WHY HE WAS ANGRY
HAPPENING THAT SPOILED MR. JONES' ENJOYMENT.

Wife's Little Mistake In Poker Game Enriched Visitor, But Host Said Nothing, at Least Not Just Then.

The Joneses, Mr. and Mrs., went over to spend the evening with the Goltts the other evening, because people get tired of staying at home all the time and just listening to each other's palaver.

By and by Mr. Goltz suggested that they all draw up around Mrs. Goltz's little sewing table and have a nice friendly game of poker for an hour or so.

Everybody wanted to show that he or she was a sure enough sport, all right—and then one always has an idea at the beginning of a poker game that just as like as not he can make the evening profitable as well as merely pleasant.

Mrs. Goltz and Mrs. Jones were about even in their working knowledge of the great national game, and the men folks therefore backed them up cheerfully, assuming that they would break about even.

After a half hour or so of play the visitors took the lead, as the sporting editor might say. It was only a penny ante, five-cent limit game, but then people have been known to clean up a first-rate little bunch of pin money in even such a juvenile game as that, and Jones already had his chips stacked up into four cute little cylinders in front of him. Mrs. Jones would reach over and borrow ten chips or so now and again, and a momentary frown would flit over her husband's brow, but he didn't say anything.

By and by Jones took notice of the fact that Mrs. Jones was reaching over into his sub-treasury vaults and picking up chips half a stack at a time and putting them into the pot as fast as she could meet Mr. Goltz's bets and raise him back again.

Mr. Jones looked at her when he saw his hoard of chips disappearing, in a way that inquired plainly: "Are you sure you've got it on him?" "Got a straight!" whispered Mrs. Jones when she found opportunity to whisper without being observed, and Jones gave her a look that said, "Go as far as you like," for straights had been pretty good that evening, and the pot, after the way it had been sweetened, looked worth while.

Finally Mr. Goltz called her. "All I've got is three ladies," he said in a tone of polite inquiry, laying down his hand.

"Well, I have a straight," gurgled Mrs. Jones. "See—queen, king, ace, deuce, tray!"

Mr. Jones gave her a look that told her something was amiss before anybody had time to say a word.

"Why, the ace comes after the king, doesn't it?" she inquired. "And doesn't the two-spot come after the ace, and the three-spot after the two-spot? I'd just like to know why that isn't a straight!"

Mr. Jones watched Mr. Goltz rake in the pot and didn't say anything—not just then.

Inexorable Chinese Justice.
Hsu Hsi-lin, a Chinese school-master, murdered a government official some months ago and was beheaded in consequence. The North China Daily News prints this item showing how Chinese justice is still pursuing the wrongdoer's family: "The governor of Anhui, Fong Hsu, has been trying to get hold of the wife of Hsu Hsi-lin, the assassin of the late En Min, who is studying in Japan, and has written to the Chinese minister at Tokyo asking him to extradite her and send her back to China. As the woman is charged with a political offense the Chinese minister has replied that he cannot do this and proposes that the Peking government approach the Tokyo government on the subject."

Edison's Advice to Boys.
"I should like every boy interested in electricity to hear what Thomas A. Edison once said to me when I was a boy working in his laboratories," writes Joseph H. Adams in the introduction to his "Harper's Electricity Book for Boys." "I often recall it when things do not go just right at first. I asked the great inventor one day if invention was not made up largely of inspiration. He looked at me quizzically for a moment, and then replied: 'My boy, I have little use for a man who works on inspiration. Invention is two parts inspiration and 98 per cent. perspiration.'"

Origin of "D'Oyley" Linen.
Few know the origin of the word d'Oyley. In the reign of William I, Robert d'Oyley, a Norman knight, was granted an estate at Hook-Norton, which he held on the condition that on every feast of St. Michael he tendered to the king a linen tablecloth valued at three shillings. The ladies of the d'Oyley household embroidered these fine cloths, which were exclusively used at the royal table, and as they were very beautifully worked on the finest of linen they were called "d'Oyley linen," and so nowadays the name d'Oyley is applied as then for fine linen cloths.

A Legislative Paradox.
"The representative part of the British parliament is a practical paradox."
"Why?"
"Because it is a house of commons, and yet peerless among legislatures."
