### You needn't be afraid.

One day a lady who had been reared in the careful luxury of the old-fashioned Virginia home was invited to visit the kitchen of a great Chicago hotel. She wanted to go, but was afraid. When asked why, she replied, "I'm afraid I'll see something that will forever destroy my appetite for hotel food." She went, and found everything delightfully clean. Good housewives consider cleanliness and purity first of all; that's why Quaker Oats is their choice among all oatmeals. In making Quaker Oats the grain is sifted and resifted, passing through more than fifty processes of cleaning before it is cooked and rolled.

If you took a handful of oats and scrubbed and polished and wiped each separate grain, it wouldn't then be nearly as clean as Quaker Oats. No human hand ever touches a single grain of Quaker Oats from the field to your kitchen. The best advice on foods you could have is: Eat Quaker Oats every morning for breakfast.

You'll find Quaker Oats put up in two size packages, the regular size and the large, family size for those who are not convenient to the store.
