward meeting at which a boss began to put forth some of his warped ideas. The college professor was speedily on his feet and scathingly denounced the boss and his methods.

After the meeting was over the good-natured boss, just to show that he bore no ill will, met the scholar on the stairs and genially handing over a cigar, said: "Have a smoke, profess?"

His antagonist straightened up, took the cigar, and said with great dignity: "Yes; I'll match you in any of your lesser vices!"

ELECTRICAL SHAVING.

They are trying it on the dog now at stables all over town, where my lady's maid can bring Fido or Rex or Mufti for his summer shave, says the New York Tribune. "It" is the new clipping machine operated by electricity. All you have to do is to bring the beast and place the machine just so and then switch the animal around and around in place until the job is done. In the stables where the new machine is installed the report is that it is a great improvement for both man and beast over the old hand process. Fido likes it and Useful Jack finds less provocation to break out into strong language at the twitchings of the animal. It doesn't take half the time consumed in the old process, it does a cleaner job and it is far less likely to annoy the subject operated on.

LIGHTNING'S PECULIAR FREAK.

Lightning played a peculiar freak recently when it struck the residence of C. W. Summerlin, who lives on the upper town road a short distance north of the city.

It struck the house, passing through the roof and ceiling, making only a small hole and setting nothing on fire. A streak was burned in the wall paper down one side of the room and a large mirror which was hanging on the wall had all of the quicksilver melted from the back of it. The lightning then passed out through the floor and into the earth.—Las Vegas Optic.

WHAT SHE WANTED.

Golsa Golde, the octogenarian millionaire, dropped stiffly on one knee.

"Darling, won't you marry me? I'd die for you," he said.

"If one could feel quite sure," murmured the young girl, "why, then—"

She gazed doubtfully upon the rich old man, a shade of mistrust in her lovely violet eyes.

A LONG JOB.

A friend of the writer, who was looking for laborers, inquired of a Swedish neighbor about a certain countryman and friend of his, hoping to secure his services.

"Oh," replied the Swede, "Him got a long job now—he drive da team vile him brodder is dead."

Miners in Early Days in Montana Were Willing to Pay High for Vegetables.

Ray Woodworth of Moscow, Idaho, was one of the early arrivals at Bannack, when the placer gold was discovered in Grasshopper gulch, and also moved near Virginia City and resided there when that famous placer field was in its glory.

Mr. Woodworth says that he came to Bannack from Denver in 1863, and took up a ranch near what is now known as Taylor crossing, between Dillon and Bannack.

He brought a lot of garden seed along with him, believing that garden vegetables would be a delicacy so craved by the miners that they would pay handsomely for them and that he would make more money with his spade and garden rake than with the rocker and pan.

He succeeded very well near Bannack, and when there was a rush to Alder gulch, he went there and took up a ranch in the Madison valley, not far from Virginia City, where he continued raising vegetables and selling them to the miners.

He raised the first wheat crop ever raised in the territory of Montana, and sold his wheat for 28 cents a pound.

"I lost \$2,000 on one load of rutabagas, and it was this way," he said: "I hired a freighter to haul a big load to Helena, paying him four cents a pound, and told him to sell them for nine cents a pound, thinking that was high enough for them."

"A few days after he left the ranch I heard that the vegetables were retailing at 50 cents a pound, and I sent a courier after him to tell him not to sell for less, but the messenger arrived at Helena a few hours after he had sold the load for nine cents a pound. The dealer retailed them at 60 cents."

"I also lost some money on a load of turnips. They froze en route, and I secured only 18 cents a pound for them."

"I sold many potatoes to the Alder gulch miners for 35 cents a pound, after cutting all the eyes out of them to save for seed."—Anaconda Standard.
