While T. J. McKiever was delivering meat for the Thornton butcher shop Monday morning the team became frightened at a street drag and ran away. He was delivering meat at the home of Frank Smith and the team ran through front yards and broke the wagon and harness to some extent. The hydrant at John Hermes' was also damaged. This is the second time the team has run away in the past two weeks.

### The first food of the day.

Every man, woman and child begins the day with more or less vigor of mind and strength of body according to the first food supplied to the stomach. The best first dish of the day is a bowl of Quaker Oats. The stomach can assimilate it more quickly and with less effort than other foods. There is little or no waste and every ounce of food is converted into muscle, vigor and brain activity. The strongest people in the world are the regular eaters of Quaker Oats. You should eat it for breakfast every day.

If you are convenient to the store you'll probably buy the regular size package. For those who live in the country the large size family package is more satisfactory.

## Don't Use a Scarecrow

### To Drive Away the Mail Order Wolf

You can drive him out quickly if you use the mail order houses' own weapon—advertising. Mail order concerns are spending thousands of dollars every week in order to get trade from the home merchants. Do you think for a minute they would keep it up if they didn't get the business? Don't take it for granted that every one within a radius of 25 miles knows what you have to sell, and what your prices are. Nine times out of ten your prices are lower, but the customer is influenced by the up-to-date advertising of the mail order house. Every article you advertise should be described and priced. You must tell your story in an interesting way, and when you want to reach the buyers of this community use the columns of this paper.
