LIBEL ON ANIMAL RACE

Little Girls' Answer Was Decidedly a Reflection on the Class of Ruminates.

John Lover, the animal expert and nature writer of the Philadelphia Zoo, was talking the other day about a wolf.

"Yes," said Mr. Lover, "she ate her last litter of cubs. She has eaten, in fact, her last six litters. Yet she is a gentle and affectionate wolf. Strange that she should be so unmotherly."

He paused and smiled. "She reminds me of a remark I overheard the other day," the famous keeper resumed. "A school teacher came here with a class of little girls, and every now and then he would stop and fire off at the youngsters a few questions—nature questions, you know."

"In the lion house he said: 'Who can tell me what a ruminating animal is?'"

"I know, sir," said a little girl. "She is one that chews her cubs."

ENGLISH CATHEDRALS.

The gift of £20,000 by a lady, Mrs. Hawkins, for the completion of the western towers of Truro cathedral is a reminder that this is the only established church cathedral of any importance which has been built since St. Paul's was completed by Sir Christopher Wren. All the great cathedrals and abbeys in England were erected by Catholics and were handed over by act of parliament in the reign of Henry VIII. to the protestants when the Catholic church was disestablished and the Protestant religion created by law. It does not say much for the fervency of the Protestant religion that although the population of England and Wales, since the time of Henry VIII. has sprung up from about 4,000,000 to 36,000,000 the Protestant church has been unable to add any notable ministers to equal those built by the Catholics.—Reynold's Newspaper.

WATCH FOR THE BLIND.

On the face of one of the latest watches designed for the use of blind people the hours are indicated by movable buttons in relief on the dial. The strong pointer shows the minutes. The blind person passes his finger over the dial; the button indicating the hour he finds to be depressed, while the position of the hand gives the minutes. The buttons are held by a circular plate beneath the dial, which has at one point on its circumference a notch into which the buttons drop, one after the other, as the plate revolves with the movement of the works. This plate serves instead of the ordinary hour hand of a watch.

EARLY LEAD PENCILS.

The first pencils used for drawing purposes in Europe were a queer composition of tin and lead. All the great artists of that period made illustrious by Michael Angelo were devoted to these "stiles," as they were termed, and some of the most famous paintings preserved in our museums of today were originally blocked out and drawn in with these pewter pencils. They seemed to serve their purpose admirably, and it was not until many years later, centuries really, that the perfect drawing pencil was invented. The pewter ones were not called lead pencils, however, but "molybdooids."

THE GREAT WORLD FUTURE.

It grows clearer every day that east and west are never to fuse; that the far east is not to become Occidentalized; that Japan or China, or Japan and China together, will sooner or later make the China seas no place for the colonizing or pioneering European. There will be great powers there as well as in Europe and America. It is our interest to keep a watchful eye on this transformation, and, forgetting old theories and prejudices, to shape our policy to meet a new and unexampled situation.—London Spectator.

THE DAUGHTER BALKED.

"I thought," said old Groucherly, "that I could save money by refusing to give my consent to my daughter's marriage with young Huggins, but it's no go."

"What's the trouble?" queried the friend of the family.

"She declines to elope," explained the old man, with a large, open faced sigh.

ALL HAD THEIR NICKNAMES

American Presidents Had Various Cognomens Bestowed by Friend or Foe.

Washington was nicknamed the father of his country, Americus Fabius, the Cincinnatus of the west, atlas of America, lovely Georgious (a sarcastic nickname applied by the English soldiery), flower of the forest, deliverer of America, stepfather of his country (applied by bitter opponents during his presidency), and savior of his country; Adams was named colossus of independence; Jefferson, sage of Monticello and long Tom; Madison, father of the constitution; Monroe, last cocked hat; J. Q. Adams, old man eloquent; Jackson, old hickory, big knife and sharp knife, hero of New Orleans, gin-ral and old hero; Van Buren was little magician, wizard of Kinderhook and King Martin the First; Harrison, tippecanoe, old tip and Washington of the west; Tyler, young hickory and accidental president; Polk, young hickory; Taylor, rough and ready, old Buena Vista and old Zach; Fillmore, the American Louis Philippe.

WHY BACHELORS ARE BORES.

Somebody has started the idea that bachelors sink down into a dull monotonous condition of boredom for themselves, and they are apt to bore others from the sheer dreariness of their lives. Married men are said to be much more cheerful, light hearted and amusing than the bachelor tribe in general. A single man has so much more time on his hands than the benedict that he is apt to mope and regard himself a martyr. At the same time one must confess that some married men become fearful old fogies. And there is not much to choose between an old fogy and a dull bore.

AVOID DAY DREAMING.

There is no girl so prosaic that she does not indulge in an occasional day dream. Some girls waste far too much time in rose-colored clouds of imagination. Day dreams are all well enough in their way; they lift us out of the common place, but to dwell continually in their rosy mists is bad for us. This is a practical world, and if we want to succeed we must keep our eyes open and make the best of such opportunities as come our way.

AMERICAN WOMEN IN EUROPE.

The American woman, who is a very practical person, is blind to the virtues of a thin woolen cloth for a traveling dress, and pins her faith instead to taffetas. A short skirt and a bolero or a much-tucked blouse-bodice (which she calls "a waist") of olive green, navy or cigar brown taffetas, is almost a uniform with our American visitors on globe trotting intent.

SO SAFE.

"My ideal of a happy life," murmured the czar, wearily, as the discovery of three new conspiracies was reported to him, "is on the lines of an American musical comedy."

"Why so, sire?" asked the astonished prime minister.

"Because in that there is never the suspicion of a plot," replied the autocrat, enviously.

SURE THING.

Mrs. Crimsonbeak—I understand when the chimneys of the royal mint at Berlin are cleaned about \$1,000 worth of gold is taken from the soot.

Mr. Crimsonbeak—That's a good deal more money than you ever got out of a suit of mine, dear!

LAME GEOMETRY.

Euclid had just announced that the part could not be greater than the whole.

"Evidently," they cried, "he has never had an auto repaired."

In the face of this there were those who persisted in calling mathematics an exact science.

TEMPTATION.

"You should not give way when tempted, young man," said the rich man.

"Why, were you ever tempted to give anything away?" asked the young man.

AT FIRST HAND.

"Do you believe that an ocean trip is conducive to health?"

"Well, those who take it generally go to sea."—Baltimore American.
